J. Holcík,K. Hensel,J. Nieslanik,L. Skácel,2012-12-06 The need to gather available data on the Eurasien huchen an important
salmonid species has been forced by a plain and unfortunately common fact of our times the numbers and distribution of this
biggest of salmonids have begun to decline and its range has begun to shrink A seminar on the huchen the European form of
the species Hucha hucha held in Zilina in February 1973 as a result of a suggestion of the Section for the Conservation of
Fauna of the Slovak Zoological Society indicated very clearly the sad situation Data on the biology of the huchen are
regrettably scarce despite several recent papers Ivaska 1951 Svetina 1962 Prawochenski and Kolder 1968 with the aim of
filling this gap Supposing that without a thorough knowledge it is practically impossible to conserve any plant or animal
species the participants of the seminar concluded that the existing knowledge on the huchen should be compiled in an
exhaustive monograph The first such outline originated in 1977 under the authorship of J Holcik K Hensel and L Skacel and
was submitted as a research report to some of the central authorities Even during the compilation of the report it became
evident however that there is no difference between the huchen and its relative the taimen Consequently we immediately
began revising our first report which took over three years *Etude FAO, Forêts* ,1977 *Zoological Series* Field Museum
