Dimitriu, Jens Ringsmose**

War From The Ground Up Twenty First Century Combat As Politics:

War from the Ground Up Emile Simpson, 2012 This is a philosophical treatise on war written by an Oxford grad who served in Afghanistan

The Means to Kill Gerrit Dworok, Frank Jacob, 2015-11-12 Throughout human history technological innovation has functioned as a driver of civilization and inspired many people's belief in progress When it comes to warfare where technology is applied with a cruel and deadly logic a nuanced view is needed From siege engines to drones innovation has often served a less enlightened aim elimination of the enemy This collection of new essays from specialists in military history examines the interdependence between war and technology from a number of regional perspectives

Dying to Learn Michael A. Hunzeker, 2021-07-15 In *Dying to Learn* Michael Hunzeker develops a novel theory to explain how wartime militaries learn He focuses on the Western Front which witnessed three great power armies struggle to cope with deadlock throughout the First World War as the British French and German armies all pursued the same solutions assault tactics combined arms and elastic defense in depth By the end of the war only the German army managed to develop and implement a set of revolutionary offensive defensive and combined arms doctrines that in hindsight represented the best way to fight Hunzeker identifies three organizational variables that determine how fighting militaries generate new ideas distinguish good ones from bad ones and implement the best of them across the entire organization These factors are the degree to which leadership delegates authority on the battlefield how effectively the organization retains control over soldier and officer training and whether or not the military possesses an independent doctrinal assessment mechanism Through careful study of the British French and German experiences in the First World War *Dying to Learn* provides a model that shows how a resolute focus on analysis command and training can help prepare modern militaries for adapting amidst high intensity warfare in an age of revolutionary technological change

Handbook of the Sociology of the Military Giuseppe Caforio, Marina Nuciari, 2018-05-19 This new edition of the volume is presented on the wave of the success which had its first edition 2003 It is entirely updated to the current situation of the disciplines covered and expanded with particular regard to the new missions that have become the main challenge for the armed forces in these first decades of the new millennium with new insights to technological development toward so called cyborg warriors new forms of leadership and changes in soldier's identity and organisational culture It is compiled of documents coming from various researchers at universities around the world as well as military officers devoted to the sector of study Covered in this volume is a historical excursus of studies prior to contemporary research interpretive models and theoretical approaches developed specifically for this topic civic military relations including issues surrounding democratic control of the armed forces military culture professional training conditions and problems of minorities in the armed forces an examination of the structural change within the military over the years including new duties and functions following the Cold War

Warriors or Peacekeepers? Kjetil Enstad, Paula Holmes-Eber, 2020-04-25 As the past two decades of war in Afghanistan Syria Iraq

Darfur and the Congo have revealed war in the twenty first century looks nothing like the traditional state to state conflicts of World Wars I and II which defined the previous century Resolving today s conflicts typically based on complex ethnic religious economic and political dynamics requires far more than mere military strength and technology The military officer of today must simultaneously be a warrior and diplomat combatant and humanitarian worker soldier and peacekeeper But how can today s militaries prepare their leaders for such multifaceted roles Warriors or Peacekeepers seeks to provide answers to this question comparing and contrasting research on the successes and failures of military cultural education and training programs in seven different countries on three continents U S Canada Argentina Norway Denmark Germany and the Netherlands This anthology consists of three main sections The first addresses the theoretical issues of developing the warrior peacekeeper what constitutes cultural competence in the officer profession and the pedagogical challenges associated with developing such competence The second compares teaching practices from various military educational institutions and provides insight into such issues as how language training can build cultural awareness helping officers navigate the ethical and moral challenges of dealing with gender in radically different cultures and the best didactic models to develop reflective skills in military leaders The third section examines the structural and organizational conditions which historically have aided or impeded educational and organizational change in the military This book will appeal to military academic communities educational institutions scholars in security studies peacekeeping and conflict studies and to decision makers in governments and administration

Strategy and Defence Planning Colin S. Gray, 2014 *Strategy and Defence Planning Meeting the Challenge of Uncertainty* explores and examines why and how security communities prepare purposefully for their future defence Professor Gray argues that our understanding of human nature of politics and of strategic history does allow us to make prudent choices in defence planning

Strategic Narratives, Public Opinion and War Beatrice De Graaf, George Dimitriu, Jens Ringsmose, 2015-02-11 This volume explores the way governments endeavoured to build and maintain public support for the war in Afghanistan combining new insights on the effects of strategic narratives with an exhaustive series of case studies In contemporary wars with public opinion impacting heavily on outcomes strategic narratives provide a grid for interpreting the why what and how of the conflict This book asks how public support for the deployment of military troops to Afghanistan was garnered sustained or lost in thirteen contributing nations Public attitudes in the US Canada Australia and Europe towards the use of military force were greatly shaped by the cohesiveness and content of the strategic narratives employed by national policy makers Assessing the ability of countries to craft a successful strategic narrative the book addresses the following key areas 1 how governments employ strategic narratives to gain public support 2 how strategic narratives develop during the course of the conflict 3 how these narratives are disseminated framed and perceived through various media outlets 4 how domestic audiences respond to strategic narratives 5 how this interplay is conditioned by both events on the ground in Afghanistan and by structural elements of the domestic political systems This

book will be of much interest to students of international intervention foreign policy political communication international security strategic studies and IR in general Contemporary Military Theory Jan Angstrom,J.J. Widen,2014-07-17 The book aims to provide the reader with a state of the art introduction to classic and modern military theory The text accounts for the most important theories within the field by developing and analyzing these theories as well as problematizing both their normative and explanatory aims While focusing on military theory the book does not only reflect a single way of relating to knowledge of war and warfare but furthers learning by introducing contrasting perspectives as well as constantly criticizing the theories There is a clear need for an introductory text for the entire field of military theory that focuses whole heartedly on the theories not on their context or how they are expressed in practice during war This book covers such questions as how we should understand the changing character of war the utility of force and how the pursuit of political ends is achieved through military means It draws upon and illustrates military thought through a wide ranging number of examples from the Napoleonic Wars to the current war in Afghanistan This book will be of great interest for students of military theory strategic studies security studies and defence studies **Power to the People** Audrey Kurth Cronin,2020 Never have so many possessed the means to be so lethal The diffusion of modern technology robotics cyber weapons 3 D printing autonomous systems and artificial intelligence to ordinary people has given them access to weapons of mass violence previously monopolized by the state In recent years states have attempted to stem the flow of such weapons to individuals and non state groups but their efforts are failing Based on hard lessons from previous waves of weapons technology such as dynamite and the assault rifle Power to the People explains what the future may hold and how we should respond Taming the Imperial Imagination Martin J. Bayly,2016-05-19 A new perspective on empire international relations and foreign policy through attention to British colonial knowledge on Afghanistan from 1808 to 1878
