

It provides a systematic training for an entire infrastructure of XML. Some parts of course concentrate on general XML concepts, whereas others are devoted to specific XML applications. The course content is divided into three parts: the introductory part, the core part and the advanced part. The introductory part is devoted to the general XML concepts, the core part to the XML applications and the advanced part to the XML advanced topics. The course is designed to be a self-paced learning tool for XML developers.
