

INSTRUCTIONS:

1. Locate the segments on and on the outer edge of the timer dial. If these segments, each representing 30 minutes, can be pushed down from the edge of the dial by using the tip of a pen or pencil. Conversely, segments that have been pushed down can be easily pushed back up by hand. Be sure all segments are pushed up before programming. Set the time period for periods powered the lamp turned on, then push down all the segments that fall on or within this time period. For example, to have the timer turn on tomorrow at 10PM, and off at 2AM, push down the segments representing 10PM and 2AM, and all the segments in between (See Figure 1 & 2). You may need to turn the dial clockwise to recess the desired segments.
2. Rotate the timer dial clockwise until the pointer on the face of the dial points to the current time of day. Note: High rates hours (from 12:00 PM to 12:00 AM) are highlighted with a black background.
3. Set master switch to the OFF POSITION. See Figure 3.
4. Plug the timer into an electrical outlet convenient to the lamp to be controlled.
5. Plug the lamp into the outlet on the side of the timer. Turn the lamp switch on for automatic control. The timer will not turn the lamp on if the lamp switch is off. The lamp will now turn on and off as the timer you have set.

NOTE: To override the timer and use your lamp normally, set the master switch to the OFF POSITION. This will deactivate the timer's control of the lamp, but the timer's dial will still show the current time of day. To reactivate the timer's control of the lamp, turn the lamp switch on and set the timer's master switch to OFF POSITION. In case of power failure, note, the time of day as explained in step 2.

DO NOT PLUG IN MORE THAN THE RATED LOAD ORS. BUTTERFLIES. To find wattages being used if watts are not marked on the appliance, multiply ampere rating (on the marked) by 120 volts to determine equivalent watts. For lamps with multiple bulbs, sum wattage on bulbs.

This is a POLARIZED device. It has a polarized plug (one blade is wider than the other) and a polarized outlet (one slot is longer than the other). If the polarized plug is not intended to be used with non-polarized outlets having both slots of the same size, a polarized outlet is needed so make use of a polarized plug in only one way — the longer slot with the wider blade.
