Consciousness and the Ontology of Properties Mihretu P. Guta, 2018-07-20 This book aims to show the centrality of a proper ontology of properties in thinking about consciousness Philosophers have long grappled with what is now known as the hard problem of consciousness i.e. how can subjective or qualitative features of our experience such as how a strawberry tastes arise from brain states More recently philosophers have incorporated what seems like promising empirical research from neuroscience and cognitive psychology in an attempt to bridge the gap between measurable mental states on the one hand and phenomenal qualities on the other In *Consciousness and the Ontology of Properties* many of the leading philosophers working on this issue as well as a few emerging scholars have written 14 new essays on this problem The essays address topics as diverse as substance dualism mental causation the

metaphysics of artificial intelligence the logic of conceivability constitution extended minds the emergence of consciousness and neuroscience and the unity and neural correlates of consciousness but are nonetheless unified in a collective objective the need for a proper ontology of properties to understand the hard problem of consciousness both on non empirical and empirical grounds

Brain, Mind, and Human Behavior in Contemporary Cognitive Science Jeff Coulter, Wes W. Sharrock, 2007 Engages a range of debated issues in the philosophy of mind and cognitive science challenging certain cognitivist positions in contemporary neuroscience This book exposes the way in which various forms of philosophical materialism are often uncritically invoked to buttress scientific claims about the human mind brain and behavior
