Water Management: A View from Multidisciplinary Perspectives

8th International Conference on Water
and Flood Management

Water Management In Islam

Stephen McIlwaine, Mark Redwood

Water Management In Islam:

Water Management in Islam International Development Research Centre (Canada),2001 Water Management In Islam

Water Management in Islam Naser I. Faruqui,Asit K. Biswas,Murad J. Bino,2001 This book presents Islamic perspectives on a number of proposed water management policies including water demand management wastewater reuse and higher tariffs The book opens avenues for a wider dialogue amongst researchers working at identifying the most promising water management policies adds to our knowledge of some of the influences on formal policy and informal practice and makes these ideals available to a broader public

Greywater Use in the Middle East Stephen McIlwaine,Mark Redwood,2010

In water scarce areas of the Middle East greywater household wastewater excluding toilet waste is commonly used by poor communities to irrigate home gardens This both supplements the water available to the household and improves food security This book draws together material presented at a conference in Jordan in 2007 and examines the technical approaches to treating and using greywater for irrigation including its associated risks to health and the environment It discusses many of the non technical issues that influence effectiveness and sustainability of greywater use It also takes a hard look at economic issues arguing that more clarity and consistency from policymakers is essential if low income water stressed communities are to make better and safer use of their existing water supplies The book concludes by offering suggestions for where donor efforts and research could best be focused in the near future Greywater use in the Middle East is important reading for researchers donors implementing agencies and policymakers in the fields of water supply water reuse livelihoods and agriculture

Islamic Operations Management Rafikul Islam,Suhaiza Zailani,Selim Ahmed,2024-04-16 Managing operations is an integral part of all business and comprises a number of components including quality management production planning supply chain management logistics and inventory control The effective management of operations plays a defining role in enhancing business efficiency and is a lynchpin for success This book explores how Islamic principles and tools can be applied to improve operations management across industries While Islamic banking and finance are established disciplines there is yet little evidence of how exploring operations management from an Islamic lens can improve efficiency Bringing together leading scholars across subdisciplines the Editors fill the long standing gap and address the rising demand for halal products and services by providing a unique perspective to define and enhance an important growing field This book will be a useful reference for those who wish to understand all aspects of Islamic business operations and halal logistics The book will be helpful to academics researchers and upper level students in particular to those who are looking to further their research on how Islamic principles can be applied to business operations

Handbook of Water Resources Management: Discourses, Concepts and Examples Janos J. Bogardi,Joyeeta Gupta,K. D. Wasantha Nandalal,Léna Salamé,Ronald R.P. van Nooijen,Navneet Kumar,Tawatchai Tingsanchali,Anik Bhaduri,Alla G. Kolechkina,2021-06-12 This book provides an overview of facts theories and methods from hydrology geology geophysics law ethics economics ecology

engineering sociology diplomacy and many other disciplines with relevance for concepts and practice of water resources management. It provides comprehensive but also critical reading material for all communities involved in the ongoing water discourses and debates. The book refers to case studies in the form of boxes, sections or as entire chapters. They illustrate success stories but also lessons to be remembered to avoid repeating the same mistakes. Based on consolidated state-of-the-art knowledge, it has been conceived and written to attract a multidisciplinary audience. The aim of this handbook is to facilitate understanding between the participants of the international water discourse and multi-level decision-making processes. Knowing more about water but also about concepts, methods and aspirations of different professional disciplinary communities and stakeholders professionalizes the debate and enhances the decision-making. *Book Review* Syed Alamdar Ali Shah, 2019. The objective of this manuscript is to present a book review of *Water Management in Islam* published by United Nations University Press International Development Research Centre. The book was published in the year 2001 when shariah compliance perspective was in its infancy. However, with the rapid growth of shariah compliance in almost every sector of the economy, it is very important to review the recommendations of leading scholars in the area of water management as well. The book is the product of findings from a workshop on water management in the Islamic world held in Jordan, 1998, with the focus to contribute to local and international policies that improve quality and accessibility of water in the MENA region. The contributions are towards water demand management, fair water reuse and fair pricing of water. Most valuable contribution of the book is reconciliation between Dublin principles and Islamic principles. Islamic Finance as a Complex System Haider Ali Khan, Karamo N.M. Sonko, 2020-07-24. There has been a rapid increase in the interest in the study of Islamic finance, resulting in a dramatic rise in financing since the beginning of the century. By the end of 2017, global industry assets had reached 2.4 trillion and were forecasted to reach 3.2 trillion by 2020 despite historic challenges to Islam itself at the same time. This collection of chapters provides key theoretical, empirical and policy insights into Islamic finance from an overall complex financial and economic systems perspective. Within the complex financial and economic systems framework, this book addresses questions such as how to conceptualize Islamic financial institutions in a nonlinear general equilibrium system, how to promote Islamic finance in Africa, how Islamic is Islamic finance and how it affects price stability among other topics. The book provides case studies in Africa and Asia, addresses the subject in a structural financial CGE model, demonstrates the development impact of Islamic finance and presents an Islamic version of the Iceland Plan for Monetary Reform. **Islam and Sustainable Development** Odeh Rashed Al-Jayyousi, 2016-05-06. In *Islam and Sustainable Development*, Odeh Al-Jayyousi addresses the social, human and economic dimensions of sustainability from an Islamic perspective. Islam is sometimes viewed as a challenge, threat and risk to the West, but here we are reminded that the celebration of cultural diversity is a key component in Islamic values. Promoting common understanding between East and West, this American-educated Middle Eastern-based author offers something broader and deeper than conventional Western

ways of thinking about sustainability and presents new insights inspired by Islamic worldviews Drawing on his roles as both academic researcher and senior development practitioner Professor Al Jayyousi applies his deep understanding of Islamic values to contemporary environmental financial and social conflicts and crises and defines a framework for sustainability embracing local regional and global perspectives He also addresses how education might produce innovation knowledge creation and development to support a new paradigm for sustainability that re defines what constitutes good life beyond consumerism and the production of waste This book will interest policy makers development and donor communities funding agencies and banks in the Islamic World and beyond as well as those with a professional interest in planning and in environmental and conservation issues Scholars of Islamic and Middle Eastern studies and more broadly those with an academic interest in cultural and religious studies will find that this book in Gower s Transformation and Innovation Series is perhaps the most substantial work yet on sustainable development from an Islamic perspective **Restorative**

Redevelopment of Devastated Ecocultural Landscapes Robert L. France, 2016-04-19 A fusion of ecological restoration and sustainable development restorative redevelopment represents an emerging paradigm for remediating landscapes Rather than merely fixing the broken bits and pieces of nature restorative development advocates the reuse of devastated landscapes to improve the value and livability of a location for humans at the *Coastal Disaster Risk Management in Bangladesh* Mahbuba Nasreen, Khondoker Mokaddem Hossain, Mohammed Moniruzzaman Khan, 2023-03-31 This book addresses disaster and disaster risk reduction DRR practices constraints and capacity in the context of coastal Bangladesh Located in the lower riparian of the Bay of Bengal Bangladesh has to face frequent disasters such as floods cyclones river erosion salinity intrusion as well as drought Drawing together a range of multidisciplinary perspectives Coastal Disaster Risk Management in Bangladesh explores the connection between climate change and DRR issues in this region The editors reorganize disaster studies around social and physical changes that can reduce these risks and put at risk populations on a stronger footing by making risk reduction the focus These include measures to improve disaster preparedness to boost recovery by creating better disaster planning and programs and physical and social initiatives to improve disaster resilience Also analyzing the gender perspective the volume also utilizes the local knowledge framework to consider whether these populations have resilient knowledge that needs to be incorporated into initiatives based on advanced technology and perspectives This book will be of interest to academics researchers students policymakers and practitioners in the field of disaster DRR and governance climate change climate change adaptation CCA and the environment
