CMOS RF and mm-Wave Transceivers and Synthesizers Bharatha Kumar Thangarasu,Nagarajan Mahalingam,Kaixue Ma,Kiat Seng Yeo,2025-10-14 Power consumption has become a critical concern in RF mm wave integrated circuit IC design thanks to new applications from 5G mobile computing artificial intelligence and the Internet of Things However big challenges lie ahead for chip designers when they choose to develop ICs using silicon technology for low power and high data rate applications This is because silicon technology suffers from undesirable energy dissipation due to its lossy substrate and high resistive wiring loss at GHz frequencies Nonetheless silicon remains the most suitable material satisfying the demands of a rapidly growing semiconductor market through low fabrication cost and ease of achieving system on chip or system in package integration While long being neglected low power RF mm wave design has vaulted to the forefront of attention in recent years due to the demand for ultra low power transceivers to achieve sustainability Designing genuinely ubiquitous transceivers for these new applications requires innovations in both system architecture and circuit implementation This book closes the gap between a typical textbook with theories that are difficult to understand and a design oriented book that offers little insight into actual theories It evaluates and discusses different circuit topologies receiver and transmitter architectures phase locked loop performance metrics phase noise analysis and sub system level designs that have yet to be reported in other books

Music, Collective Memory, Trauma, and Nostalgia in European Cinema after the Second World War Michael Baumgartner,Ewelina Boczkowska,2019-09-23 In the wake of World War II the arts and culture of Europe became a site where the devastating events of the 20th century were remembered and understood Exploring one of the most integral elements of the cinematic experience music the essays in this volume consider the numerous ways in which post war European cinema dealt with memory trauma and nostalgia showing how the music of these films shaped the representation of the past The contributors consider films from the United Kingdom Poland the Soviet Union France Italy Germany Sweden Austria and the Netherlands providing a diverse and well rounded understanding of film music in the context of historical memory Memory is often underrepresented within scholarly musical studies with most of these applications found in the disciplines of ethnomusicology popular music studies music cognition and psychology and music therapy Likewise trauma has mainly been studied in relation to music in only a few historical contexts while nostalgia has attracted even less academic attention In three parts this volume addresses each area of study as it relates to the music of European cinema from 1945 to 1989 applying an interdisciplinary approach to investigate how films use music to negotiate the precarious relationships we maintain with the past Music Collective Memory Trauma and Nostalgia in European Cinema after the Second World War offers compelling arguments as to what makes music such a powerful medium for memory trauma and nostalgia
