

Living Things & their Habitats

Lesson 5 - How are living things adapted to their habitat?

Habitats

Some animals are better suited to the habitat they live in because they have special features.

They have long eyelashes to help keep sand out of their eyes.

They have large fat stores in their humps so they can go a week without water and months without food.

They have thick lips so they can eat spiky plants.

Camels live in the desert.

They are a sandy colour to avoid being seen by predators.

They have thick eyelashes that hang over to help protect their eyes from the sun.

They have large wide feet so they can walk well on the sand.

Activity

Write down the adaptations that help camels survive in the desert.
