What Is Life What Is Life:

What is Life? Josef Seifert, 2021-11-15 This book makes four bold claims 1 life is an ultimate datum open to philosophical analysis and irreducible to physical reality hence all materialist reductionist explanations most current theories of life are false 2 All life presupposes soul entelechy without which a being would at best fake life 3 The concept of life is analogous and the most direct access to life in its irreducibility is gained through consciousness 4 All life possesses an objective and intrinsic value that needs to be respected human life possesses beyond this an inviolable dignity Life and personal life are pure perfections it being absolutely better to possess personal life than not to possess it Chapter 1 the metaphysical essence and the many meanings of life as well as its transcendental character Chapter 2 the irreducibility of biological life its amazing empirical and philosophically intelligible essential features and the ways of knowing them Chapter 3 the immediate evidence and indubitable givenness of mental conscious life as well as questions of brain death and immortality Chapter 4 the inviolable objective dignity of personal life and its self transcendence a new theory of the fourfold source of human dignity and rights Chapter 5 in dialogue form methods and results of philosophy versus those of empirical life sciences

Sociological Life Course Research Matthias Wingens, 2022-08-04 This introductory book provides an insight into sociological life course research and informs about its theoretical assumptions analytical concepts and main results Sociological life course research like biographical research has developed into an independent and fruitful field of research since the end of the 1960s It is true that half a century earlier in their famous study of The Polish Peasant in Europe and America 1918 20 Thomas and Znaniecki had already used life records to examine the connection between social change social structures and the life histories of individuals However such a research perspective was supplanted by other methodological conceptual approaches to empirical social research for over fifty years It was not until the 1960s that sociological interest in life course and biographical theoretical issues reawakened Today life course research is considered one of the most important conceptual innovations in sociology in recent decades The content The life course as a social construction What is life course research The life course as an institution Collective life courses generations cohorts and social change Structures of the life course Life course research a conceptual perspective Life course research quo vadis The author Prof Dr Matthias Wingens teaches sociology at the University of Bremen Bremen International Graduate School of Social Sciences BIGSSS The Philosophy of Life and Welcome to Paradise A.
