Masterson, 2014-10-07 A fascinating and shocking historical exposé The Malaria Project is the story of America's secret mission to combat malaria during World War II a campaign modeled after a German project which tested experimental drugs on men gone mad from syphilis American war planners foreseeing the tactical need for a malaria drug recreated the German model then grew it tenfold Quickly becoming the biggest and most important medical initiative of the war the project tasked dozens of the country's top research scientists and university labs to find a treatment to remedy half a million U S troops incapacitated by malaria Spearheading the new U S effort was Dr Lowell T Coggeshall the son of a poor Indiana farmer whose persistent drive and curiosity led him to become one of the most innovative thinkers in solving the malaria problem He recruited private corporations such as today's Squibb and Eli Lilly and the nation's best chemists out of Harvard and Johns Hopkins to make novel compounds that skilled technicians tested on birds Giants in the field of clinical research including the future NIH director James Shannon then tested the drugs on mental health patients and convicted criminals including infamous murderer Nathan Leopold By 1943 a dozen strains of malaria brought home in the veins of sick soldiers were injected into these human guinea pigs for drug studies After hundreds of trials and many deaths they found their magic bullet but not in a U S laboratory America's best
