Labor and the Locavore Margaret Gray, 2013-10-25 In the blizzard of attention around the virtues of local food production food writers and activists place environmental protection animal welfare and saving small farms at the forefront of their attention Yet amid this turn to wholesome and responsible food choices the lives and working conditions of farmworkers are often an afterthought *Labor and the Locavore* focuses on one of the most vibrant local food economies in the country the Hudson Valley that supplies New York restaurants and farmers markets Based on more than a decade s in depth interviews with workers farmers and others Gray s examination clearly shows how the currency of agrarian values serves to mask the labor concerns of an already hidden workforce She also explores the

historical roots of farmworkers predicaments and examines the ethnic shift from Black to Latino workers With an analysis that can be applied to local food concerns around the country this book challenges the reader to consider how the mentality of the alternative food movements implies a comprehensive food ethic that addresses workers concerns Dangerous Digestion E. Melanie DuPuis, 2015-12 Throughout American history ingestion eating has functioned as a metaphor for interpreting and imagining this society and its political systems Discussions of American freedom itself are pervaded with ingestive metaphors of choice what to put in and control what to keep out From the country s founders to the abolitionists to the social activists of today those seeking to form and reform American society have cast their social change goals in ingestive terms of choice and control But they have realized their metaphors in concrete terms as well purveying specific advice to the public about what to eat or not These conversations about social change as eating reflect American ideals of freedom purity and virtue Drawing on social and political history as well as the history of science and popular culture Dangerous Digestion examines how American ideas about dietary reform mirror broader thinking about social reform Inspired by new scientific studies of the human body as a metabiome a collaboration of species rather than an isolated intact protected and bounded individual E Melanie DuPuis invokes a new metaphor digestion to reimagine the American body politic opening social transformations to ideas of mixing fermentation and collaboration In doing so the author explores how social activists can rethink politics as inclusive processes that involve the inherently risky mixing of cultures standpoints and ideas Agrarian Dreams Julie Guthman, 2014-07-11 Agrarian Dreams throws a cold shower of reality over the dream of organic agriculture in California demonstrating all that is lost when organic farming goes industrial This is a challenging book and until we can answer the hard questions Julie Guthman poses a genuinely sustainable agriculture will elude us Michael Pollan author of *The Botany of Desire* A Plant s Eye View of the World Agrarian Dreams puts organic agriculture in a broad intellectual social and theoretical context in a readable way Nobody has written at this scale and scope about organics The availability of this basic data and interpretation will open discussion to a broad range of citizens scholars and decision makers This is an outstanding work Sally K Fairfax Henry J Vaux Distinguished Professor of Forest Policy University of California Berkeley Guthman takes on the sacred cow of organic agriculture that farmers and consumers can transform our food system simply through by adopting new philosophies of eating farming and nature With an analysis that is at the forefront of agrarian theory today she shows that organic farmers no matter what their philosophy have to work under the economic gun of markets and land prices As a result organic growers in California are forced to become increasingly industrialized unjust and unhealthy Her analysis is proof that it will take more than new kinds of thinking to create sustainability in our food system Melanie DuPuis author of *Nature s Perfect Food* How Milk Became America s Drink

Food Insecurity, the Obesity Crisis, and Exploitation in the US Food System Clement Loo,Robert A. Skipper, Jr.,2017-07-02 This book argues that the factors contributing to obesity as a product of food insecurity have risen largely from the exploitation of vulnerable communities In the past food insecurity has been understood as primarily a matter of famine hunger and undernutrition Such an understanding is no longer accurate food insecurity is now also associated with obesity the rates of which have increased dramatically in the past thirty years particularly among lower income communities and communities of color This is likely the result of changes in the food system including the reduction of access to fresh produce Governments and intergovernmental bodies are therefore justified in more vigorously and directly intervening in the

food system to ensure that communities have access to foods that contribute to better public health outcomes Food Justice and Narrative Ethics Beth A. Dixon, 2019 Beth A Dixon explores how food justice impacts on human lives Stories and reports in national media feature on the one hand hunger famine and food scarcity and on the other rising rates of morbid obesity and health issues Other stories food justice narratives illustrate how to correct the ethical damage created by the first type of story They detail the nature of oppression and structural injustice and show how these conditions constrain choices truncate moral agency and limit opportunities to live well With stories from national media food and farming memoirs and scholarly ethnographies Dixon reveals how different food narratives are constructed and enable identification of just solutions to issues surrounding food insecurity farm labor and the lived experience of obesity Drawing on Aristotle s concept of ethical perception Dixon demonstrates how we can use narratives to enhance our understanding and ethical competence about injustice in relation to food Food Justice and Narrative Ethics is a must read for students of food studies philosophy and media studies Bloomsbury Publishing
