How to Build a Boat Jonathan Gornall, 2019-05-07 Part ode to building something with one's hands in the modern age part celebration of the beauty and function of boats and part moving father daughter story *How to Build a Boat* is a bold adventure Once an essential skill the ability to build a clinker boat first innovated by the Vikings can seem incomprehensible today Yet it was the clinker with its overlapping planks that afforded us access to the oceans and its construction has become a lost art that calls to the do it yourselfer in all of us John Gornall heard the call A thoroughly unskilled modern man Gornall

set out to build a traditional wooden boat as a gift for his newborn daughter It was he recognized a ridiculously quixotic challenge for a man who knew little about woodworking and even less about boat building He wasn't even sure what type of wood he should use the tools he'd need or where on earth he'd build the boat He had much to consider and even more to learn But undaunted he embarked on a voyage of rediscovery determined to navigate his way back to a time when we could fashion our future and leave our mark on history using only time honored skills and the materials at hand His journey began in East Anglia on England's rocky eastern coast If all went according to plan it would end with a great adventure as father and daughter cast off together for a voyage of discovery that neither would forget and both would treasure until the end of their days How to Build a Boat celebrates the art of boat building the simple pleasures of working with your hands and the aspirations and glory of new fatherhood John Gornall tells the inspiring story of how even the least skilled of us can make something wonderful if we invest enough time and love The Daily Mail and taps into the allure of an ancient craft interpreting it in a modern way as tribute to the generations yet to come Both the book and place are magical The Sunday Telegraph

Master Manipulator James Ottar Grundvig,2016-05-31 The explosive true story of fraud embezzlement and government betrayal In 2000 the US Centers for Disease Control CDC carried out a secret mission to bury skew and manipulate data in six vaccine safety studies in a coordinated effort to control the message that vaccines do not cause autism They did so via secret meetings and backtesting health care data The CDC invested tens of millions of dollars in a foreign health care data analytics startup run by Danish scientist Poul Thorsen a move to ensure that no link ever surfaced But fate had other ideas The agency soon learned it couldn't control Thorsen In 2011 the US Justice Department indicted him for the theft of more than 1 million of CDC grant money Master Manipulator exposes the CDC's hidden agenda for the cover up Influenced by Big Pharma money future high paying jobs and political lobbyists CDC executives charted a course different than what the findings of earlier vaccine safety studies revealed The CDC needed an outsider to flatten the results of the data while building an exit strategy a fall guy in case the secret plan was exposed Thorsen fit the bill nicely conducting studies overseas But the CDC's plan backfired as Thorsen took the money to the bank and the power went to his head It would take years for his fraud scheme funneling CDC grant money to a Danish university and then back to a CDC bank account he controlled to play out Master Manipulator is a true story of fraud and betrayal and an insider's view of what takes place behind the closed doors of agencies and drug companies and with the people tasked to protect the health of American children It's a cautionary tale of the dangers of blind trust in the government and the health care industry
