Smith,2016-10-18 Reparation and Reconciliation is the first book to reveal the nineteenth century struggle for racial integration on U S college campuses As the Civil War ended the need to heal the scars of slavery expand the middle class and reunite the nation engendered a dramatic interest in higher education by policy makers voluntary associations and African Americans more broadly Formed in 1846 by Protestant abolitionists the American Missionary Association united a network of colleges open to all designed especially to educate African American

and white students together both male and female The AMA and its affiliates envisioned integrated campuses as a training ground to produce a new leadership class for a racially integrated democracy Case studies at three colleges Berea College Oberlin College and Howard University reveal the strategies administrators used and the challenges they faced as higher education quickly developed as a competitive social field Through a detailed analysis of archival and press data Christi M Smith demonstrates that pressures between organizations including charities and foundations and the emergent field of competitive higher education led to the differentiation and exclusion of African Americans Appalachian whites and white women from coeducational higher education and illuminates the actors and the strategies that led to the persistent salience of race over other social boundaries

Human Development and Capabilities Alejandra Boni, Melanie Walker, 2013-04-12 Globally universities are the subject of public debate and disagreement about their private benefits or public good and the key policy vehicle for driving human capital development for competitive knowledge economies Yet what is increasingly lost in the disagreements about who should pay for university education is a more expansive imaginary which risks being lost in reductionist contemporary education policy This is compounded by the influences on practices of students as consumers of a university education as a private benefit and not a public good of human capital outcomes over other graduate qualities and of unfettered markets in education Policy reductionism comes from a narrow vision of the activities products and objectives of the University and a blinkered vision of what is a knowledge society Human Development and Capabilities therefore imaginatively applies a theoretical framework to universities as institutions and social practices from human development and the capability approach attempting to show how universities might advance equalities rather than necessarily widen

them and how they can contribute to a sustainable and democratic society Picking through the capability approach for human development in relation to Universities this book highlights and explores three main ideas theoretical insights to advance thinking about human development and higher education Policy implications for the responsibilities and potential contributions of universities in a period of significant global change Operationalising a New Imaginary This fresh take on the work and purpose of the University is essential reading for anyone interested in university education capability approach and human development particularly postgraduates University policy makers researchers and academics in the field of higher education

Sex between Body and Mind Katie Sutton, 2019-11-25 Ideas about human sexuality and sexual development changed dramatically across the first half of the 20th century As scholars such as Magnus Hirschfeld Iwan Bloch Albert Moll and Karen Horney in Berlin and Sigmund Freud Wilhelm Stekel and Helene Deutsch in Vienna were recognized as leaders in their fields the German speaking world quickly became the international center of medical scientific sex research and the birthplace of two new and distinct professional disciplines sexology and psychoanalysis This is the first book to closely examine vital encounters among this era s German speaking researchers across their emerging professional and disciplinary boundaries Although psychoanalysis was often considered part of a broader sexual science sexologists increasingly distanced themselves from its mysterious concepts and clinical methods Instead they turned to more pragmatic interventionist therapies in particular to the burgeoning field of hormone research which they saw as crucial to establishing their own professional relevance As sexology and psychoanalysis diverged heated debates arose around concerns such as the sexual life of the child the origins and treatment of homosexuality and transgender phenomena and female frigidity This new story of the emergence of two separate approaches to the study of sex demonstrates that the distinctions between them were always part of a dialogic and competitive process It fundamentally revises our understanding of the production of modern sexual subjects

Poor Representation Kristina C. Miler, 2018-09-20 The poor are grossly underrepresented in Congress both overall and by individual legislators even those who represent high poverty districts

Broadcasting Empire Simon J. Potter, 2012-07-05 Broadcasting was born just as the British empire reached its greatest territorial extent and matured while that empire began to unravel Radio and television offered contemporaries the beguiling prospect that new technologies of mass communication might compensate for British imperial decline In *Broadcasting Empire* Simon J Potter shows how from the 1920s the BBC used broadcasting to unite audiences at home with the British settler diaspora in Canada Australia New Zealand and South Africa High culture royal ceremonial sport and even comedy were harnessed to this end particularly on the BBC Empire Service the predecessor of today s World Service Belatedly during the 1950s the BBC also began to consider the role of broadcasting in Africa and Asia as a means to encourage development and to combat resistance to continued colonial rule However during the 1960s as decolonization entered its final accelerated phase the BBC staged its own imperial retreat This is the first full length scholarly study to examine both the home and overseas aspects of the BBC s imperial

mission Drawing on new archival evidence it demonstrates how the BBC's domestic and imperial roles while seemingly distinct in fact exerted a powerful influence over one another *Broadcasting Empire* makes an important contribution to our understanding of the transnational history of broadcasting emphasising geopolitical rivalries and tensions between British and American attempts to exert influence on the world's radio and television systems
