The Tribe Of Tiger Cats And Their Culture:

The Tribe of Tiger Elizabeth Marshall Thomas,2001-06 Describes the two extremes of the cat family cats and tigers

The Tribe of Tiger Elizabeth Marshall Thomas,1994-02-01 The story begins with what cats are meat eaters first foremost But within that stark equation abides an astonishing range of experience expression Cats even tigers are not solitary beings but are homebodies who own property favor extended clans when food supplies permit They communicate with one another with us Most crucially cats are like us individuals who instinct notwithstanding pass on adapt invent codes of deportment as circumstances require They sustain an intricate elegant ever changing web of community with us among themselves with the other creatures great small who dwell in the world B W drawings New York Times bestseller Intriguing Captivating **Cat Culture** Janet Alger,Steven Alger,2011-02-07 Even people who live with cats and have good reason to know better insist that cats are aloof and uninterested in relating to humans Janet and Steven Alger contend that the anti social cat is a myth cats form close bonds with humans and with each other In the potentially chaotic environment of a shelter that houses dozens of uncaged cats they reveal a sense of self and build a culture a shared set of rules roles and expectations that organizes their world and assimilates newcomers As volunteers in a local cat shelter for eleven years the Algers came to realize that despite the frequency of new arrivals and adoptions the social world of the shelter remained quite stable and pacific They saw even feral cats adapt to interaction with humans and develop friendships with other cats They saw established residents take roles as welcomers and rules enforcers That is they saw cats taking an active interest in maintaining a community in which they could live together and satisfy their individual needs Cat Culture s intimate portrait of life in the shelter its engaging stories and its interpretations of behavior will appeal to general readers as well as academics interested in human and animal interaction *The Lion in the Living Room* Abigail Tucker,2017-09-05 Originally published in hardcover in 2016 by Simon Schuster Kinesic Intelligence in the Humanities Guillemette Bolens,2023-12-20 This research collection showcases how kinesic intelligence is fundamental to human communication and our ability to produce complex meaning exploring its manifestations across a range of humanities disciplines and connecting our past with our social and cultural future The book defines kinesic intelligence as a higher order intellectual competence that allows human beings to interact and grow cognitively and intersubjectively through sensorimotoricity and interpersonal movement Understood in this way kinesic intelligence can offer insights into the development of humans meaning making abilities and in turn society and culture more broadly Recognizing the power of the humanities in furthering sociocultural development the collection features perspectives from scholars across a range of topics including the multimodality of language acquisition in children young adults in clinical psychology and medical humanities nonverbal communication in history legal language and reasoning literature and cognitive studies the internet and multispecies anthropology and sensoriality in history and art Foregrounding the impact of the humanities in promoting new understandings of human intelligence this volume will be of interest to scholars in cognitive

legal and literary studies multimodality anthropology history medical humanities and those with an interest in the real world impact of the humanities

Spell of the Tiger Sy Montgomery, 2009-01-16 **Tigers** *The Hidden Life of Deer* Elizabeth Marshall Thomas, 2024-01-17 The animal kingdom operates by ancient rules and the deer in our woods and backyards can teach us many of them but only if we take the time to notice In the fall of 2007 in southern New Hampshire the acorn crop failed and the animals who depended on it faced starvation Elizabeth Marshall Thomas began leaving food in small piles around her farmhouse Soon she had over thirty deer coming to her fields and her naturalist's eye was riveted How did they know when to come all together and why did they sometimes cooperate sometimes compete Throughout the next twelve months she observed the local deer families as they fought through a rough winter bred fawns in the spring fended off coyotes a bobcat a bear and plenty of hunters and made it to the next fall when the acorn crop was back to normal As she hiked through her woods spotting tree rubbings deer beds and deer yards she discovered a vast hidden world Deer families are run by their mothers Local families arrange into a hierarchy They adopt orphans they occasionally reject a child they use complex warnings to signal danger they mark their territories they master local microclimates to choose their beds they send countless coded messages that we can read if only we know what to look for Just as she did in her beloved books *The Hidden Life of Dogs* and *Tribe of Tiger* Thomas describes a network of rules that have allowed earth's species to coexist for millions of years Most of us have lost touch with these rules yet they are a deep part of us from our ancient evolutionary past *The Hidden Life of Deer* is a narrative masterpiece and a naturalist's delight
