Exploratory Study with mondus.de GmbH Matthias Herfert, 2001-03-15 Inhaltsangabe Abstract The Internet plays an important role of today's management decision making Great opportunities have to be weighted against investments into knowledge technology and organizational restructuring Often great uncertainty is involved because of rapidly changing technologies and mutual dependence of transaction parties on each other's degree of technology adoption The main advantage of electronically performed activities is its improved efficiency In the past business to business applications have been based on specific investments of individual firms that attempted to gain competitive advantages from proprietary electronic data interchange EDI However investments were huge and flexibility was very limited Nowadays Internet technologies allow for global reach ubiquity and improved efficiency at reduced asset specificity One business application of Internet technologies is the independent business to business Internet based marketplace IBMP on which buyers and sellers can perform service product information and money transactions Due to the early stage of technology adoption the suitability of specific IBMP transactions is often unclear and all those actors involved have to make strategic decisions concerning the way in which future product transactions will be performed With the help of this thesis buyers sellers and marketplace providers can evaluate the transactional suitability of product categories Such an evaluation is of particular importance to small and medium sized enterprises SME They often lack automation and economies of scale Therefore the potential of improved efficiency through Internet technologies is here especially high An exploratory study with the IBMP mondus has allowed for an empirical testing of selected evaluation criteria within selected product categories The final results of the application explain the complexity of the decision situation and the remaining uncertainty due to the early stage of technology adoption Inhaltsverzeichnis Table of Contents Management SummaryI ContentsII List of Abbreviations SymbolsIV List of FiguresVIII List of TablesVIII 1 Introduction1 1 1 The Gap between Present Knowledge and Desired Competence1 1 2 The Research Concept2 1 2 1 Specification of Objectives2 1 2 2 Approach and Procedure3 1 2 3 Empirical Evidence3 1 2 3 1 Small and Medium Sized Enterprises4 1 2 3 2 The Company mondus ltd 4 1 3 Structure of the

Econometric Analysis of Stochastic Dominance Yoon-Jae Whang, 2019-01-31 Provides a comprehensive analysis of stochastic dominance through coverage of concepts methods of estimation inferential tools and applications **Why are Wages Upward Sloping with Tenure?** Joachim Prinz, 2004 One of the most stylized facts in labor economics is the finding that wages tend to rise with job duration but what is the role of productivity between this relation Intuitively it seems rather unspectacular that experienced workers earnings are higher than otherwise comparable junior workers but economic literature offers three competing theories explaining this phenomenon A unique database from a single professional sports industry covering the past decade of player performance and wages in the National Basketball Association NBA is used to test the superiority of one model over others in explaining players upwards sloping age earnings profiles The empirical results show little evidence of the notion that player wages are solely determined on the basis of their productivity Findings are rather in accordance with shirking

and matching ideas Returns to tenure are found to be significant but its magnitude is reduced when the spurious bias stemming from OLS is controlled for The fact that tenure remains considerably large unaffected of productivity but is simultaneously mitigated due to job match specific effects is in harmony with incentive and matching arguments Joachim Prinz born 1971 studied economics at the University of Trier Copenhagen Business School and American University Washington D C From 1999 2001 he was a scientific co worker at the University of Greifswald Department of Economics Since 2001 University of Witten Herdecke

Alliance Auctions Tobias Ihde, 2012-12-06 1 1 Motivation Today's transportation market is far from perfect Market participants have admission only to a certain fraction of the market and price formation lacks transparency However this

state is no law of nature since in principle all market participants could manage to get together somehow and do business but gaining new business partners beyond existing bonds usually takes too high efforts After all the items in transportation markets are usually traded under extreme time pressure transportation orders have fixed pick up and delivery deadlines and free transportation capacity cannot be used thereafter Here Internet based freight markets promise help Since the early 1990s many of such markets have come into existence so that a considerable number exists today For Germany alone over 50 different electronic transportation marketplaces are listed in a database hosted at the University at Bremen 2001 The mediation models of these marketplaces are quite diverse cp **Journal of Economic Theory** Karl Shell, Jess Benhabib, 1999
