What Are They Saying About Environmental Ethics:

What are They Saying about Environmental Ethics? Pamela Smith, 1997 An overview of the major voices and the major schools of thought in contemporary environmental ethics deep ecology ecofeminism animals rights environmental holism liberation ecotheology and various approaches to eco ethical questions *Practical And Professional Ethics (vol. 2 : Environmental Ethics* Debashis Guha, 2007 *Rachel Carson* Karen F. Stein, 2013-02-11 Karen F Stein University of Rhode Island Kingston USA Rachel Carson is the twentieth century s most significant environmentalist Her books about the sea blend science and poetry as they invite readers to share her celebration of the ocean s wonders Silent Spring her graphic and compelling expos of the damage caused by the widespread aerial spraying of persistent organic pesticides such as DDT opened our eyes to the interconnectedness of all living beings and the ecological systems we inhabit Carson s work challenges our belief that science and technology can control the natural world asks us to recognize our place in the world around us and inspires us to treat the earth respectfully She calls us to rekindle our sense of wonder at nature s power and beauty and to tread lightly on the earth so that it will continue to sustain us and our descendants This book guides readers on a journey through Carson s life and work considers Carson s legacies and points to some of the continuing challenges to sustainability It provides a listing of resources for reading learning or teaching about the environment about nature writing and about Carson and the crucial issues she addressed *Environmental Ethics* David R. Keller, 2010-03-15 Through a series of multidisciplinary readings Environmental Ethics The Big Questions contextualizes environmental ethics within the history of Western intellectual tradition and traces the development of theory since the 1970s Includes an extended introduction that provides an historical and thematic introduction to the field of environmental ethics Features a selection of brief original essays on why to study environmental ethics by leaders in the field Contextualizes environmental ethics within the history of the Western intellectual tradition by exploring anthropocentric human centered and nonanthropocentric precedents Offers an interdisciplinary approach to the field by featuring seminal work from eminent philosophers biologists ecologists historians economists sociologists anthropologists nature writers business writers and others Designed to be used with a web site which contains a continuously updated archive of case studies environmentalethics info **Environmental Philosophy and Environmental Activism** Don E. Marietta, Lester Embree, 1995-09-06 This collection of new essays by eleven distinguished environmental philosophers addresses two main questions first whether environmental philosophy and ethics should be seen as a form of applied philosophy or as something else perhaps best called practical philosophy and second how environmental philosophy is practiced in human life especially in the lives of academics **Environmental Ethics** , 1992 Papers presented at the UNCED Consultative National Symposium on Environmental Ethics New Delhi March 13 1992 *Hinduism and Environmental Ethics* Christopher Framarin, 2014-02-24 This book argues that the standard arguments for and against the claim that certain Hindu texts and traditions attribute direct moral standing to animals and

plants are unconvincing. It presents careful extensive and original interpretations of passages from the Manusmṛiti law the Mahābhārata literature and the Yogasūtra philosophy and argues that these texts attribute direct moral standing to animals and plants for at least three reasons: they are sentient, they are alive, and they possess a range of other relevant attributes and abilities. This book is of interest to scholars of Hinduism and the environment, religion and the environment, Hindu and/or Buddhist philosophy, more broadly, and environmental ethics.

The Environmental Ethics and Policy Book Donald VanDeVeer, Christine Pierce, 1994. This text is designed for students who wish to explore in depth questions about how on earth we ought to live, e.g. how we can behave responsibly toward nonhumans and toward the planet. Although primarily oriented toward questions of ethics broadly understood and approached philosophically, the volume crosses disciplinary boundaries and attends seriously to economic reasoning and its implications for environmental policy issues. It seeks to extract for critical attention the relevant moral or normative presuppositions which lie behind policy recommendations, whether they are ones made by biologists, ecologists, economists, philosophers, engineers, public officials, or anyone concerned with policy decisions.

Environmental Ethics Robert Elliot, 1995. This latest addition to the acclaimed Oxford Readings in Philosophy series offers a selection of some of the best articles on ethics and the environment written in the last twenty years. Focusing on the philosophical issues underlying this key topic, the contributions cover duties to future people, resource conservation, species and wilderness preservation, the relevance of ecology to ethics, ecofeminism, and the tension between political liberalism and environmentalism. Including writings by Baird Callicott, Colleen D. Clements, Mary Midgley, John Passmore, Holmes Rolston III, Mark Sagoff, Elliott Sober, Mary B. Williams, Andrew Brennan, Freya Matthews, Val Plumwood, and Richard Routley, this accessible and timely book makes a perfect introduction to the main debates in this area.

Environmental Ethics and Policy-Making Mikael Stenmark, 2017-03-02. Environmental issues raise crucial questions: What should we value? What is our place in nature? What kind of life should we live? How should we interact with other living things? Environmental management and policy making is ultimately based on answers to these and similar questions, but do we need a new ethics to be able to overcome the environmental crisis we face? This book addresses these important questions and explores the values that decision makers often presuppose in their environmental policy making. Examining the content of the ethics of sustainable development that the UN and the world's governments want us to embrace, this book examines alternatives to this kind of ethics and the differences in basic values that these make in practice. Offering a detailed analysis of the ethics that lie behind current policy making as it is expressed in documents such as Agenda 21 and the Rio Declaration, this unique contribution to the field of environmental studies shows how different environmental ethical theories support different goals of environmental management and generate different policies when it comes to population growth, agriculture and preservation, and management of wilderness areas and endangered species. Mikael Stenmark concludes that policy makers must take more seriously the value assumptions and conflicts connected to environmental issues and state explicitly

on what values their own proposals and decisions are based and why these should be accepted Those studying environmental issues or environmental philosophy will find this accessible text invaluable in presenting a clear understanding of environmental ethics and contemporary applications and policies **The Catholic Periodical and Literature Index** ,2005

Environmental Ethics: Divergence and Convergence Susan J Armstrong,Richard G Botzler,2003-08-28 **The Best Books for Academic Libraries: Social sciences** ,2002 Books recommended for undergraduate and college libraries listed by Library of Congress Classification Numbers **Zen Buddhism and Environmental Ethics** Simon P. James,2004 James U of Durham Britain looks at the implications of Zen Buddhist teachings and practices for people s moral relationship with nature but more generally explores philosophy He begins with a short history of Zen from the Buddha through China and Japan and eventually to the West Then he examines a number of aspects of Zen ethics in general *The American Benedictine Review* ,2002 Abstracts of Public Administration, Development, and Environment ,1999 Perspectives on Science and Christian Faith ,2002 *Christian Faith and the Environment* Brennan Hill,1998 The Ethics of the Environment Robin Attfield,2008 This book brings together over thirty leading contributions to environmental ethics from pioneering papers to recent work at the cutting edge of thought in this field The introduction links together these articles and also appraises their strengths and weaknesses and presents a distinctive overview of the subject **American Book Publishing Record Cumulative 1998** R R Bowker Publishing,1999-03
