th CAiSE 2004 was the 16 in the series of International Conferences on Advanced Information Systems Engineering In the year 2004 the conference was hosted by the Faculty of Computer Science and Information Technology Riga Technical University Latvia Since the late 1980s the CAiSE conferences have provided a forum for the presentation and exchange of research results and practical experiences within the eld of Information Systems Engineering The conference theme of CAiSE 2004 was Knowledge and Model Driven Information Systems Engineering for Networked Organizations Modern businesses and IT systems are facing an ever more complex en ronment characterized by openness variety and change Organizations are coming less self su cient and increasingly dependent on business partners and other actors These trends call for openness of business as well as IT systems i e the ability to connect and interoperate with other systems Furthermore organizations are experiencing ever more variety in their business in all c ceivable dimensions The di erent competencies required by the workforce are multiplying In the same way the variety in technology is overwhelming with a multitude of languages platforms devices standards and products Moreover organizations need to manage an environment that is constantly changing and where lead times product life cycles and partner relationships are shortening ThedemandofhavingtoconstantlyadaptITtochangingtechnologiesandbu ness practices has resulted in the birth of new ideas which may have a profound impact on the information systems engineering practices in future years such as autonomic computing component and services marketplaces and dynamically generated software **Business Process Management** Gustavo Alonso, Peter Dadam, Michael Rosemann, 2007-09-04 This book constitutes the refereed proceedings of the 5th International Conference on Business Process Management BPM 2007 held in Brisbane Australia in September 2007 The papers are organized in topical sections on business process maturity and performance business process modeling case studies compliance and change process configuration and execution formal foundations of BPM business process mining and semantic issues in BPM **Conceptual Modeling - ER 2002** Stefano Spaccapietra, Salvatore March, Yahiko Kambayashi, 2003-06-30 For more than 20 years the series of Conceptual Modeling ER conferences has provided a forum for research communities and practitioners to present and change research results and practical experiences in the elds of database design and conceptual modeling Throughout the years the scope of these conferences has extended from database design and speci c topics of that area to more u versal or re ned conceptual modeling organizing originally weak or ill structured information or knowledge in more cultured ways by applying various kinds of principles abstract models and theories for di erent purposes At the same time many technically oriented approaches have been developed which aim to facilitate the implementation of rather advanced conceptual models Conceptual modeling is based on the process of

conceptualization and it is the core of system structuring as well as justification for information systems development. It supports and facilitates the understanding, explanation, prediction and reasoning on information and knowledge and their manipulation in the systems in addition to understanding and designing the functions of the systems. The conceptualization process aims at constructing concepts relevant for the knowledge and information system in question. Concepts in the human mind and concept descriptions in computerized information systems are quite different things by nature but both should be taken into account in conceptual modeling. Usually concept descriptions are properly observed but concepts in the human mind and their properties are often neglected quite carelessly.

The Client-Consultant Relationship in Professional Business Service Firms Natalia Nikolova, 2019-02-02 The interaction between clients and consultants during consulting projects is essential for their success and therefore for the long term survival of consulting companies. The aim of this book is to further advance our understanding of the nature of client consultant relationships. Building upon a critical discussion of the contributions and shortcomings of existing research, Natalia Nikolova proposes an innovative conceptual model which provides a critical yet constructive platform for the development of a more differentiated view of professional work. The framework concentrates on the cultural and political relations between clients and consultants during service production. It represents a prolific platform for further research and provides practitioners with an increased awareness of hitherto underexplored issues of client consultant relationships. This book is aimed at scholars of professional business service firms and those interested in multidisciplinary studies of human relations in general. It will also appeal to students interested in these areas and to clients and consultants involved in consulting projects.

Cross-Disciplinary Models and Applications of Database Management: Advancing Approaches Siau, Keng, 2011-12-31 Within a given enterprise database management involves the monitoring, administration and maintenance of the databases which constantly change with new technologies and new forms of data. Metamodelling for Software Engineering Cesar Gonzalez-Perez, Brian Henderson-Sellers, 2008-10-13 This book focuses on metamodelling as a discipline exploring its foundations, techniques and results. It presents a comprehensive metamodel that covers process, product and quality issues under a common framework. Issues covered include: An explanation of what metamodelling is and why it is necessary in the context of software engineering; Basic concepts and principles of traditional metamodelling and some existing results of this approach; Problems associated with traditional approaches to Metamodelling are discussed alongside an exploration of possible solutions and

alternative approaches Advanced topics such as the extension of the object oriented paradigm for metamodelling purposes or the foundations of powertype based tool development will be studied Finally a comprehensive case study is introduced and developed showing how to use many of the concepts explained in the previous chapters This book provides a comprehensive conceptual framework for metamodelling and includes case studies and exercises which will demonstrate practical uses of metamodelling For lecturers and educators the book provides a layered repository of contents starting from the basics of metamodelling in the first chapters through specific issues such as trans layer control or non strict approaches up to advanced topics such as universal powertyping or extensions to the object oriented paradigm The book also serves as an in depth reference guide to features and technologies to consider when developing in house software development methods or customising and adopting off the shelf ones Software tool developers and vendors can benefit from the book by finding in it a comprehensive guide to the implementation of frameworks and toolsets for computer aided software modelling and development
