Woodhead, 2018-01-19 Excerpt from *Industrial Colonies and Village Settlements for the Consumptive* Symonds and we together examined the patients sampled the climate and other conditions and argued with Unger and Ruedi Then for the second time came Hope more solid Hope Given a fairly early case and three years and recovery was in the offing And so we went on cheerfully with Davos But Davos was not for every one nor was every case an early one Then came the discovery that lower altitudes would do if certain conditions were obtained and so arose the great sanatorium movement But slowly we found that patients could not spend their lives in sanatoriums and one day on making my way up to one of them in England I met on the way patient after patient slouching along bored to death with themselves and with each other and even worse in morale than in body Better discipline and better notions of therapeutics mended some of that still I could not forget those listless saunterers and it became evident to some of us however unwillingly that Hope was drooping again The sanatorium was doing a great educative work no doubt but at the end of its four or six months what then To send the patient away with recommendations about light jobs and a regime was almost a mockery or quite What about the wage and the family to be supported The next lesson was brought home to me by a visit with other commissioners to certain cities concerning some such problems Before me now I see a gaunt hollow eyed man coughing and leaning against the wall as he tried to talk to us saying that his mates when he came out of the sanatorium good fellows as they were had bought him a milk that he might creep round and earn a bit The brave wife shawl on head and mill apron on had just come from the factory and apologised for the dirty house as well she might The poor thing was working all day at the factory to keep the wolf from the door All being dragged down together into the pit What is the value of a good house or a clean house if no wages What is there for the children And what is to stop the infection Who then would have the imagination the initiative the business capacity to lift this burden like lifting a world About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      **On Epilepsy and Epileptiform Seizures** Edward Henry Sieveking, 1858      **A Statistical Inquiry Into the Nature and Treatment of Epilepsy (Classic Reprint)** Alexander Hughes Bennett, 2015-07-09 Excerpt from *A Statistical Inquiry Into the Nature and Treatment of Epilepsy* The science of medicine is to be advanced by the careful collection of well recorded facts rather than by general statements or unsupported

assertions No inquiry thus conducted with scientific precision can fail to be without value and to add a mite to that store of positive knowledge from which must emanate all hopes of progress for the healing art Our acquaintance with the nature of epilepsy is as yet in its infancy and although much valuable practical information has been put on record regarding this disease it is believed that the following contribution may not be useless in either confirming or questioning previous conclusions The clinical aspects of epilepsy are especially difficult to investigate with exactitude The physician as a rule is not himself a witness to the chief phenomena characteristic of the disease He is therefore compelled in most cases to trust to the statements of the patient and his friends for their description and even when the cross examination is conducted with the greatest care there are many points impossible to ascertain with certainty About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works **The**
