Unfolding Stakeholder Thinking Jörg Andriof, Sandra Waddock, Bryan Husted, Sandra Sutherland Rahman, 2017-09-08 This book the first of a two volume series argues that today stakeholder thinking has evolved into the study of interactive mutually engaged and responsive relationships that establish the very context of doing modern business and create the groundwork for transparency and accountability This book makes it clear that in today s societies successful companies are those that recognize that they have responsibilities to a range of stakeholders that go beyond mere compliance with the law or meeting the fiduciary responsibility inherent in maximizing returns to shareholders If in the past the focus was on enhancing shareholder value now it is on engaging stakeholders for long term value creation The process of engagement creates a dynamic context of interaction mutual respect dialogue and change not a one sided management of stakeholders Indeed the authors believe the very term stakeholder management to be outdated and corporate centric Companies can manage their relationships with stakeholders but frequently cannot actually manage the stakeholders themselves because as the activist and collaborative initiatives described in this volume suggest company stakeholder relationships are not one way streets and different institutions bring different agendas goals and priorities to the engagement There are clear implications to the way in which stakeholder thinking is unfolding today If in the past corporate social responsibility was simply seen as profitability plus compliance plus philanthropy now responsible corporate citizenship or corporate responsibility means companies being more aware of and understanding the societies in which they operate Corporate responsibility means recognising that day to day operating practices affect stakeholders and that it is in those impacts where responsibility lies not merely in efforts to do good Companies are now faced with a wide array of challenges that mean that senior executives and managers need to be able to deal with issues including greater accountability human rights abuses sustainability

strategies corporate governance codes workplace ethics stakeholder consultation and management Stakeholder thinking needs to capture these new realities The global reach of multinational corporations has served to highlight the need for the re integration of business into society relationships into stakeholder relations and ethics into managerial practice The rise in power of global activism involving NGOs and global business involving multinational corporations makes it even more critical today for companies to consider the power and interests of corporate stakeholders when developing strategic plans The interactivity and mutuality of relationships described in this book make it clear that firms and stakeholders share the power and responsibility to influence both the profit potential of the firm and how the benefits of the firm s success impact on society This important volume brings together leading academic thought on stakeholder thinking for the first time Unfolding Stakeholder Thinking will be indispensable to corporate managers NGOs and academics seeking greater understanding of the dynamics of stakeholder thinking in a world of rapidly changing responsibilities A companion volume Unfolding Stakeholder Thinking 2 focusing on practical issues such as relationship management communication reporting and performance is also available Stakeholders, the Environment and Society Sanjay Sharma, Mark Starik, 2004-01-01

The role of stakeholders is integral to corporate sustainability as society increasingly demands that corporations play a role in achieving environmental objectives in addition to building shareholder wealth In this the first book to gather cutting edge

The Spirit of Project Management Dr Judi Neal, Mr Alan Harpham, 2012-08-01 Projects have always been essentially human endeavours Large modern projects are generally highly complex fraught with technical difficulties and supported by diverse often apparently conflicted stakeholders The spirituality that originally defined some of the great construction projects of the classical era surely has a role in project management today The Spirit of Project Management explains the context for spirituality in projects and explores how it can be used to create a larger sense of purpose and achievement to help encourage an esprit de corps amongst all those involved to act as a touchstone for ethical and sustainable decision making This is a very pragmatic book The first part includes an explanation and a variety of useful models for understanding the significance and value of spirituality in projects Judi Neal and Alan Harpham devote the second part of the book to help you integrate these ideas into your day to day management of projects Thus there are chapters on spirituality from the perspective of the individual the project team the project organization and even project management within a sustainable world framework Read this book use the ideas to help you articulate your projects engage and sustain your project team and your stakeholders and frame how you work in terms of your organisation society and the environment **Building**
