What Causes War An Introduction To Theories Of International Conflict:

What Causes War? Greg Cashman, 2013-07-29 Now in a thoroughly revised and updated edition this classic text presents a comprehensive survey of the many alternative theories that attempt to explain the causes of interstate war For each theory Greg Cashman examines the arguments and counterarguments considers the empirical evidence and counterevidence generated by social science research looks at historical applications of the theory and discusses the theory's implications for restraining international violence Among the questions he explores are Are humans aggressive by nature Do individual differences among leaders matter How might poor decision making procedures lead to war Why do leaders engage in seemingly risky and irrational policies that end in war Why do states with internal conflicts seem to become entangled in wars with their neighbors What roles do nationalism and ethnicity play in international conflict What kinds of countries are most likely to become involved in war Why have certain pairs of countries been particularly war prone over the centuries Can strong states deter war Can we find any patterns in the way that war breaks out How do balances of power or changes in balances of power make war more likely Do social scientists currently have an answer to the question of what causes war Cashman examines theories of war at the individual substate nation state dyadic and international systems level of analysis Written in a clear and accessible style this interdisciplinary text will be essential reading for all students of international relations

Military Honour and the Conduct of War Paul Robinson, 2006-07-28 This study presents the first examination of the influence of ideas of honour on the causes conduct and ending of wars from Ancient Greece to the present day Paul Robinson begins with a theoretical examination of the concept of honour to clearly explain the many contradictions and tensions inherent within honour systems He then shows how honour has often contradictory and paradoxical effects on the conduct of war and illustrates this through seven case studies Classical Greece Ancient Rome mediaeval Chivalry Elizabethan England the American Civil War the British Empire and the Western world after World War II including the Vietnam War and the current conflict in Iraq Key topics covered include honour and virtue honour and the causes of war honour as a motivation for fighting honours and rewards death and honour honour and the conduct of war honour and the enemy honour and the ending of wars women and honour This book reveals that the often contradictory behaviour of soldiers during war is a product of the contradictions inherent in the concept of honour This book will be of great interest to all students of military ethics military history politics international relations anthropology sociology philosophy and the history of ideas

The Absolute Weapon Revisited T. V. Paul, Richard J. Harknett, James J. Wirtz, 2000 Discusses the contemporary role of nuclear weapons in international relations

Russian Studies, Political Science, and the Philosophy of Technology Guoli Liu, Joanna Drzewieniecki, 2022-04-18 This volume presents state of the art creative scholarship in political science and area studies with an emphasis on Russia The contributors all well known in their specialties share the conviction that advancement in the social sciences can only be achieved through plural methodological approaches and interaction with

various disciplines Their work in this collection provides critical analyses of key issues in Russian and post Soviet studies It explores the most fruitful ways of studying Russia with particular emphasis on the federal system politics in the era of Putin challenges of Russian foreign policy and Russian attitudes toward democracy The vagaries of democracy are also explored in articles on Georgia and Turkey Additionally this book examines the philosophy of technology with an emphasis on critical theory eco domination and engineering ethics *Political Realism in International Theory* Roger D. Spegele, 1996-08-22 In this 1996 book Roger Spegele argues that in the past international theorists have failed to recognise that there is not one conception of international relations subdivided into different theories and approaches but at least three wholly different conceptions of the subject Though scholars are increasingly prepared to accept this there is still no consensus about what to call these conceptions how to describe them and why they should be studied This book attempts to fill this gap The author first examines two conceptions of IR positivism empiricism and emancipatory international relations which challenge political realism He then defends a revised version of realism called evaluative political realism from challenges arising from its rivals with the aim of defining a conception of political realism which is coherent viable and attractive **The Milosevic Trial**

Timothy William Waters, 2013-12-09 The Milo evi Trial An Autopsy provides a cross disciplinary examination of one of the most controversial war crimes trials of the modern era and its contested legacy for the growing fields of international criminal law and post conflict justice The international trial of Slobodan Milo evi who presided over the violent collapse of Yugoslavia was already among the longest war crimes trials when Milo evi died in 2006 Yet precisely because it ended without judgment its significance and legacy are specially contested The contributors to this volume including trial participants area specialists and international law scholars bring a variety of perspectives as they examine the meaning of the trial s termination and its implications for post conflict justice The book s approach is intensively cross disciplinary weighing the implications for law politics and society that modern war crimes trials create The time for such an examination is fitting with the imminent closing of the Yugoslav war crimes tribunal and rising debates over its legacy as well as the 20th anniversary of the outbreak of the Yugoslav conflict The Milo evi Trial An Autopsy brings thought provoking insights into the impact of war crimes trials on post conflict justice **In the Eyes of the Dragon** Yong Deng, Fei-Ling Wang, 2000-01-01

Presenting new and invaluable Chinese perspectives on international relations in general and Beijing s foreign policy in particular this work offers the first balanced and thoroughly researched analysis by Chinese scholars Drawing on original Chinese sources and interviews In the Eyes of the Dragon explores Chinese views on sovereignty national interest security multilateralism international human rights nuclear nonproliferation Taiwan and the United States Illuminating how China views the post Cold War world and its place therein the contributors enhance our understanding of the nationalist sentiments driving the PRC s foreign policy and elevate the debate over China to a higher more sophisticated and productive level

Disarmament and Defence Industrial Adjustment in South Africa Peter G. Batchelor, Susan Willett, 1998 Peter

Batchelor and Susan Willett analyse the response of the South African defence industry to drastic cuts in military expenditure and the demilitarization of society since the end of the cold war and apartheid and the stabilization of the regional security situation The new ANC led government is seeking to use the resources released the peace dividend to restructure and revitalize the country s industrial base and to support reconstruction development and redistribution A lively debate on the country s security needs and strategic doctrine is under way As in other countries strategies of industrial diversification and conversion have met with limited success In the absence hitherto of any coherent government policy on defence industrial adjustment significant skills and technologies have been lost or wasted This book provides a historical analysis of South Africa s unique opportunity to develop new and innovative policies on defence and security matters the arms industry and arms exports and makes a valuable contribution to the international debate on the relationship between disarmament and development

How Enemies Are Made Günther Schlee,2008-09-01 In popular perception cultural differences or ethnic affiliation are factors that cause conflict or political fragmentation although this is not borne out by historical evidence This book puts forward an alternative conflict theory The author develops a decision theory which explains the conditions under which differing types of identification are preferred Group identification is linked to competition for resources like water territory oil political charges or other advantages Rivalry for resources can cause conflicts but it does not explain who takes whose side in a conflict situation This book explores possibilities of reducing violent conflicts and ends with a case study based on personal experience of the author of conflict resolution

China's Japan Policy: Learning from the Past Amrita Jash,2023-11-03 The book establishes a linkage between perceptions and foreign policy by exploring how China s behavior towards Japan is driven by mental shortcuts The study is focused on the aspect of historical memories and how it factors in China s Japan Policy It explores the linkage between perceptions born from the past their interpretations in the present and thereby the shaping of policy behavior of China towards Japan The author delves beyond the realist and liberal interpretations of international politics which assume that states interests and material capabilities are a given in the international system thus offering a conceptual understanding of Sino Japanese relations in the twenty first century

Teaching International Relations Scott, James M.,Carter, Ralph G.,Jolliff Scott, Brandy,Lantis, Jeffrey S.,2021-08-27 This comprehensive guide captures important trends in international relations IR pedagogy paying particular attention to innovations in active learning and student engagement for the contemporary International Relations IR classroom

The Role of the Economic Community of West African States in Counterinsurgency and Conflict Resolution Muhammed Touray,2025-04-16 From 1991 to 2002 the Sierra Leone government and the Revolutionary United Front waged war against each other subjecting Sierra Leone to a civil war This war devastated the nation and resulted in many human casualties Although many researchers have investigated the role of the Economic Community of West African States ECOWAS in counterinsurgency and conflict resolutions few studies have been conducted on the specific role of strategic processing tools

used by ECOWAS during the Sierra Leone war to sustain a durable peace resolution in the country Using Galula's conceptualization of counterinsurgency and conflict resolution work of 1964 as a guide for the purpose of this qualitative study likewise I used an explanatory case study to determine the elements that made the strategic processing tools effective during the civil war Data was collected through interviews with some Sierra Leoneans that experienced the conflict academic sources publicly available documents and authentic mass media reports related to the Sierra Leone civil war Nonetheless the phenomenon or pretext of conflict is intricate Therefore it is both paradoxical and essential to examine conflicts through the lens of misconceptions and false beliefs that can result in dispute propaganda violence insurgency or war Consequently all parties involved in the conflict must engage in counterinsurgency and conflict resolution initiatives to establish common understanding and reach agreeable solutions for sustainable peace both locally and globally Read for more [The Oxford Handbook of Political Leadership](#) R. A. W. Rhodes, Paul 't Hart, 2014-05-29 Political leadership has made a comeback It was studied intensively not only by political scientists but also by political sociologists and psychologists Sovietologists political anthropologists and by scholars in comparative and development studies from the 1940s to the 1970s Thereafter the field lost its way with the rise of structuralism neo institutionalism and rational choice approaches to the study of politics government and governance Recently however students of politics have returned to studying the role of individual leaders and the exercise of leadership to explain political outcomes The list of topics is nigh endless elections conflict management public policy government popularity development governance networks and regional integration In the media age leaders are presented and stage managed spun DDLs as the solution to almost every social problem Through the mass media and the Internet citizens and professional observers follow the rise impact and fall of senior political officeholders at closer quarters than ever before This Handbook encapsulates the resurgence by asking where are we today It orders the multidisciplinary field by identifying the distinct and distinctive contributions of the disciplines It meets the urgent need to take stock It brings together scholars from around the world encouraging a comparative perspective to provide a comprehensive coverage of all the major disciplines methods and regions It showcases both the normative and empirical traditions in political leadership studies and juxtaposes behavioural institutional and interpretive approaches It covers formal office based as well as informal emergent political leadership and in both democratic and undemocratic polities *The SAGE Encyclopedia of Political Behavior* Fathali M. Moghaddam, 2017-05-03 The SAGE Encyclopedia of Political Behavior explores the intersection of psychology political science sociology and human behavior This encyclopedia integrates theories research and case studies from a variety of disciplines that inform this established area of study Aimed at college and university students this one of a kind book covers voting patterns interactions between groups what makes different types of government systems appealing to different societies and the impact of early childhood development on political beliefs among others Topics explored by political psychologists are of great interest in fields beyond either psychology or political science with implications for

instance within business and management

Latinx Perspectives on the New Testament Leticia A.

Guardiola-Sáenz, Osvaldo D. Vena, 2022-03-17 Going against the false perception that all Latinx views on the Bible are homogeneous the contributors in this book use different hermeneutic perspectives to interpret the New Testament Each chapter examines one of the twenty seven documents thematically instead of following the traditional verse by verse commentary format Routledge Library Editions: International Finance Various Authors, 2021-03-05 The 4 volumes in this set originally published between 1973 and 1998 draw together research by leading academics in the area of international finance and provides an examination of related key issues The volumes examine international trade principles of international finance and one of the texts provides a comprehensive research and information guide to international financial statistics This set will be of particular interest to students of economics and finance US Foreign Policy Decision-Making from Kennedy to Obama A. Hybel, 2014-03-13 This book analyzes the foreign policy decision making processes of Presidents John F Kennedy Lyndon B Johnson Richard Nixon George H W Bush George W Bush and Barack Obama during military intervention by way of contemporary foreign policy decision making models FPDMS **Mao Zedong & China's Foreign Policy** Amrita Jash, 2025-07-22 This book analyses China's foreign policy from 1949 to 1976 through a cognitive perceptual lens emphasise Mao Zedong's central role as the primary decision making authority Moving beyond realist frameworks it highlights how Mao's ideological worldview shaped by his theory of contradictions revolutionary zeal and use of historical analogies drove China's foreign policy particularly in relation to Vietnam His subjective interpretation of global affairs reinforced by Marxist Leninist principles and China's historical identity guided key strategic decisions The study underscores the importance of individual leaders beliefs perceptions and psychological traits in shaping foreign policy offering broader implications for understanding international relations through cognitive and psychological approaches **Arms Diffusion** Thomas W. Zarzecki, 2018-12-20 Weapons proliferation is one of the most pressing global concerns following the end of the Cold War Despite the absence of an overarching superpower conflict armaments and related technologies have continued to spread throughout the international system This has been particularly true in areas like East Asia and the Middle East where the traditional two party arms races are not readily apparent This text addresses these concerns and shortcomings using data on fourteen specific military technological innovations that diffused throughout the international system from 1960 to 1997 Kant and International Relations Theory Dora Ion, 2012-02-27 This book challenges popular international relations theories that claim to be based on the political writings of Immanuel Kant and sheds new light on the philosopher's perspective on peace Through an analysis of Kant's philosophical work and political traditions of his time as well as of neglected concepts and theory this book reappraises modern perspectives on his work Kant advocated a cosmopolitan community building perspective of peace and international relations that considered issues that are now significant topics of debate such as state sovereignty and unequal access to resources This book reveals how Kant's political views translate into

a vision of international relations that cannot be associated with the democratic and neoliberal theories of peace which until now have claimed Kant's legacy While the democratic peace theory continues to inspire policy making Kant's predictions on war and peace ultimately prove to be most appropriate for the current issues of globalization and diversity Offering new insights into the meaning of peace and war in international relations Kant and International Relations Theory is an invaluable resource for students and scholars of international relations and political theory as well as for those interested in Kant's scholarship
