What Every Environmentalist Needs To Know About Capitalism:

What Every Environmentalist Needs to Know about Capitalism Fred Magdoff, John Bellamy Foster, 2011 Praise for Foster and Magdoff's *The Great Financial Crisis* In this timely and thorough analysis of the current financial crisis Foster and Magdoff explore its roots and the radical changes that might be undertaken in response This book makes a valuable contribution to the ongoing examination of our current debt crisis one that deserves our full attention Publishers Weekly There is a growing consensus that the planet is heading toward environmental catastrophe climate change ocean acidification ozone depletion global freshwater use loss of biodiversity and chemical pollution all threaten our future unless we act What is less clear is how humanity should respond The contemporary environmental movement is the site of many competing plans and prescriptions and composed of a diverse set of actors from militant activists to corporate chief executives This short readable book is a sharply argued manifesto for those environmentalists who reject schemes of green capitalism or piecemeal reform Environmental and economic scholars Magdoff and Foster contend that the struggle to reverse ecological degradation requires a firm grasp of economic reality Going further they argue that efforts to reform capitalism along environmental lines or rely solely on new technology to avert catastrophe misses the point The main cause of the looming environmental disaster is the driving logic of the system itself and those in power no matter how green are incapable of making the changes that are necessary *What Every Environmentalist Needs To Know about Capitalism* tackles the two largest issues of our time the ecological crisis and the faltering capitalist economy in a way that is thorough accessible and sure to provoke debate in the environmental movement

The Globalization and Environment Reader

Pete Newell, J. Timmons Roberts, 2016-06-13 *The Globalization and Environment Reader* features a collection of classic and cutting edge readings that explore whether and how globalization can be made compatible with sustainable development Offers a comprehensive collection of nearly 30 classic and cutting edge readings spanning a broad range of perspectives within this increasingly important field Addresses the question of whether economic globalization is the prime cause of the destruction of the global environment or if some forms of globalization could help to address global environmental problems Features carefully edited extracts selected both for their importance and their accessibility Covers a variety of topics such as the marketization of nature debates about managing and governing the relationship between globalization and the environment and discussions about whether or not globalization should be greened Systematically captures the breadth and diversity of the field without assuming prior knowledge Offers a timely and necessary insight into the future of our fragile planet in the 21st century *The Misery of International Law* John Linarelli, Margot E Salomon, Muthucumaraswamy Sornarajah, 2018-03-23 Poverty inequality and dispossession accompany economic globalization Bringing together three international law scholars this book addresses how international law and its regimes of trade investment finance as well as human rights are implicated in the construction of misery and how international law is producing reproducing and

embedding injustice and narrowing the alternatives that might really serve humanity Adopting a pluralist approach the authors confront the unconscionable dimensions of the global economic order the false premises upon which they are built and the role of international law in constituting and sustaining them Combining insights from radical critiques political philosophy history and critical development studies the book explores the pathologies at work in international economic law today International law must abide by the requirements of justice if it is to make a call for compliance with it but this work claims it drastically fails to do so In a legal order structured around neoliberal ideologies rather than principles of justice every state can and does grab what it can in the economic sphere on the basis of power and interest legally so and under colour of law This book examines how international law on trade and foreign investment and the law and norms on global finance has been shaped to benefit the rich and powerful at the expense of others It studies how a set of principles in the form of a New International Economic Order NIEO that could have laid the groundwork for a more inclusive international law without even disrupting its market orientation were nonetheless undermined As for international human rights law it is under the terms of global capitalism that human rights operate Before we can understand how human rights can create more just societies we must first expose the ways in which they reflect capitalist society and how they assist in reproducing the underlying terms of immiseration that will continue to create the need for human rights protection This book challenges conventional justifications of economic globalization and eschews false choices It is not about whether one is for or against international trade foreign investment or global finance The issue is to resolve how if we are to engage in trade investment and finance we do so in a manner that is accountable to persons whose lives are affected by international law The deployment of human rights for their part must be considered against the ubiquity of neoliberal globalization under law and not merely as a discrete benevolent response to it

The Carbon Farming Solution Eric Toensmeier, 2016 Agriculture is rightly blamed as a major culprit of our climate crisis But in this groundbreaking new book Eric Toensmeier argues that agriculture specifically the subset of practices known as carbon farming can and should be a linchpin of a global climate solutions platform

Corporate Social Responsibility and Environmental Affairs in the British Press Martina Topić, 2021-10-27 An ecofeminist criticism of neoliberalism this book uses economic growth CSR and the press coverage of environmental affairs as a case study The author argues that CSR is part of a wheel of neoliberalism that continually perpetuates inequality and the exploitation of women and Nature Using an ecofeminist sense making analysis of media coverage of food waste global warming plastic economic growth and CSR the author shows how the press discourse in writing is always similar and serves to preserve the status quo with CSR being just a smokescreen that saved capitalism and just one cog in the wheel of neoliberalism While available research offers perspectives from business and public relations studies looking at how CSR is implemented and how it contributes towards the reputation of businesses this book explores how the media enforce CSR discourse while at the same time arguing for environmental preservation The book presents a

combination of quantitative and qualitative methods to explain how and why CSR is being pushed forward by the news media and how the media preserves the status quo by creating moral panic on environmental issues while at the same time pushing for CSR discourse and economic growth which only contributes towards environmental degradation The original research presented in the book looks at how the media write about economic growth plastics food waste CSR and global warming This interdisciplinary study draws on ecofeminist theory and media feminist theory to provide a novel analysis of CSR making the case that enforcing CSR as a way to do business damages the environment and that the media enforce a neoliberal discourse of promoting both economic growth and environmentalism which does not go together Examining the UK media as a case study a detailed methodological account is provided so that the study can be repeated and compared elsewhere The book is aimed at academics and researchers in business and media studies as well as those in women s studies It will also be relevant to scholars in business management and marketing

Motor Vehicles, the Environment, and the Human Condition

Hans A. Baer, 2019-10-09 The world now has more than a billion motor vehicles and this number continues to increase as developing countries imitate developed societies in their adoption of the culture of automobility This book explores the political ecology of motor vehicles in an era of growing social disparities and environmental crises the latter of which are most manifest in anthropogenic climate change to which motor vehicles constitute a major contributor A political ecological perspective recognizes that motor vehicles perhaps more than any other machine embody the social structural cultural and environmental contradictions of the capitalist world system In addition to highlighting many of the environmental social and health environmental consequences of humanity s increasing reliance on motor vehicles particularly private automobiles this book argues that ultimately we need as a species to move beyond motor vehicles as much as possible but that such an effort will have be part and parcel of creating an alternative world system based on social justice democratic processes environmental sustainability and a safe climate one termed democratic eco socialism

El desarrollo endógeno sustentable Freddy Delgado B.,2010 **Ideas on Liberty** ,2003 **The Return of Nature**

John Bellamy Foster,2020-06-16 A fascinating reinterpretation of the radical and socialist origins of ecology Twenty years ago John Bellamy Foster s Marx s Ecology Materialism and Nature introduced a new understanding of Karl Marx s revolutionary ecological materialism More than simply a study of Marx it commenced an intellectual and social history encompassing thinkers from Epicurus to Darwin who developed materialist and ecological ideas Now with The Return of Nature Socialism and Ecology Foster continues this narrative In so doing he uncovers a long history of efforts to unite issues of social justice and environmental sustainability that will help us comprehend and counter today s unprecedented planetary emergencies The Return of Nature begins with the deaths of Darwin 1882 and Marx 1883 and moves on until the rise of the ecological age in the 1960s and 1970s Foster explores how socialist analysts and materialist scientists of various stamps first in Britain then the United States from William Morris and Frederick Engels to Joseph Needham Rachel Carson and Stephen J Gould sought to develop a dialectical naturalism rooted in a critique of capitalism In the process he delivers a far reaching and fascinating reinterpretation of the radical and socialist origins of ecology Ultimately what this book asks for is nothing short of revolution a long ecological revolution aimed at making peace with the planet while meeting collective human needs *The Ecological Revolution* John Bellamy Foster,2009-02 The roots of the present ecological crisis Foster argues lie in capital s rapacious expansion which has now achieved unprecedented heights of irrationality across the globe Foster demonstrates that the only possible answer for humanity is an ecological revolution a struggle to make peace with the planet Foster details the beginnings of such a revolution in human relations with the environment which can now be found throughout the globe especially in the periphery of the world system where the most ambitious experiments are taking place From publisher description **The Journal of Markets & Morality** ,2005 **Faltering Economy** John Bellamy Foster,1984 The essays in this volume by veteran economists as well as younger scholars are part of a radical attempt to grapple with the problems of advanced capitalist development without discarding the real theoretical breakthroughs made by Keynes The contributors argue that Keynes was correct in pointing to the economic contradictions stemming from unemployment income inequality and speculative finance but failed to consider the class composition of social output the macroeconomic effects of the modern

firm and the atrophy of investment under conditions of capitalist maturity They thus seek to uncover the sources of stagnation under monopoly capitalism by building on the work of three of the great economists of modern times Marx Keynes and Kalecki **Massachusetts Wildlife** ,1972 **The Theory of Monopoly Capitalism** John Bellamy Foster,2014-04

Absent any epoch making innovations like the automobile or vast new increases in military spending the result was a general trend toward economic stagnation a condition that persists and is increasingly apparent to this day Their analysis was also extended to issues of imperialism or accumulation on a world scale overlapping with the path breaking work of Samir Amin in particular John Bellamy Foster is a leading exponent of this theoretical perspective today continuing in the tradition of Baran and Sweezy s Monopoly Capital This new edition of his essential work The Theory of Monopoly Capitalism is a clear and accessible explication of this outlook brought up to the present and incorporating an analysis of recently discovered lost chapters from Monopoly Capital and correspondence between Baran and Sweezy Commentary ,2002 **Logging Management** ,1979
