This PhD sought to determine the mechanisms for the reactor explosions by mapping collecting and analysing samples from
across the area of Japan that received radioactive fallout from the explosions In doing this the author conducted significant
fieldwork in the restricted access fallout zone using ground and novel UAV based mapping of radiation to identify hot spot
areas for sample collecting but also using these tools to verify the efficacy of the clean up operations ongoing in the
prefecture Such fieldwork was both technically pioneering for its use of UAVs drones but also selfless in terms of bravely
entering a nuclear danger area to collect samples for the greater benefit of the scientific community Readers' Guide to
