Anthropology in the Twenty-First Century Ellen Lewin, Leni M. Silverstein, 2016-07-07 Feminist anthropology emerged in the 1970s as a much needed corrective to the discipline's androcentric biases Far from being a marginalized subfield it has been at the forefront of developments that have revolutionized not only anthropology but also a host of other disciplines This landmark collection of essays provides a contemporary overview of feminist anthropology's historical and theoretical origins the transformations it has undergone and the vital contributions it continues to make to cutting edge scholarship *Mapping Feminist Anthropology in the Twenty First Century* brings together a variety of contributors giving a voice to both younger researchers and pioneering scholars who offer insider perspectives on the field's foundational moments Some chapters reveal how the rise of feminist anthropology shaped and was shaped by the emergence of fields like women's studies black and Latina studies and LGBTQ studies Others consider how feminist anthropologists are helping to frame the direction of developing disciplines like masculinity studies affect theory and science and technology studies Spanning the globe from India to Canada from Vietnam to Peru *Mapping Feminist Anthropology in the Twenty First Century* reveals the important role that feminist anthropologists have played in worldwide campaigns against human rights abuses domestic violence and environmental degradation It also celebrates the work they have done closer to home helping to explode the developed world's preconceptions about sex gender and sexuality *The SAGE Handbook of Political Geography* Kevin R Cox, Murray Low, Jennifer Robinson, 2007-12-18 A thorough and absorbing tour of the sub discipline An essential acquisition for any scholar or teacher interested in geographical perspectives on political process Sallie Marston University of Arizona This unique book is a true encyclopedia of political geography Vladimir Kolossov Institute of Geography of the Russian Academy of Sciences and Vice President of the IGU *The SAGE Handbook of Political Geography* provides a highly contextualised and systematic overview of the latest thinking and research in the field Edited by key scholars with international contributions

desirable residents and businesses as customers and clients and the city itself as a product to be branded and marketed as a luxury good Commonly represented as pragmatic and nonideological the Bloomberg Way Brash argues is in fact an ambitious reformulation of neoliberal governance that advances specific class interests He considers the implications of this in a blow by blow account of the debate over the Hudson Yards plan which aimed to transform Manhattan s far west side into the city s next great high end district Bringing this plan to fruition proved surprisingly difficult as activists and entrenched interests pushed back against the Bloomberg administration suggesting that despite Bloomberg s success in redrawing the rules of urban governance older political arrangements and opportunities for social justice remain Urban Anthropology and

Jordan,Gordon Bigelow,2008 A central text both in Dickens s career and in the history of the novel itself Bleak House provides students and teachers occasion to discuss Victorian social concerns involving law crime family education and money and to learn about every stratum of English society from the aristocracy to the homeless But the sheer size of the novel and its narrative intricacy pose pedagogical obstacles The essays in this volume offer instructors an array of practical strategies for use in the classroom some describe courses organized exclusively around Bleak House others offer ideas for teaching a single scene or topic in the novel The book opens with part 1 Materials which assesses editions and provides a guide to the wealth of resources available to instructors including reference works critical studies and background readings in print and on the Web The essays in part 2 Approaches discuss nineteenth century British culture and Victorian social texts present ways to teach specific scenes patterns and problems in the novel describe intertextual approaches and detail specific courses taught in different settings and at a variety of educational levels Restructuring Family Policies Maureen Baker,2006 Recent years have seen significant changes in the social policies of many liberal welfare states this is especially true of social programs for families with children Increasingly governments are

making family policy trade offs reducing support for some families but improving it for others Why are such trade offs occurring and how do governments differ in their approach to family social policy This study addresses these questions by examining the political demographic and socio economic factors influencing the restructuring of family related programs in OECD countries Adopting a feminist political economy approach Maureen Baker shows that while some governments encourage their citizens to see children as future resources and promote strong support for reproductive health programs child welfare services women s refugees subsidized childcare and pay equity others make these claims while simultaneously reducing family incomes through the deregulation of labour markets and restrictions on income support Ultimately Baker demonstrates that nation states with the best outcomes for families offer a variety of social supports which are increasingly important as global markets reduce economic security for some families while improving the financial situation of others This study also explores strategies employed by states to incorporate or resist international pressures and the reasons why some states tenaciously defend their family policy traditions while others restructure according to international guidelines Drawing from nation based research cross national studies and international data bases Restructuring Family Policies successfully integrates mainstream academic debates about restructuring welfare states with feminist research findings and current policy concerns

Governance, Consumers and Citizens Mark Bevir, Frank Trentmann, 2007-09-12 This is the first book to bring together a focus on governance with that on cultures of consumption It asks about the changing place of the consumer as citizen in recent trends in governance about the tensions between competing ideas and practices of consumerism and about the active role of consumers in the construction of governance The book seeks to expand the debate about consumers and governance and to raise the possibility of new conceptions and policy agendas *American Anthropologist*, 2002

Social Justice Janet Newman, Nicola Yeates, 2008-07 Social justice is a highly contested term with all political parties now claiming it for their own Some clarity about the value base of social justice and what it means in practice is therefore essential to make sense of these claims This book does that most effectively for a range of key forms of welfare provision In a very readable way and with substantial illustrative material it takes the reader from engagement with key theories and concepts of social justice into the world of social welfare and crime control politics policy and practice showing what a socially just world might look like The authors are to be congratulated on an impressive collection of writing Gary Craig Professor of Social Justice University of Hull UK This book explores ways of defining and enacting social justice in the context of modern social welfare and crime control policies It examines how the notion of social justice informs experiences and understandings of the social world why it appeals to so many people as a mobilising ideal for social change and reform and how it shapes the claims demands and actions that people take in the pursuit of the good society The authors employ an interdisciplinary approach to explore the interrelationship between social policy and criminology With international content and a sustained focus across the book on different kinds of evidence it helps readers to gauge the role of evidence in social

science and policy development Designed as an interactive teaching text the book includes a range of student friendly learning features such as case studies activities and questions for discussion making it ideal for both classroom based and distance learners Social Justice is a key text for students in criminology social policy and social justice Mobilizations, Protests & Engagements Marie Hammond-Callaghan,2008 This book addresses many questions in evaluating social movements and is the first in a series being developed by The Centre for Canadian Studies at Mount Allison University What lessons can we learn from protest movements and social mobilizations of the past Do newer movements differ from those of the past in process or outcomes How have globalization and international events changed and shaped the way Canadian social movements operate How effective are and have been social movements as agents of change is there validity to the critique that social movement actors somehow lack legitimacy as the self appointed voice of communities they claim to represent Are the stated democratic values espoused by these movements borne out in their internal processes and practices Contributors from the fields of history political science education sociology and women s studies covering 80 years of social movement activism in Canada seek to address these questions pub desc **On Willing Selves** Sabine Maasen,B. Sutter,2007-08-30 Currently the neurosciences challenge the concept of will to be scientifically untenable specifying that it is our brain rather than our self that decides what we want to do At the same time we seem to be confronted with increasing possibilities and necessities of free choice in all areas of social life Based on up to date empirical research in the social sciences and philosophy the authors convened in this book address this seeming contradiction By differentiating the physical the psychic and the social realm the neuroscientific findings can be acknowledged within a comprehensive framework of selves in neoliberal societies Sex in Public Lauren Rosewarne,2007 Despite decades of feminist awareness and activism women continue to be portrayed in outdoor advertising in a limited and sexist manner The fact that in public space audiences are exposed to such images without choice renders the issue an important public policy concern Sex in Public utilises a large outdoor advertising data collection to examine the contemporary outdoor advertising landscape documenting the routine portrayal of women as thin white young and idle This book examines why such portrayals are concerning for feminists as well as for public policy and explores the advertising self regulation systems that facilitate the display of such images This book criticises sexist outdoor advertising as a form of sexual harassment given that imagery often bearing very strong semblance to pin ups which would be outlawed in a workplace are readily displayed in public space reflecting a troublesome public policy double standard Understanding sexist outdoor advertising as a form of sexual harassment is a new framework that Sex in Public offers to understand critique and condemn such images **Alberta Law Review** ,2006
