Davies, Luke Glanville, 2010-06-14 This edited collection has sought contributions from some of the foremost scholars of refugee and Internally Displaced Persons IDP studies to engage with the conceptual and practical difficulties entailed in realising how the Responsibility to Protect R2P can be fulfilled by states and the international community to protect vulnerable persons Contributors to this book were given one theme to consider based on their experience and knowledge how R2P may be aligned with the protection of the displaced Contributions explore the history and progress so far in aligning R2P with refugee and IDP protection as well as examining the conceptual and practical issues that arise when attempting to expand R2P from words into deeds **Human Rights in International Relations** David P. Forsythe, 2006-05-01 This new edition of David Forsythe s successful textbook provides an authoritative overview of the place of human rights in international politics in an age of terrorism The book focuses on four central themes the resilience of human rights norms the importance of soft law the key role of non governmental organizations and the changing nature of state sovereignty Human rights standards are examined according to global regional and national levels of analysis with a separate chapter dedicated to transnational corporations This second edition has been updated to reflect recent events notably the creation of the ICC and events in Iraq and Guantanamo Bay and new sections have been added on subjects such as the correlation between world conditions and the fate of universal human rights Containing chapter by chapter guides to further reading and discussion questions this book will be of interest to undergraduate and graduate students of human

Humanitarian Business Thomas G. Weiss, 2013-04-24 With some 50 million people living under duress and threatened by wars and disasters in 2012 the demand for relief worldwide has reached unprecedented levels Humanitarianism is now a multi billion dollar enterprise and aid agencies are obliged to respond to a range of economic forces in order to stay in business In his customarily hard hitting analysis Thomas G Weiss offers penetrating insights into the complexities and challenges of the contemporary humanitarian marketplace In addition to changing political and military conditions that generate demand for aid private suppliers have changed too Today's political economy places aid agencies side by side with for profit businesses including private military and security companies in a marketplace that also is linked to global trade networks in illicit arms natural resources and drugs This witch's brew is simmering in the cauldron of wars that are often protracted and always costly to civilians who are the very targets of violence While belligerents put a price tag on access to victims aid agencies pursue branding in a competition for scarce resources relative to the staggering needs As marketization encroaches on traditional humanitarianism it seems everything may have a price from access and principles to moral authority and lives

What's Wrong with the United Nations and How to Fix it Thomas G. Weiss, 2013-05-20 Six decades after its establishment the United Nations and its system of related agencies and programs are perpetually in crisis While the twentieth century's world wars gave rise to ground breaking efforts at international organization in 1919 and 1945 today's UN is ill equipped to deal with contemporary challenges to world order Neither the end of the Cold War nor the aftermath of 9/11 has led to the next generation of multilateral institutions But what exactly is wrong with the UN and how can we fix it Is it possible to retrofit the world body In his succinct and hard hitting analysis Thomas G Weiss takes a diagnose and cure approach to the world organization's inherent difficulties In the first half of the book he considers the problems of international leadership and decision making in a world of self interested states the diplomatic difficulties caused by the artificial divisions between the industrialized North and the global South the structural problems of managing the UN's many overlapping jurisdictions agencies and bodies and the challenges of bureaucracy and leadership The second half shows how to mitigate these maladies and points the way to a world in which the UN's institutional ills might be cured His remedies are not based on pious hopes of a miracle cure for the UN but rather on specific and encouraging examples that could be replicated With considered optimism and in contrast to received wisdom Weiss contends that substantial change in intergovernmental institutions is plausible and possible The new and expanded second edition of this well regarded and indispensable book will continue to spark debate amongst students scholars and policymakers concerned with international politics as well as anyone genuinely interested in the future of the United Nations and multilateral cooperation

Concept of Climate Migration Benoît Mayer, 2016-11-25 This timely book offers a unique interdisciplinary inquiry into the prospects of different political narratives on climate migration. It identifies the essential angles on climate migration: the humanitarian narrative, the migration narrative, and the climate change narrative, and assesses their prospects. The author contends that although such arguments will influence global governance, they will not necessarily achieve what advocates hope for. He discusses how the weaknesses of the concept of climate migration are likely to be utilized in favour of repressive policies against migration or for the defence of industrial nations against perceived threats from the Third World.

Bosnia Remade Gerard Toal, Carl T. Dahlman, 2011-02-16 *Bosnia Remade* is an authoritative account of ethnic cleansing and its partial undoing from the onset of the 1990s Bosnian wars up through the present. Gerard Toal and Carl Dahlman combine a bird's-eye view of the entire war from onset to aftermath with a micro-level account of three towns that underwent ethnic cleansing and later the return of refugees. There have been two major attempts to remake the ethnic geography of Bosnia since 1991. In the first instance, ascendant ethno-nationalist forces tried to eradicate the mixed ethnic geographies of Bosnia's towns, villages, and communities. These forces devastated tens of thousands of homes and lives but they failed to destroy Bosnia Herzegovina as a polity. In the second attempt, which followed the war, the international community in league with Bosnian officials endeavored to reverse the demographic and other consequences of this ethnic cleansing. While progress has been uneven, this latter effort has transformed the ethnic demography of Bosnia and moved the nation beyond its recent segregationist past. By showing how ethnic cleansing was challenged, *Bosnia Remade* offers more than just a comprehensive narrative of Europe's worst political crisis of the past two decades. It also offers lessons for addressing an enduring global problem.
