**War in Social Thought** Hans Joas, Wolfgang Knöbl, 2013 While focusing on social thought this book draws on many disciplines including philosophy anthropology and political science It demonstrates the profound difficulties social thinkers including liberals socialists and those intellectuals who could be regarded as the sociologists had in coming to terms with the phenomenon of war *The Blackwell Dictionary of Modern Social Thought* William Outhwaite, 2003-01-02 Modern social thought ranges widely from the social sciences to philosophy political theories and doctrines cultural ideas and movements and the influence of the natural sciences Provides an authoritative overview of the main themes of social thought Long essays and entries give full coverage to each topic Covers major currents of thought philosophical and cultural trends and the individual social sciences from anthropology to welfare economics New edition updates about 200 entries and includes new entries suggestions for further reading and a bibliography of all sources cited within the text **The Sociology of War and Violence** Siniša Malešević, 2010-06-10 War is a highly complex and dynamic form of social conflict This book demonstrates the importance of using sociological tools to understand the changing character of war and organised violence The author offers an original analysis of the historical and contemporary impact that coercion and warfare have on the transformation of social life and vice versa Although war and violence were decisive components in the formation of modernity most analyses tend to shy away from the sociological study of the gory origins of contemporary social life In contrast this book brings the study of organised violence to the fore by providing a wide ranging sociological analysis that links classical and contemporary theories with specific historical and geographical contexts Topics covered include violence before modernity warfare in the modern age nationalism and war war propaganda battlefield solidarity war and social stratification gender and organised violence and the new wars debate *German Cosmopolitan Social Thought and the Idea of the West* Austin Harrington, 2016-05-19 There has been considerable interest in recent years in German social thinkers of the Weimar era Generally this has focused on reactionary and nationalist figures such as Schmitt and Heidegger In this book Austin Harrington offers a broader account of the German intellectual legacy of the period He explores the ideas of a circle of left liberal cosmopolitan thinkers Troeltsch Scheler Tönnies Max Weber Alfred Weber Mannheim Jaspers Curtius and Simmel who responded to Germany's crisis by rejecting the popular appeal of nationalism Instead they promoted pan European reconciliation based on notions of a shared European heritage between East and West Harrington examines their concepts of nationhood religion and civilization in the context of their time and in their bearing on subsequent debates about European identity and the place of the modern West in global social change The result is a groundbreaking contribution to current questions in social cultural and historical theory **Literature Journals in the War of Resistance against Japanese Aggression in China (1931-1938)** Sunny Han Han, 2017-11-02 This book examines the development of Chinese literature journals and social ideologies from 1931 to 1938 combining first hand historical materials historical data and four important

literature journals to study the competition and cooperation between various powers such as the Kuomintang the CCP the Third Party and intellectuals This book describes the most influential Chinese literature journals and their political background during that period and explains the relations between disparate political and social powers helping to decipher Chinese intellectuals cultural positions during this time The author concludes with the provocative thesis that there was a progression in literature of the Nanjing Decade from an emphasis on class struggle to national salvation to a humanism that transcended these differences Arif Dirlik author of *Culture and History in Postrevolutionary China The Perspective of Global Modernity* The author looks into sources drawn from various camps and areas identifies ideological and affective contestations debates theoretical agendas and ponders the consequences of literature as a unique manifestation of wartime engagements Both historically informed and methodologically engaged Han s book is a most important source for anyone interested in the cultural and political dynamics of modern China in an extraordinary time David Der wei Wang Professor of Harvard University

**The Dialectic of the Holy** Robert E. Meditz, 2016-09-12 This is the first published book length treatment on Paul Tillich and Judaism which is a neglected aspect of Tillich s thought It has three compelling features First pivotal biographical details show the importance of Judaism for Tillich and that he ardently opposed anti-Semitism before WWII and after the Holocaust Second Tillich s theological method is examined in key primary sources to show how he maintains continuity between Judaism and Christianity The primary source analysis includes his 1910 and 1912 dissertations on Schelling the 1933 The Socialist Decision the 1952 Berlin lectures on the Jewish Question and his final public lecture on the importance of the history of religion for systematic theology Particular attention is paid to his dialectical and theological history of religion Third Tillich s positive theology of Judaism contrasts sharply with the many complex negative ways in which Judaism is portrayed in Western thought This contributes significantly to our understanding the evolving history of Christian anti Judaism
