Wat Is Omabetreffende Rem Koolhaas:

Oswald Mathias Ungers and Rem Koolhaas Lara Schrijver, 2021-10-07 Lara Schrijver examines the work of Oswald Mathias Ungers and Rem Koolhaas as intellectual legacy of the 1970s for architecture today Particularly in the United States this period focused on the autonomy of architecture as a correction to the social orientation of the 1960s Yet these two architects pioneered a more situated autonomy initiating an intellectual discourse on architecture that was inherently design based Their work provides room for interpreting social conditions and disciplinary formal developments thus constructing a plausible relationship between the two that allows the life within to flourish and adapt In doing so they provide a foundation for recalibrating architecture today

Wat is OMA Véronique Patteeuw, 2006 Vanuit verschillende disciplines buiten het vakgebied van de architectuur worden de positie en de betekenis belicht die de internationaal vermaarde Nederlandse architect en zijn bureau in de architectuur inneemt

Rotterdam herzien Wijnand Galema, Piet Vollaard, 2007 Is Rotterdam nog steeds de architectuurstad van Nederland Deze vraag staat centraal in deze uitgave Geïnspireerd door het Keurmeesterproject uit 1977 zijn drie internationale architectuurcritici gevraagd hun oordeel te geven over de hedendaagse Rotterdamse architectuur Deze publicatie is een weerslag van Reviewing Rotterdam een programma onderdeel van Rotterdam 2007 City of Architecture

Annales de l'architecture en Flandre, 2006

The Urban Design Reader Michael Larice, Elizabeth Macdonald, 2013-05-07 The second edition of The Urban Design Reader draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design Nearly 50 generous selections include seminal contributions from Howard Le Corbusier Lynch and Jacobs to more recent writings by Waldheim Koolhaas and Sorkin Following the widespread success of the first edition of The Urban Design Reader this updated edition continues to provide the most important historical material of the urban design field but also introduces new topics and selections that address the myriad challenges facing designers today The six part structure of the second edition guides the reader through the history theory and practice of urban design The reader is initially introduced to those classic writings that provide the historical precedents for city making into the twentieth century Part Two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid 1990s These authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places These selections are largely describing the outcomes of mid century urban design and voicing concerns over the placeless quality of contemporary urbanism The fourth part of the Reader explores key issues in urban design and development Ideas about sprawl density community health public space and everyday life are the primary focus here Several new selections in this part of the book also highlight important international development trends in the Middle East and China Part Five presents environmental challenges faced by the built environment professions today

including recent material on landscape urbanism sustainability and urban resiliency The final part examines professional practice and current debates in the field where urban designers work what they do their roles their fields of knowledge and their educational development The section concludes with several position pieces and debates on the future of urban design practice This book provides an essential resource for students and practitioners of urban design drawing together important but widely dispersed writings Part and section introductions are provided to assist readers in understanding the context of the material summary messages impacts of the writing and how they fit into the larger picture of the urban design field

Landscape as Urbanism Charles Waldheim, 2022-03-15 A definitive intellectual history of landscape urbanism It has become conventional to think of urbanism and landscape as opposing one another or to think of landscape as merely providing temporary relief from urban life as shaped by buildings and infrastructure But driven in part by environmental concerns landscape has recently emerged as a model and medium for the city with some theorists arguing that landscape architects are the urbanists of our age In *Landscape as Urbanism* one of the field's pioneers presents a powerful case for rethinking the city through landscape Charles Waldheim traces the roots of landscape as a form of urbanism from its origins in the Renaissance through the twentieth century Growing out of progressive architectural culture and populist environmentalism the concept was further informed by the nineteenth century invention of landscape architecture as a new art charged with reconciling the design of the industrial city with its ecological and social conditions In the late twentieth and early twenty first centuries as urban planning shifted from design to social science and as urban design committed to neotraditional models of town planning landscape urbanism emerged to fill a void at the heart of the contemporary urban project Generously illustrated *Landscape as Urbanism* examines works from around the world by designers ranging from Ludwig Hilberseimer Andrea Branzi and Frank Lloyd Wright to James Corner Adriaan Geuze and Michael Van Valkenburgh The result is the definitive account of an emerging field that is likely to influence the design of cities for decades to come

We Can Change the Weather Marleen Wynants, 2010 Offers one hundred innovative initiatives from scientific researchers architects artists and entrepreneurs from around the world that offer solutions to the environmental problems facing planet Earth

Dense + Green Thomas Schröpfer, 2015-12-14 The integration of nature in

architecture is a key concern of sustainability. However, all too often sustainable design is reduced to improving the energetic performance of buildings and the ornamental application of natural green. Dense Green explores new architectural typologies that emerge from the integration of green components such as sky terraces, vertical parks and green facades in high density buildings. The book describes green strategies in a comparison across different design tasks and climate conditions. In depth case studies on the most relevant building types consistently presented with analytical drawings made exclusively for this book are complemented by expert essays that demonstrate the current paradigm shift in the sustainable urban environment. From the Contents: Dense Green Building Types by Thomas Schröfer, architect, Singapore University of Technology and Design; Dense Green Building Technology by Atelier Ten, environmental design consultants and building services engineers, New York, NY; Dense Green Landscape Design by Herbert Dreiseitl, landscape architect, Atelier Dreiseitl, Raimund Liveable Cities Lab, Berlin; Singapore, Portland, OR; Dense Green Botanical Design by Jean Yong, plant ecophysiologicalist, Singapore University of Technology and Design; Dense Green Urbanism by Kees Christiaanse, urban planner, ETH Zurich. 25 in depth case studies from Europe, Asia and the USA. Practice Reports by Foster Partners, WOHA, Ken Yeang, MVRDV and others.

Recovering Landscape James Corner, 1999-08. The past decade has been witness to a remarkable resurgence of interest in landscape. While this recovery invokes a return of past traditions and ideas, it also implies renewal, invention and transformation. Recovering Landscape collects a number of essays that discuss why landscape is gaining increased attention today and what new possibilities might emerge from this situation. Themes such as reclamation, urbanism, infrastructure, geometry, representation and temporality are explored in discussions drawn from recent developments not only in the United States but also in the Netherlands, France, India and Southeast Asia. The contributors to this collection are all leading figures in the field of landscape architecture: Alan Balfour, Denis Cosgrove, Georges Descombes, Christophe Girot, Steen Hoyer, David Leatherbarrow, Bart Lootsma, Sébastien Marot, Anuradha Mathur, Marc Treib and Alex Wall.
