Religion on Trial Craig A. Parton, 2008-07-28 In a concise and devastating style Craig Parton an experienced trial lawyer versed in the laws of legal evidence argues that religions uniformly fail the simplest tests of admissibility for their respective claims Few religions even bother to make testable assertions relying instead at best on subjective and existential appeals The stunningly few historical and thus verifiable claims of a precious few religions can be swiftly sorted out and the result is an astounding vindication of the central nonhearsay claims of the first century eyewitnesses to the life and work of Jesus Christ This work challenges the prevailing viewpoint that all religions are making the same or even similar allegations More troubling than this prevailing view is that the religions of the world remain diametrically opposed on the issues of the nature of humanity the reality of evil the nature of history and the way of salvation Sorting out the clashing claims of religions is the task of this book and a trial lawyer well schooled in the laws of admissible evidence brings insight and clarity to matters normally thought to be solely in the domain of philosophers and theologians

and the near abroad in context with US foreign policy *For the Glory of God* Richard H. Jones, 2012-06-07 For the Glory of God addresses key questions regarding the connection between religion and science Richard H Jones investigates whether ideas from the Bible and Christian theology have played a significant role in the development of modern scientific theories If so has the role always been positive or negative In this regard does religion have the epistemic right to control science or to offer an alternative Christian science to mainstream science Is creationism or intelligent design a science on the same footing with neo Darwinism Is the integrity of science today in danger of religious control In this volume Jones provides an illuminating history of the role of Christian ideas in the physical and biological sciences from the Middle Ages to today He reveals the failure of the popular war and harmony models for the relation of religion and science and shows that a control model does work to explain the complex history of religion and science **The Binding of Isaac, Religious Murders & Kabbalah** Lippman Bodoff, 2005 In a series of evocative groundbreaking articles the author analyzes the Biblical and Rabbinic basis for what surely are now some of the most hotly debated topics in Jewish religious thought today These include how the traditional interpretation of the Binding of Isaac has been misapplied in both Christian theology and Jewish martyrology and how the centuries long and newly resurgent belief in mysticism and messianism in kabbalah and Hasidism has distorted classical Judaism and thwarted its national and cultural development The author counters the arguments of those who see Judaism s and the world s newfound obsession with mysticism and kabbalah as a natural outgrowth of a progressive trend within rabbinic Judaism and warns of the impending danger of rejecting the very core of Jewish thought and opinion as it was expounded in the Torah and classical Jewish tradition the Oral Law Each section of this magnificent work will give the reader new insights into how different aspects of Judaism have evolved and why they have often been in contention with each other Nor is he afraid to deal with some of the supercharged issues within Judaism such as what are the underlying premises of Jewry s claim to the Divinely Promised Land And has this claim been affected by its failure to pursue an active program of nationalism These highly acclaimed articles have been gleaned from today s leading Jewish journals and have stood the test of time They contain valuable source material and are a ready reference to the many historical and religious topics that are the focus of discussion across all main Jewish denominations **Dissent** Ralph Young, 2017-11-07 Examines the key role dissent has played in shaping the United States focusing on those who from colonial times to the present dissented against the ruling paradigm of their time responding to what they saw as the injustices that prevented them from fully experiencing their vision of America Publisher s description *Strickberger's Evolution* Brian Hall, Benedikt Hallgrímsson, 2008 Thoroughly updated and reorganized Strickberger s Evolution Fourth Edition presents biology students with a basic introduction to prevailing knowledge and ideas about evolution discussing how why and where the world and its organisms changed throughout history Keeping consistent with Strickberger s engaging writing style the authors carefully unfold a broad range of philosophical and historical topics that frame the theories of today including cosmological and

God vs. Darwin Mano Singham, 2009-11-16 In God vs Darwin Mano Singham dissects the legal battle between evolution and creationism in the classroom beginning with the Scopes Monkey trial in 1925 and ending with an intelligent design trial in Dover Pennsylvania in 2005 A publicity stunt the Scopes Monkey trial had less to do with legal precedence than with generating tourism dollars for a rural Tennessee town But the trial did successfully spark a debate that has lasted more than 80 years and simply will not be quelled despite a succession of seemingly definitive court decisions In the greatest demonstration of survival opposition to the teaching of evolution has itself evolved Attempts to completely eliminate the teaching of evolution from public schools have given way to the recognition that evolution is here to stay that explicitly religious ideas will never be allowed in public schools and that the best that can be hoped for is to chip away at the credibility of the theory of evolution Dr Singham deftly answers complex questions Why is there such intense antagonism to the teaching of evolution in the United States What have the courts said about the various attempts to oppose it Sprinkled with interesting tidbits about Charles Darwin and the major players of the evolution vs creationism debate God vs Darwin is charming in its embrace of the strong passions aroused from the topic of teaching evolution in schools

What is Darwinism? Charles Hodge, 2022-05-28 In What is Darwinism Charles Hodge embarks on a critical examination of the theories posited by Charles Darwin delving into the implications of natural selection on the fabric of faith and scientific understanding Hodge's prose reflects the intellectual fervor of the late 19th century intertwining clear accessible language with rigorous philosophical inquiry He situates Darwinism within the broader context of natural theology addressing its intersection with issues of religious belief and moral philosophy and poses essential questions about the nature of existence and divinity amidst the scientific paradigm shift of his time Charles Hodge a prominent theologian and a key figure in Princeton's theological seminary was acutely aware of the rift growing between science and religion during the Victorian era

His commitment to Reformed theology and his scholarly background in both ancient texts and contemporary science informed his critiques against Darwinian principles Hodge's aim was not merely to refute Darwinism but to provide a framework for understanding the relationship between faith and scientific discovery This book is highly recommended for readers interested in the historical tension between theology and evolutionary biology as well as for those who seek to contemplate the foundational questions of existence and God's role in creation Hodge's thoughtful analysis offers timeless insights into the ongoing dialogue between science and religion *Darwin's God* Cornelius G. Hunter, 2019-10-01 Cornelius Hunter brilliantly supports his thesis that Darwinism is a mixture of metaphysical dogma and biased scientific observation that at its core evolution is about God not science Phillip E Johnson author *Darwin on Trial* Biophysicist Cornelius Hunter argues perceptively that the main supporting pole of the Darwinian tent has always been a theological assertion God wouldn't have done it that way Rather than demonstrating that evolution is capable of the wonders they attribute to it Darwinists rely on a man-made version of God to argue that He never would have made life with the particular suite of features we observe In lucid and engaging prose Hunter shines a light on Darwinian theology making plain what is too often obscured by technical jargon Michael J Behe Lehigh University This wonderfully insightful book will prove pivotal in the current reassessment of Darwinian evolution Darwinists argue that evolution has to be true because no self-respecting deity would have created life the way we find it Hunter unmask this theological mode of argumentation and argues convincingly that it is not merely incidental but indeed essential to how Darwinists justify evolution William A Dembski Baylor University A fascinating study of a much overlooked aspect of the origins controversy Stephen C Meyer Whitworth College **The Menace of Darwinism** William Jennings Bryan, 1922 **Darwin's Religious Odyssey** William E. Phipps, 2002-09-01 Draws on newly available material to consider Darwin's personal religious beliefs profiling him as a man from a specific time in history struggling to harmonize his spiritual worldviews with his scientific findings Original **Darwin's Proof** Cornelius G. Hunter, 2003 Following the success of *Darwin's God* Hunter confronts Darwin's theory of evolution head-on revealing its scientific philosophical and theological failures **Darwin on Trial** Phillip E. Johnson, 2010-10-05 In this edition of Phillip Johnson's classic book he responds to critics of the first edition and maintains that scientists have put the cart before the horse when it comes to evolution regarding as scientific fact what really should be regarded as a yet unproved hypothesis Also included is a new introduction by noted biologist Michael Behe Summer for the Gods Edward J Larson, 2008-07-31 The Pulitzer Prize winning history of the Scopes Trial and the battle over evolution and creation in America's schools In the summer of 1925 the sleepy hamlet of Dayton Tennessee became the setting for one of the twentieth century's most contentious courtroom dramas pitting William Jennings Bryan and the anti-Darwinists against a teacher named John Scopes represented by Clarence Darrow and the ACLU in a famous debate over science religion and their place in public education That trial marked the start of a battle that continues to this day in cities and states throughout the country Edward Larson's

classic Summer for the Gods winner of the Pulitzer Prize in History is the single most authoritative account of this pivotal event An afterword assesses the state of the battle between creationism and evolution and points the way to how it might potentially be resolved **Finding Darwin's God** Kenneth R. Miller, 2008-03 Can evolution God coexist With powerful logic evidence Miller a cell biologist prof of biology develops an affirmative answer In this book he presents an artfully constructed argument against both those who deny evolution those using science to justify a materialist worldview Yet this is a book for all readers Miller has a gift for expressing profound ideas in clear graceful prose In a very personal direct way he takes issue with those scientists who claim that modern science has disproven the existence of God He convincingly argues that science religion offer different but compatible ways of viewing the world An original affective treatise that offers new paths toward reconciling science with the faith of the Abrahamic tradition
