A History of the Future Peter J. Bowler, 2017-11-02 A wide ranging survey of predictions about the future development and impact of science and technology through the twentieth century

Savage Perils Patrick B. Sharp, 2012-09-05 Revisiting the racial origins of the conflict between civilization and savagery in twentieth century America The atomic age brought the Bomb and spawned stories of nuclear apocalypse to remind us of impending doom As Patrick Sharp reveals those stories had their origins well before Hiroshima reaching back to Charles Darwin and America's frontier In Savage Perils Sharp examines the racial underpinnings of American culture from the early industrial age to the Cold War He explores the influence of Darwinism frontier nostalgia and literary modernism on the history and representations of nuclear weaponry Taking into account such factors as anthropological race theory and Asian immigration he charts the origins of a worldview that continues to shape our culture and politics Sharp dissects Darwin's arguments regarding the struggle between civilization and savagery theories that fueled future war stories ending in Anglo dominance in Britain and influenced Turnerian visions of the frontier in America Citing George W Bush's Axis of Evil Sharp argues that many Americans still believe in the racially charged opposition between civilization and savagery and consider the possibility of nonwhite savages gaining control of technology the biggest threat in the war on terror His insightful book shows us that this conflict is but the latest installment in an ongoing saga that has been at the heart of American identity from the beginning and that understanding it is essential if we are to eradicate racist mythologies from American life
