Were Friends Right Inside Kids Culture:

We're Friends, Right? William A. Corsaro, 2003-10-19 Sociologists often study exotic cultures by immersing themselves in an environment until they become accepted as insiders In this fascinating account by acclaimed researcher William A Corsaro a scientist goes native to study the secret world of children Here for the first time are the children themselves heard through an expert who knows that the only way to truly understand them is by becoming a member of their community That's just what Corsaro did when he traded in his adult perspective for a seat in the sandbox alongside groups of preschoolers Corsaro's journey of discovery is as fascinating as it is revealing Living among and gaining the acceptance of children he gradually comes to understand that a child's world is far more complex than anyone ever suspected He documents a special culture unique unto itself in which children create their own social structures and exert their own influences At a time when many parents fear that they don't spend enough time with their children and experts debate the best path to healthy development seeing childhood through the eyes of a child offers parents and caregivers fresh and compelling insights Corsaro calls upon all adults to appreciate embrace and savor their children's culture He asks us to take a cue from those we hold so precious and understand that we're all friends right
