Chasing Literacy Daniel Keller, 2013-12-15 Arguing that composition should renew its interest in reading pedagogy and research Chasing Literacy offers writing instructors and literacy scholars a framework for understanding and responding to the challenges posed by the proliferation of interactive and multimodal communication technologies in the twenty first century Employing case study research of student reading practices Keller explores reading writing connections in new media contexts He identifies a culture of acceleration a gathering of social educational economic and technological forces that reinforce the values of speed efficiency and change and challenges educators to balance new faster literacies with traditional slower literacies In addition Keller details four significant features of contemporary literacy that emerged from his research accumulation and curricular choices literacy perceptions speeds of rhetoric and speeds of reading Chasing Literacy outlines a new reading pedagogy that will help students gain versatile dexterous approaches to both reading and writing and makes a significant contribution to this emerging area of interest in composition theory and practice

Globalization and Literature Suman Gupta, 2013-04-30 This book presents a state of the art overview of the relationship between globalization studies and literature and literary studies and the bearing that they have on each other It engages with the manner in which globalization is thematized in literary works examines the relationship between globalization theory and literary theory and discusses the

impact of globalization processes on the production and reception of literary texts Suman Gupta argues that while literature has registered globalization processes in relevant ways there has been a missed articulation between globalization studies and literary studies Examples are given of some of the ways in which this slippage is now being addressed and may be taken forward taking up such themes as the manner in which anti globalization protests and world cities have figured in literary works the ways in which theories of postmodernism and postcolonialism familiar in literary studies have diverged from and converged with globalization studies and how industries to do with the circulation of literature are becoming globalized This book is intended for university level students and teachers researchers and other informed readers with an interest in the above issues and serves as both a survey of the field and an intervention within it Reading Typographically Geoffrey Turnovsky, 2024-06-18 Anxieties about the fate of reading in the digital age reveal how deeply our views of the moral and intellectual benefits of reading are tied to print These views take root in a conception of reading as an immersive activity exemplified by the experience of losing oneself in a book Against the backdrop of digital distraction and fragmentation such immersion leads readers to become more focused collected and empathetic How did we come to see the printed book as especially suited to deliver this experience Print based reading practices have historically included a wide range of modes not least the disjointed scanning we associate today with electronic text In the context of religious practice literacy's benefits were presumed to lie in such random access retrieval facilitated by indexical tools like the numbering of Biblical chapters and verses It was this didactic hunt and peck reading that bound readers to communities Exploring key evolutions in print in 17th and 18th century France from typeface print runs and format to punctuation and the editorial adaptation of manuscript and oral forms in print this book argues that typographic developments upholding the transparency of the printed medium were decisive for the ascendancy of immersive reading as a dominant paradigm that shaped modern perspectives on reading and literacy *From Smartphones to Social Media* Mark Carrier, 2018-10-18 This book examines how technology such as smartphones computers and the internet shape our physical health cognitive and psychological development and interactions with one another and the world around us Technology has become a ubiquitous part of modern life but its impact on our physical psychological and social health and development runs just as deep as does our dependence upon it How is the development of babies brains affected by their playing with their parents smartphones and tablets How have computers altered the way we process and learn information How have texting and social networking sites such as Facebook changed the way in which we interact with others Can online dating lead to meaningful real world relationships From Smartphones to Social Media investigates these questions and many complex issues related to technology Readers will discover what researchers know about how the use of technology affects us through accessibly written thematic chapters The main text is complemented by a collection of case studies and interviews with a variety of experts providing insight into how technology's positive and negative effects manifest in our everyday lives and what we can do to mediate the negative ones Strategies
