Washington's Dark Secret John Maszka, 2018-10 As a scholar of terrorism John Maszka has examined how politics the media and the War on Terror play off one another His most startling claim is that the War on Terror is a war for natural resources and that terrorism has little to do with it Once the military became mechanized oil quickly became the most sought after commodity on the planet and the race for energy was eventually framed as a matter of national security Ironically Maszka argues the true threats to national security are the massive oil conglomerates themselves Maszka delves into the repercussions of a government that capitalizes on an us versus them mentality such as the demonizing of an entire religion sensationalizing radical violent attacks and loosely applying the word terrorism Because the United States current approach to terrorism has led to the politicization and abuse of the term Maszka suggests a need for a standardized definition of terrorism Currently too many acts of violence can be labeled terrorism resulting in state and nonstate actors labeling their enemies as terrorists yet claiming their own acts of violence as legitimate and retributive Maszka argues that much of the violence labeled as terrorism today is not terrorism at all In an

ambitious attempt to connect seemingly unrelated events in politics and the media Maszka offers an unflinching portrayal of the hypocrisy underlying our foreign policy *Chasing the Dark, Perspectives on Place, History and Alaska Native Land Claims, Shadowlands, Vol. 1, January 2009*, 2009 **Dark Territory** Fred Kaplan, 2016-03-01 An important disturbing and gripping history Kirkus Reviews starred review the never before told story of the computer scientists and the NSA Pentagon and White House policymakers who invent and employ cyber wars where every country can be a major power player and every hacker a mass destroyer In June 1983 President Reagan watched the movie War Games in which a teenager unwittingly hacks the Pentagon and asked his top general if the scenario was plausible The general said it was This set in motion the first presidential directive on computer security From the 1991 Gulf War to conflicts in Haiti Serbia Syria the former Soviet republics Iraq and Iran where cyber warfare played a significant role Dark Territory chronicles a little known past that shines an unsettling light on our future Fred Kaplan probes the inner corridors of the National Security Agency the beyond top secret cyber units in the Pentagon the information warfare squads of the military services and the national security debates in the White House to reveal the details of the officers policymakers scientists and spies who devised this new form of warfare and who have been planning and more often than people know fighting these wars for decades An eye opening history of our government's efforts to effectively manage our national security in the face of the largely open global communications network established by the World Wide Web Dark Territory is a page turner and consistently surprising The New York Times **Exploring Washington's Past** Ruth Kirk, Carmela Alexander, 1995 A traveler's guide to Washington state focusing on historical sites Sections on various regions describe local history with entries on towns and sites offering information on festivals museums and historic districts Contains b/w photos and a chronology c Book News Inc *A Shot in the Dark: A History of the U.S. Army Asymmetric Warfare Group* Paul J. Cook, 2024-05-14 This book presents the U S Army Asymmetric Warfare Group AWG as an example of successful change by the Army in wartime It argues that creating the AWG required senior leaders to create a vision differing from the Army's self conceptualization change bureaucratic processes to turn the vision into an actual unit and then place the new unit in the hands of uniquely qualified leaders to build and sustain it In doing this it considers the forces influencing change within the Army and argues the two most significant are its self conceptualization and institutional bureaucracy The work explores three major subject areas that provide historical context The first is the Army's institutional history from the early 1950s through 2001 This period begins with the Army seeking to validate its place in America's national security strategy and ends with the Army trying to chart a path into the post Cold War future The Army's history is largely one of asymmetric warfare The work thus examines several campaigns that offered lessons for subsequent wars Some lessons the Army took to heart others it ignored As the AWG was a direct outgrowth of the failures and frustrations the Army experienced in Afghanistan and Iraq the book examines these campaigns and identifies the specific problems that led senior Army leaders to create the AWG Finally the work chronicles the AWG's

creation in 2006 growth and re assignment from the Army staff to a fully fledged organization subordinate to the U S Army Training and Doctrine Command in 2011 to its deactivation This action resulted not from the unit s failure to adapt to a post insurgency Army focusing on modernization Rather it resulted from the Army failing to realize that while the AWG was a product of counterinsurgency it provided the capability to support the Army during a period of great strategic and institutional uncertainty

Dark Star Matthew H. Hersch,2023-12-26 A captivating history of NASA s Space Transportation System the space shuttle chronicling the inevitable failures of a doomed design In Dark Star Matthew Hersch challenges the existing narrative of the most significant human space program of the last 50 years NASA s space shuttle He begins with the origins of the space shuttle a century long effort to develop a low cost reusable rocket powered airplane to militarize and commercialize space travel which Hersch explains was built the wrong way at the wrong time and for all the wrong reasons Describing the unique circumstances that led to the space shuttle s creation by President Richard Nixon s administration in 1972 and its subsequent flights from 1981 through 2011 Hersch illustrates how the space shuttle was doomed from the start While most historians have accepted the view that the space shuttle s fatal accidents including the 1986 Challenger explosion resulted from deficiencies in NASA s management culture that lulled engineers into a false confidence in the craft Dark Star reveals the widespread understanding that the shuttle was predestined for failure as a technology demonstrator The vehicle was intended only to give the United States the appearance of a viable human spaceflight program until funds became available to eliminate its obvious flaws Hersch s work seeks to answer the perilous questions of technological choice that confront every generation and it is a critical read for anyone interested in how we can create a better world through the things we build

Dark Waters, Starry Skies Jeffrey Cox,2023-03-02 Esteemed Pacific War historian Jeffrey Cox has produced a fast paced and absorbing read of the crucial New Georgia phase of the Guadalcanal Solomons Campaign during the Pacific War Thousands of miles from friendly ports the US Navy had finally managed to complete the capture of Guadalcanal from the Japanese in early 1943 Now the Allies sought to keep the offensive momentum won at such a high cost Determined not to repeat their mistakes at Guadalcanal the Allies nonetheless faltered in their continuing efforts to roll back the Japanese land air and naval forces Dark Waters Starry Skies is an engrossing history which weaves together strategy and tactics with a blow by blow account of every battle at a vital point in the Pacific War that has not been analyzed in this level of detail before Using first hand accounts from both sides this book vividly recreates all the terror and drama of the nighttime naval battles during this phase of the Solomons campaign and the ferocious firestorm many Marines faced as they disembarked from their landing craft The reader is transported to the bridge to stand alongside Admiral Walden Ainsworth as he sails to stop another Japanese reinforcement convoy for New Georgia and vividly feels the fear of an 18 year old Marine as he fights for survival against a weakened but still determined enemy
