Wealth Of The Commons A World Beyond Market And State:

The Wealth of the Commons David Bollier, Silke Helfrich, 2014-05-23 We are poised between an old world that no longer works and a new one struggling to be born Surrounded by centralized hierarchies on the one hand and predatory markets on the other people around the world are searching for alternatives The Wealth of the Commons explains how millions of commoners have organized to defend their forests and fisheries reinvent local food systems organize productive online communities reclaim public spaces improve environmental stewardship and re imagine the very meaning of progress and governance In short how they've built their commons In 73 timely essays by a remarkable international roster of activists academics and project leaders this book chronicles ongoing struggles against the private commoditization of shared resources often known as market enclosures while documenting the immense generative power of the commons The Wealth of the Commons is about history political change public policy and cultural transformation on a global scale but most of all it's about individual commoners taking charge of their lives and their endangered resources This fine collection makes clear that the idea of the Commons is fully international and increasingly fully worked out If you find yourself wondering what Occupy wants or if some other world is possible this pragmatic down to earth and unsentimental book will provide many of the answers Bill McKibben author of Deep Economy The Wealth of Communities and The Durable Future **Routledge**

Handbook of Food as a Commons Jose Luis Vivero-Pol, Tomaso Ferrando, Olivier De Schutter, Ugo Mattei, 2018-12-17 This Handbook provides the first comprehensive review and synthesis of knowledge and new thinking on how food and food systems can be thought interpreted and practiced around the old new paradigms of commons and commoning The overall aim is to investigate the multiple constraints that occur within and sustain the dominant food and nutrition regime and to explore how it can change when different elements of the current food systems are explored and re imagined from a commons perspective The book sparks the debate on food as a commons between and within disciplines with particular attention to spaces of resistance food sovereignty de growth open knowledge transition town occupations bottom up social innovations and organizational scales local food national policies South South collaborations international governance and multi national agreements Overall it shows the consequences of a shift to the alternative paradigm of food as a commons in terms of food the planet and living beings Chapters 1 and 24 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license [The Ecosocial Transition of Societies](#) Aila-Leena Matthies, Kati Närhi, 2016-10-04 This groundbreaking book both explains and expands the growing debate on ecological environmental social work at the global level In order to achieve this the book strengthens the environmental paradigm in social work and social policy by undertaking further research on theoretical and conceptual clarification as well as distinct reflections on its practical directions Divided into five parts concepts the impact of environmental crises sustainable communities and lifestyles food politics and the profession in

transition this work's main objective is to place ecological social work as a part of the more comprehensive and interdisciplinary eco-social transition of societies towards sustainability balancing economic and social development with the limited resources of the natural environment. By focussing on these five core concepts it shows how social work and social policy contribute to this transition through having a research-based approach and orientation on solutions rather than problem analysis. The book will be of interest to scholars from a broad range of disciplines including those in social work and social policy, sustainability, economics, agriculture and environmental studies.

Routledge Handbook of Sustainability and Fashion Kate Fletcher, Mathilda Tham, 2014-08-21 The clothing industry employs 25 million people globally contributing to many livelihoods and the prosperity of communities to women's independence and the establishment of significant infrastructures in poorer countries. Yet the fashion industry is also a significant contributor to the degradation of natural systems with the associated environmental footprint of clothing high in comparison with other products. Routledge Handbook of Sustainability and Fashion recognizes the complexity of aligning fashion with sustainability. It explores fashion and sustainability at the levels of products, processes and paradigms and takes a truly multi-disciplinary approach to critically question and suggest creative responses to issues of Fashion in a post-growth society. Fashion diversity and equity, Fashion fluidity and balance across natural, social and economic systems. This handbook is a unique resource for a wide range of scholars and students in the social sciences, arts and humanities interested in sustainability and fashion.

Proleptic Leadership on the Commons Randal Joy Thompson, 2020-10-22 Will capitalism give way to a commons-centric society as many scholars and activists predict? Viewing the commons as a vehicle for a new world order, Randal Joy Thompson proposes proleptic leadership, which envisions how leaders will continue to be essential as the custodians of responsible agency and conscious choice.

Moving Beyond Capitalism Cliff DuRand, 2016-09-26 The book speaks to the widespread quest for concrete alternative ways forward beyond capitalism in the face of the prevailing corporatocracy and a capitalist system in crisis. It examines a number of institutions and practices now being built in the nooks and crannies of present societies and that point beyond capitalism toward a more equal, participatory and democratic society: institutions such as cooperatives, public banks, the commons, economic democracy. This seminal collection of critical studies draws on academic and activist voices from the U.S. and Canada, Mexico, Cuba and Argentina and from a variety of theoretical, political perspectives: Marxism, anarchism, feminism and Zapatismo.

Protecting Future Generations Through Commons Saki Bailey, Gilda Farrell, Ugo Mattei, Salvatore Settis, Michele Spanò, Anna Di Robilant, Tine de Moor, Gustavo Zagrebelsky, Héloïse Miéreau, Burns H. Weston, David Bollier, Filippo Valguarnera, Andrea Baranes, Tommaso Fattori, Mayo Fuster Morell, Luigi Russi, 2013 The recent austerity measures currently adopted in numerous European countries assume that a rise in public debt should automatically result in cuts to social programmes and the privatisation of inefficiently managed resources. This type of reasoning is being used to justify the destruction of social rights of citizens for the profit of the private sector, resulting in more limited access to

the most fundamental resources such as water nature housing culture knowledge and information mainly for the most vulnerable members of society Such a view informed solely by short term growth and profit cycles is endangering access to those resources not only for current generations but for future ones as well This book is an attempt to go beyond liberal approaches to intergenerational and distributive justice It emphasises the role of commons and communities of the commons driven by the desire to defend and perpetuate those fundamental resources under the threat of expropriation by the state and the market This book also offers policy makers and citizens who wish to accept their political responsibility by being active and refusing corporate ideology some best practices as well as methods and solutions for renewing the configurations of societal relationships through commons thereby integrating the interests of future generations in the European Community s decision making processes and institutions This is a contribution by the Council of Europe and the International University College of Turin to the protection of the dignity of every person especially of those who even though unable to enjoy existing social rights have the right to benefit from choices and policies that ensure that human life remains unspoiled
