Accelerating Social Change Luigi Morelli, 2021-11-03 Social change is more than a political statement or demand it is a moral and spiritual imperative If this is so then it involves the whole human being in the way he perceives and thinks feels and relates and acts on and impacts the world This work gathers the threads of pioneers and visionaries in various aspects of social and cultural renewal Paradigms of include and transcend offer us paths along which the personal and the global are intimately intertwined Through established pathways and processes we can experiment with new ways of being as we impact our immediate world Practically speaking this book explores three avenues to change At a first level we can start to recognize that society is built around three poles Besides the public and private sectors civil society has emerged to play a crucial role and alter dualistic thinking If we think beyond capitalism and socialism and all their variations and combinations new unthought of frontiers and possibilities emerge It is possible to expand our practice of democracy beyond the majority minority dynamics to the inclusion of all stakeholders A new art and science of civic collaboration can break the gridlocks of polarization and opposition We can engage in a new area of honest energetic collaboration moving beyond weak compromise through an array of social tools that have grown in the last forty to fifty years and have now reached full maturity Lastly we can expand organizational and social forms in ways that completely break away from the past We can reconcile both entrepreneurial and participatory paradigms and transcend top down or bottom up models in ways that our intellect alone cannot fathom Paradigms offer generous visions but are also exacting masters The new revolution will request as much of ourselves as we will request of the world

Litfin, 2014-01-15 In a world of dwindling natural resources and mounting environmental crisis who is devising ways of living that will work for the long haul And how can we as individuals make a difference To answer these fundamental questions Professor Karen Litfin embarked upon a journey to many of the world's ecovillages intentional communities at the cutting edge of sustainable living From rural to urban high tech to low tech spiritual to secular she discovered an under the radar global movement making positive and radical changes from the ground up In this inspiring and insightful book Karen Litfin shares her unique experience of these experiments in sustainable living through four broad windows ecology economics community and consciousness or E2C2 Whether we live in an ecovillage or a city she contends we must incorporate these four key elements if we wish to harmonize our lives with our home planet Not only is another world possible it is already being born in small pockets the world over These micro societies however are small and time is short Fortunately as Litfin persuasively argues their successes can be applied to existing social structures from the local to the global scale providing sustainable ways of living for generations to come You can learn more about Karen's experiences on the Ecovillages website <http://ecovillagebook.org> Legal Secrets Kim Lane Scheppele, 1988 Does the seller of a house have to tell the buyer that the water is turned off twelve hours a day Does the buyer of a great quantity of tobacco have to inform the seller that the military blockade of the local port which had depressed tobacco sales and lowered prices is about to end Courts say yes in the first case no in the second How can we understand the difference in judgments And what does it say about whether the psychiatrist should disclose to his patient's girlfriend that the patient wants to kill her Kim Lane Scheppele answers the question Which secrets are legal secrets and what makes them so She challenges the economic theory of law which argues that judges decide cases in ways that maximize efficiency and she shows that judges use equality as an important principle in their decisions In the course of thinking about secrets Scheppele also explores broader questions about judicial reasoning how judges find meaning in legal texts and how they infuse every fact summary with the values of their legal culture Finally the specific insights about secrecy are shown to be consistent with a general moral theory of law that indicates what the content of law should be if the law is to be legitimate a theory that sees legal justification as the opportunity to attract consent This is more than a book about secrets It is also a book about the limits of an economic view of law Ultimately it is a work in constructive legal theory one that draws on moral philosophy sociology economics and political theory to develop a new view of legal interpretation and legal morality Papers and Proceedings of the ...
