Ahamed, Tariq Altalhi, 2024-01-20 *Genetically Engineered Organisms in Bioremediation* provides comprehensive coverage of biotechnological applications of genetically engineered microorganisms for the bioremediation of polluted environments. Chapters are contributed by international scientists with in depth knowledge, expertise, vision and commitment in their scientific profession. They detail several genetically engineered microorganisms and their enzymes that could be applied to biologically break down persistent organic pollutants and recombinant DNA technologies which entail development of suicidal GEMs for effective and safe remediation of heavily polluted sites. **FEATURES** Highlights genes that encode catabolic enzymes involved in the biodegradation of pollutants. Explores combining genetically engineered microorganisms with bioaugmentation, biostimulation and bioattenuation strategies. Details the application of genetic engineering of bacteria for managing aromatic organic compounds under hypoxic conditions. Discusses tracking techniques and suppression strategies of genetically modified microorganisms. Written for researchers, engineers and academics working in bioremediation, microbiology and biotechnology, this book is both timely and important. Environmental Biotechnology Dilip Kumar

Genetic Interactions Among Microorganisms in the Natural Environment E.M.H. Wellington, J.D. van Elsland, 2013-10-22 This book gives an overview of gene transfer and stability in those aquatic and terrestrial environments where bacteria and fungi can survive and interact genetically. It examines the role played by sex between microbes in the evolution of populations and their survival. Special emphasis is placed on methodology including the analysis by novel techniques of genetic material extracted directly from soils, rivers and lakes. The natural spread of antibiotic resistance and the safe use of genetically manipulated microbes are matters of considerable scientific, medical and public concern upon which the investigations presented here have direct
