s name is revered in the world of photography and practically synonymous with the labor reforms of the Progressive Era His
body of work much of it a century old or more remains vital as both aesthetic statement and social document Drawing on a
range of sources including information from surviving family members this first full length illustrated biography presents a
detailed and personal portrait of the sociologist and photographer whose haunting images of children at work in cotton mills
and coal mines sparked the movement to end child labor culminating with the Fair Labor Standards Act of 1938 There are 62
of his penetrating photographs included **Portraits of Conflict** Ben H. Severance,2012-11-01 Tenth volume of acclaimed
series **Dictionary of Energy** Cutler J. Cleveland,2006-01-01 With definitions compiled by researchers and experts in the

Books,1969 **The Realisms of Berenice Abbott** Terri Weissman,2011-01-10 The Realisms of Berenice Abbott provides
the first in depth consideration of the work of photographer Berenice Abbott Though best known for her 1930s documentary
images of New York City this book examines a broad range of Abbott s work including portraits from the 1920s little known
and uncompleted projects from the 1930s and experimental science photography from the 1950s It argues that Abbott
consistently relied on realism as the theoretical armature for her work even as her understanding of that term changed over
time and in relation to specific historical circumstances But as Weissman demonstrates Abbott s unflinching commitment to
realist aesthetics led her to develop a critical theory of documentary that recognizes the complexity of representation without
excluding or obscuring a connection between art and engagement in the political public sphere In telling Abbott s story The
Realisms of Berenice Abbott reveals insights into the politics and social context of documentary production and presents a
thoughtful analysis of why documentary remains a compelling artistic strategy today Franklin D. Roosevelt Lorena
Huddle,2016-07-15 During Franklin D Roosevelt s twelve years as U S president most people loved him but many thought he
was destroying the country and their way of life Roosevelt became president in 1933 in the midst of a global business
depression Millions of people had no work or money He created jobs and helped those who needed help but to accomplish
this he had to change the government s part in national life He ably led America during World War II and played the principal
part in starting the United Nations Some of his methods may be questioned but his goals were admirable *Monumental*
Designs Ted Atkinson,2025-09-23 Established by Congress as part of the New Deal the Tennessee Valley Authority TVA
designated parts of seven southern states for economic rehabilitation through various means including flood control rural
electrification and social programs The goal was to deploy federal resources to reshape the region through infrastructure
mainly a network of hydroelectric dams To garner political and public support TVA officials mobilized artists Soon state

sponsored cultural productions emerged resulting in a body of work comprising an array of mediums The TVA swayed public opinion and generated positive reviews at the outset because of the vital role that culture played in making public meaning particularly regarding the near total transformation of the Tennessee Valley through infrastructural development as part of a larger ideological and economic investment in public works While the content was geared toward promoting the TVA agenda aesthetic innovations had a lasting impact influencing subsequent generations of artists who portrayed the TVA enterprise with complexity nuance and depth At a time when the country is grappling with issues surrounding climate change fossil fuels consumption and strip mining the TVA now struggles to balance its reputation for prosperity and development with public suspicion and skepticism In *Monumental Designs Infrastructure and the Culture of the Tennessee Valley Authority* author Ted Atkinson presents a cultural history of the TVA that examines representations of the agency in selected works from the New Deal era to the present With chapters organized according to medium photography and photobooks documentary films New Deal theater fiction film and novels *Monumental Designs* seeks to illuminate the entwined forms of infrastructural development and cultural production that have made the TVA a source of multivalent power and influence This examination of cultural history intends to foster critical thinking about how public works can come to be regarded as monumental expressions of national purpose and modern engines of progress defined in terms of perpetual growth and development

Melungeon Portraits Tamara L. Stachowicz, 2018-04-12 At a time when concepts of racial and ethnic identity increasingly define how we see ourselves and others the ancestry of Melungeons a Central Appalachian multiracial group believed to be of Native American African and European origins remains controversial Who is Melungeon how do we know and what does that mean In a series of interviews with individuals who claim Melungeon heritage the author finds common threads that point to shared history appearance and values and explores how we decide who we are and what kind of proof we need
