 J.A. Edwards, 2007-01-10 This series is directed to healthcare professionals who are leading the transformation of healthcare
 by using information and knowledge Launched in 1998 as Computers in Health Care the series offers a broad range of titles
 some addressed to specific professions such as nursing medicine and health administration others to special areas of practice
 such as trauma and radiology Still other books in the series focus on interdisciplinary issues such as the computer based
 patient record electronic health records and networked healthcare systems Renamed Health Informatics in 1998 to reflect the
 rapid evolution in the discipline now known as health informatics the series will continue to add titles that contribute to the
 evolution of the field In the series eminent experts as editors or authors offer their accounts of innovations in health
 informatics Increasingly these accounts go beyond hardware and software to address the role of information in
 unifying the transformation of health care delivery systems around the world The series also will increasingly focus on peopleware and
 the organizational behavioral and societal changes that accompany the diffusion of information technology in health services
 environments These changes will shape health services in the new millennium By making full and creative use of the
 technology to tame data and to transform information health informatics will foster the development of the knowledge age in
