**Christian G. Meyer**

## **The Tobacco Challenge The Tobacco Challenge:**

The Tobacco Challenge Professor Geraint Howells, 2013-02-28 Addressing three central questions of legal policy this is an interesting and comprehensive analysis of the need to control and regulate tobacco consumption The core issues of the book are litigation vs regulation with a comparative analysis of the US and European approaches the challenge to regulate tobacco as a lawful product within constitutional limits to promote the reduction of risks to health and the extent to which consumers should be entrusted with information to make their own informed choices Suggesting dialogue and transparency in policy development this book covers advertising psychology ethics economics and health in addition to the central debate about the litigation and regulation of tobacco and the role of consumer protection law and private law The Tobacco Challenge

Geraint G. Howells, 2011 The book provides a comprehensive comparison between US and European approaches to tobacco law covering advertising psychology ethics economics and health in addition to the central debate about the litigation and regulation of tobacco It identifies the need for control and the many challenges this presents such as how to work within constitutional limits to promote the reduction of risks to health and the extent to which consumers should be entrusted with information to make their own informed choices **Tobacco industry accountability - current practices, emerging**

**issues and challenges** Sonu Goel, Amit Yadav, Anna Kontsevaya, 2023-09-07 **The Tobacco Challenge - Legal and Consumer Protection by Geraint Howells (Book Review).** Alberto Alemanno, 2013 Due to its emotive nature the debate about smoking has always been and still is a topic that is capable of polarizing opinions including those of legal scholars As a result the relevant literature whether legal or scientific tends to be inherently biased either against or in favour of tobacco products The Tobacco Challenge by Professor Geraint Howells one of the leading experts in European Consumer Law provides a welcome and notable exception to this trend This book offers a balanced account of the legal moral and public health challenges facing governmental efforts aimed at curbing tobacco consumption Yet its merits go well beyond that of offering an objective examination and reconstruction of such a complex area of law and policy Howells s analysis is also refreshing innovative and brave enough to challenge some of the main tenets of the health community s dominant thinking Although repetitive at times this book deserves praise for revamping the moribund legal debate on tobacco regulation in Europe and beyond Indeed as the tobacco control discourse has been hijacked by the imperative of de normalization i e to change the broad social norms around using tobacco the opportunities for the legal system to pause question and contribute to actual tobacco control efforts have been significantly reduced in recent times *New Horizons in Health-Promoting Technologies: From Development to Rational Use* Luciane Cruz Lopes, Cristiane De Cássia Bergamaschi, Silvio Barberato-Filho, Marcus Tolentino Silva, Brian Godman, 2020-10-08 This eBook is a collection of articles from a Frontiers Research Topic Frontiers Research Topics are very popular trademarks of the Frontiers Journals Series they are collections of at least ten articles all centered on a particular subject With their unique mix of varied contributions from Original
