Way Fiction Based Fact:

Fiction as Research Practice Patricia Leavy, 2016-06-16 The turn to fiction as a social research practice is a natural extension of what many researchers and writers have long been doing Patricia Leavy a widely published qualitative researcher and a novelist explores the overlaps and intersections between these two ways of understanding and describing human experience She demonstrates the validity of literary experimentation to the qualitative researcher and how to incorporate these practices into research projects Five short stories and excerpts from novellas and novels show these methods in action This book is an essential methodological introduction for those interested in studying or practicing arts based research

Fact in Fiction Joan Rockwell, 2023-07-14 First published in 1974 *Fact in Fiction* states that literature does not reflect or arise from society but is as much a functioning part of it as any social structure institution or set of norms The author shows that however fantastic the content of fiction it is a representation of social fact not the mere random issue of private fantasy Because of this there is a regular and discernible pattern in which literature is related to other strands in the social web which makes it possible to read back from fiction to other social fact An explanation is put forward for the normative power of fiction from its origins in the apparent human necessity to communicate abstract concepts in terms of narrative accounts of human action This book will be of interest to students of literature sociology and history

Kristeva's Fiction Benigno Trigo, 2013-09-17 With published work spanning more than forty years Julia Kristeva's influence in psychoanalysis and literary theory is difficult to overstate In addition to this scholarship Kristeva has written several novels however this portion of her oeuvre has received comparatively scant attention In this book Kristeva scholars from a number of disciplines analyze her novels in relation to her work in psychoanalysis interrogating the relationships between fiction and theory The essays explore questions including what is the value of experimental writing that escapes easy definition and classification putting ideas at the same level as character pacing plot suspense form and style And how might such fiction help its readers overcome the psychological maladies that affect contemporary society The contributors make a compelling case for understanding Kristeva's fiction as a crucial influence to her wider psychoanalytic project
