What Makes A Great Exhibition:

What Makes a Great Exhibition? Paula Marincola, 2007-02-16 For better or worse museums are changing from forbidding bastions of rare art into audience friendly institutions that often specialize in blockbuster exhibitions designed to draw crowds But in the midst of this sea change one largely unanswered question stands out What makes a great exhibition Some of the world's leading curators and art historians try to answer this question here as they examine the elements of a museum exhibition from every angle What Makes a Great Exhibition investigates the challenges facing American and European contemporary art in particular exploring such issues as group exhibitions video and craft and the ways that architecture influences the nature of the exhibitions under its roof The distinguished contributors address diverse topics including Studio Museum in Harlem director Thelma Golden's examination of ethnically focused exhibitions and Robert Storr director of the 2007 Venice Biennale and formerly of the Museum of Modern Art on the meaning of exhibition and exhibitionmaker A thought provoking volume on the practice of curatorial work and the mission of modern museums What Makes A Great Exhibition will be indispensable reading for all art professionals and scholars working today

What Makes a Great Exhibition? Paula Marincola, Robert Storr, Lynne Cooke, 2011 Interpreting Art in Museums and Galleries Christopher Whitehead, 2011-12-02 In this pioneering book Christopher Whitehead provides an overview and critique of art interpretation practices in museums and galleries Covering the philosophy and sociology of art traditions in art history and art display the psychology of the aesthetic experience and ideas about learning and communication Whitehead advances major theoretical frameworks for understanding interpretation from curators and visitors perspectives Although not a manual the book is deeply practical It presents extensively researched European and North American case studies involving interviews with professionals engaged in significant cutting edge interpretation projects Finally it sets out the ethical and political responsibilities of institutions and professionals engaged in art interpretation Exploring the theoretical and practical dimensions of art interpretation in accessible language this book covers The construction of art by museums and galleries in the form of collections displays exhibition and discourse The historical and political dimensions of art interpretation The functioning of narrative categories and chronologies in art displays Practices discourses and problems surrounding the interpretation of historical and contemporary art Visitor experiences and questions of authorship and accessibility The role of exhibition texts new interpretive technologies and live interpretation in art museum and gallery contexts Thoroughly researched with immediately practical applications Interpreting Art in Museums and Galleries will inform the practices of art curators and those studying the subject

U.S. International Exhibitions during the Cold War Andrew James Wulf, 2015-01-30 Although cultural diplomacy has become an increasingly fashionable term embraced by academics foreign service personnel and private sector commercial and cultural interests the very practice of this idea remains conspicuously challenging to define This book takes on this problem advancing a new understanding of cultural diplomacy that results from

a historical investigation of a single area of government and private sector partnership and what became in the mid twentieth century the most prominent manifestation of this alliance the cultural exhibitions sent abroad to tell America s story with the goal of winning hearts and minds To illustrate this point selected exhibitions and the intentions of the policymakers who proposed them are interrogated for the first time beside archival documentation writings from the history of design advertising science as well as art historical and museum studies theories that address various aspects of the history of collecting and display all of which explore the reality of how these exhibitions were conceived and prepared for foreign audiences Most importantly personal interviews with the designers and government representatives responsible for the ultimate appearance of these events upturn preconceived notions of how these events came to be Seventy five photographs from the exhibits make this history come alive Through this discussion these questions are answered What was America showing of itself through these exhibitions And more urgently what do these exhibitions tell us about U S interest in verisimilitude This investigation spans the crucial years of American exhibitions abroad 1955 1975 beginning with the formation of an official system of exhibiting American commercial wares and political ideas at trade fairs through official exchanges with the U S S R to pavilions at world s fairs and finally to museum exhibitions that signaled a return to the display of founding American values They are thus complex ideological symbols in which concepts of national identity globalization technology consumerism design and image management both coincided and clashed The investigation of these exhibitions enhances the understanding of a significant chapter of U S cultural diplomacy at the height of the Cold War and how America constantly reimagined itself

representation of commodities within British children's literature. In tracing the role of objects in key texts from the turn of the century, Jane Suzanne Carroll uncovers the connections between these fictional objects and the real objects that child consumers bought, used, cherished, broke, and threw away. Beginning with the Great Exhibition of 1851, this book takes stock of the changing attitudes towards consumer culture, a movement from celebration to suspicion, to demonstrate that children's literature was a key consumer product, one that influenced young people's views of and relationships with other kinds of commodities. Drawing on a wide spectrum of well-known and less familiar texts from Britain, this book examines works from Lewis Carroll's *Through the Looking Glass* and *What Alice Found There* and E. Nesbit's *Five Children It to Christina*, Rossetti's *Speaking Likenesses*, and Mary Louisa Molesworth's *The Cuckoo Clock*. Placing children's fiction alongside historical documents, shop catalogues, lost property records, and advertisements, Carroll provides fresh critical insight into children's relationships with material culture and reveals that even the most fantastic texts had roots in the ordinary everyday things.
