

GUITAR AMPLIFIER

G100-B212

 **YAMAHA**

The G100-B212 amplifier is ideal for lead, rhythm and steel guitar. It has the exceptional tonality of Yamaha's popular G100-212 because it utilizes the same 100-Watt power amplifier and twin 12" speakers. Also, like the versatile G100-212, there are HIGH and LOW sensitivity input jacks, BASS, MIDDLE and TREBLE tone controls, REVERB, and variable DISTORTION and BRIGHT controls. In addition, the G100-B212 has a second input channel with its own HIGH and LOW jacks, VOLUME control, BRIGHT switch and tone controls. The two input channels provide tremendous flexibility; one channel can be set up for lead guitar, and the other perfectly balanced for a rhythm part. Moreover, because the HIGH and LOW jacks of either channel may be used together, the G100-B212 actually has a 4-input simultaneous capacity. In the studio or on the stage, the compact G100-B212 is hard to beat.

All controls and inputs are front-panel mounted for

visibility and convenience. The rear panel contains a RECORDING OUTPUT jack, REVERB and DISTORTION foot-switch jacks, an AC accessory outlet and dual power supply fuses. Made to withstand the roughest handling, the sturdily constructed cabinet has metal reinforced corners and is covered with a durable leatherette covering. Because Yamaha pays attention to details, like the built-in Accutronics reverb and the easy-rolling casters, you can pay attention to your playing.

The G100-B212 is a highly refined amplifier; play it easy and the music is mellow, or play it hard and listen to it slide into pleasant, natural distortion. By working closely with professional musicians, Yamaha engineers have developed an all solid-state amplifier that really captures the warmth of vacuum tubes without sacrificing the reliability, economy and portability of transistors. Yamaha guitar amplifiers are the performer's performers.
