Weapons Of Warre The Armaments Of The Mary Rose:

Weapons of Warre Alexzandra Hildred,2011 Providing a complete overview of the ordnance and munitions of the Mary Rose Weapons of Warre presents a detailed consideration of the ship as a fighting unit *Weapons of Warre* Dominic Fontana,2011

Bosworth 1485 Glenn Foard,Anne Curry,2013-08-22 Bosworth stands alongside Naseby and Hastings as one of the three most iconic battles ever fought on English soil The action on 22 August 1485 brought to an end the dynastic struggle known as the Wars of the Roses and heralded the dawn of the Tudor dynasty However Bosworth was also the most famous lost battlefield in England Between 2005 and 2010 the techniques of battlefield archaeology were used in a major research programme to locate the site Bosworth 1485 a battlefield rediscovered is the result Using data from historical documents landscape archaeology metal detecting survey ballistics and scientific analysis the volume explores each aspect of the investigation from the size of the armies their weaponry and the battlefield terrain to exciting new evidence of the early use of artillery in order to identify where and how the fighting took place Bosworth 1485 provides a fascinating and intricately researched new perspective on the event which perhaps more than any other marked the transition between medieval and early modern England

The Warship Mary Rose David Childs,2014-04-30 This new paperback edition brings the history of Henry VIII s famous warship right up to date with new chapters on the stunning presentation of the hull and the 19 000 salvaged artefacts in the new museum in Portsmouth Mary Rose has along with HMS Victory become an instantly recognisable symbol of Britain s maritime past while the extraordinary richness of the massive collection of artefacts gleaned from the wreck has meant that the ship has acquired the status of some sort of time capsule as if it were a Tudor burial site But she is much more than an archaeological relic she was a warship and a revolutionary one that served in the King s navy for thirty four years almost the entire length of his reign This book tells the story of her eventful career placing it firmly within the colourful context of Tudor politics court life and the developing administration of a permanent navy And though the author also brings the story right down to the present day with chapters on the recovery the fresh ideas and information thrown up by the massive programme of archaeological work since undertaken and the new display just recently opened at Portsmouth Historic Dockyard it is at heart a vivid retelling of her career and at the end her dramatic sinking With this fine narrative and the beautiful illustrations the book will appeal to the historian and enthusiast and also to the general reader and museum visitor

1545: Who Sank the Mary Rose? Peter Marsden,2019-02-28 A wonderful account of the raising of a sixteenth century warship and answers to the long running mysteries surrounding her loss Naval Historical Foundation In 1982 a Tudor Navy warship was raised in a major salvage project that represented a landmark in maritime archaeology The Mary Rose had spent over four centuries underwater and contained the skeletons of numerous sailors as well as many fascinating artifacts of the time She is more than a relic however She has a story to tell and her sinking in the Solent while under attack by the French and the reasons for it have intrigued historians for generations With the benefit of access to her

remains archaeologists have been able to slowly unravel the mystery of her foundering on a calm summer s day in July 1545 This new book by a leading expert on the Mary Rose contains much information that is published for the first time It provides the first full account of the battle in which Henry VIII s warship was sunk and tells the stories of the English and French admirals It examines the design and construction of the ship and how she was used and finally makes clear who was responsible for the loss of the Mary Rose after describing what happened onboard deck by deck in her last moments afloat Includes photographs

Medieval Warfare: Technology, Military Revolutions, and Strategy Clifford J. Rogers, 2024-08-06

This volume explores the topics of military revolutions strategy and tactics both separately and as they relate to each other It makes important contributions to understanding European warfare in the Early High and especially the Late Middle Ages as well the military transition to the Early Modern Period Readers will find detailed analysis of how technological and non technological developments interacted to effect major changes in how wars were fought across the period The evolution and capabilities of the English longbow and of early gunpowder artillery are examined in depth Changes in the tools of war naturally affected plans to employ those tools to achieve political ends military strategy but strategy was never dictated by technology That point is illustrated by examinations of English efforts to conquer Wales the Anglo Burgundian alliance of the late Hundred Years War and the economic factors shaping medieval conquests in general The nine studies in the volume have all been published previously but a new introduction shows how they fit together particularly explaining how they collectively rebut common critiques of Rogers s controversial thesis that European warfare was reshaped by the Infantry and Artillery Revolutions during the era of the Hundred Years War Two of the chapters have been substantially expanded so that the versions printed here should be the ones consulted and cited in the future by scholars of medieval warfare and military revolutions

Sveti Pavao Shipwreck Carlo Beltrame, Sauro Gelichi, Igor Miholjek, 2014-07-31

Between 2007 and 2012 the Department for Underwater Archaeology of the Croatian Conservation Institute from Zagreb and the Department of Humanistic Studies of the Ca Foscari University of Venice collaborated in the recording underwater excavation and analysis of the unusually well preserved wreck of a 16th century Venetian merchantman in the Svetti Pavao shallow off the southern shore of the island of Mljet Croatia The shipwreck preserved many personal possessions of the crew as well as a number of bronze artillery pieces and the remains of a cargo of luxury and richly decorated ceramic material from Iznik and other oriental workshops Although the excavation is not complete this volume presents the results of the project so far The methodological and technical aspects of the underwater investigation of the site mainly by photogrammetry are described the historical and archaeological context of navigation in the late Medieval period in the eastern Mediterranean discussed and the recovered artefacts described and catalogued in detail together with the remains of the ship and its equipment that because of depth and of problems of conservation have been left in situ The conservation and restoration of the finds are described in an appendix

IKUWA6. Shared Heritage: Proceedings of the Sixth International Congress for

Underwater Archaeology Jennifer A. Rodrigues, Arianna Traviglia, 2020-09-03 Celebrating the theme Shared heritage this volume presents the peer reviewed proceedings from IKUWA6 the 6th International Congress for Underwater Archaeology Fremantle 2016 Papers offer a stimulating diversity of themes and niche topics of value to maritime archaeology practitioners researchers students museum professionals and more *The Archaeology of Manila Galleons in the American Continent* Scott S. Williams, Roberto Junco, 2021-07-26 This is the first book devoted to the topic of Manila galleon shipwrecks in North America previous research on Manila galleons either has focused on the economics of the Manila galleon trade or has been limited to reports of the galleon wreck sites in the western Pacific salvaged for their cargoes All three North American shipwrecks are protected under the historic preservation laws of the United States or Mexico and each shipwreck site has been investigated by professional archaeologists seeking to answer research questions posed in peer reviewed research designs The majority of Manila galleon wrecks are found in the western Pacific and were salvaged by treasure hunters rather than recovered by archaeologists The three North American shipwrecks represent the most protected Manila galleon archaeological sites so their potential for future archaeological research is higher than for many of the extant shipwrecks of the western Pacific **The Heirs of Archimedes** Brett D. Steele, Tamera Dorland, 2005 Essays analyze the connections between science and technology and military power in the late medieval Renaissance and Enlightenment periods The integration of scientific knowledge and military power began long before the Manhattan Project In the third century BC Archimedes was renowned for his research in mechanics and mathematics as well as for his design and coordination of defensive siegecraft for Syracuse during the Second Punic War This collection of essays examines the emergence during the early modern era of mathematicians chemists and natural philosophers who along with military engineers navigators and artillery officers followed in the footsteps of Archimedes and synthesized scientific theory and military practice It is the first collaborative scholarly assessment of these early military scientific relationships which have been long neglected by scholars both in the history of science and technology and in military history From a historical perspective this volume investigates the deep connections between two central manifestations of Western power examining the military context of the Scientific Revolution and the scientific context of the Military Revolution Unlike the classic narratives of the Scientific Revolution that focus on the theories of and conflicts between Aristotelian and Platonic worldviews this volume highlights the emergence of the Archimedean ideal in which a symbiosis exists between the supply of mechanistic science and the demand for military capability From a security studies perspective this work presents an in depth study of the central components of military power as well as their dynamic interactions in the political acquisitional operational and tactical domains The essays in this volume reveal the intellectual and cultural struggles to enhance the capabilities of these components an exercise in transforming military power that remains relevant for today's armed forces The volume sets the stage by examining the innovation of gunpowder weaponry in both the Christian and the Islamic states of the late medieval and Renaissance eras It

then explores such topics as the cultural resistance to scientific techniques and the relationship between early modern science and naval power particularly the intersecting developments in mathematics and oceanic navigation Other essays address the efforts of early practitioners and theorists of chemistry to increase the power and consistency of gunpowder The final essays analyze the application of advanced scientific knowledge and Enlightenment ideals to the military engineering and artillery organizations of the eighteenth century The volume concludes by noting the global spread of the Archimedean ideal during the nineteenth century as an essential means for resisting Western imperialism **A Maritime Archaeology**

of Ships J. R. Adams, 2013-12-11 In the last fifty years the investigation of maritime archaeological sites in the sea in the coastal zone and in their interconnecting locales has emerged as one of archaeology's most dynamic and fast developing fields No longer a niche interest maritime archaeology is recognised as having central relevance in the integrated study of the human past Within maritime archaeology the study of watercraft has been understandably prominent and yet their potential is far from exhausted In this book Jon Adams evaluates key episodes of technical change in the ways that ships were conceived designed built used and disposed of As technological puzzles they have long confounded explanation but when viewed in the context of the societies in which they were created mysteries begin to dissolve Shipbuilding is social practice and as one of the most complex artefacts made changes in their technology provide a lens through which to view the ideologies strategies and agency of social change Adams argues that the harnessing of shipbuilding was one of the ways in which medieval society became modern and while the primary case studies are historical he also demonstrates that the relationships between ships and society have key implications for our understanding of prehistory in which seafaring and communication had similarly profound effects on the tide of human affairs **The Medieval Crossbow** Stuart

Ellis-Gorman, 2022-07-20 An in depth illustrated history and technical study of this iconic weapon of the Middle Ages The crossbow is an iconic weapon of the Middle Ages and alongside the longbow one of the most effective ranged weapons of the pre gunpowder era Unfortunately despite its general fame it has been decades since an in depth history of the medieval crossbow has been published which is why Stuart Ellis Gorman's detailed accessible and highly illustrated study is so valuable The Medieval Crossbow approaches the history of the crossbow from two directions The first is a technical study of the design and construction of the medieval crossbow the many different kinds of crossbows used during the Middle Ages and finally a consideration of the relationship between crossbows and art The second half of the book explores the history of the crossbow from its origins in ancient China to its decline in sixteenth century Europe Along the way it explores the challenges in deciphering the crossbow's early medieval history as well as its prominence in warfare and sport shooting in the High and Later Middle Ages This fascinating book brings together the work of a wide range of accomplished crossbow scholars and incorporates the author's own original research to create an account of the medieval crossbow that will appeal to anyone looking to gain an insight into one of the most important weapons of the Middle Ages **The Naval Miscellany**

Brian Vale,2017-07-14 Brian Vale is a naval historian with degrees from Keele and King s College London A life long member of the Society for Nautical Research and the Navy Records Society he has long specialised in Anglo South American maritime history His books include *Independence or Death British sailors and Brazilian Independence A Frigate of King George The Audacious Admiral Cochrane and Cochrane in the Pacific Fortune and Freedom in Spanish America The Oxford Handbook of Maritime Archaeology* Alexis Catsambis,Ben Ford,Donny L. Hamilton,2014-02 This title is a comprehensive survey of maritime archaeology as seen through the eyes of nearly fifty scholars at a time when maritime archaeology has established itself as a mature branch of archaeology

Tudor Sea Power David Childs,2009-09-17 In the sixteenth century England turned from being an insignificant part of an offshore island into a nation respected and feared in Europe This was not achieved through empire building conquest large armies treaties marriage alliances trade or any of the other traditional means of exercising power Indeed England was successful in few of these Instead she based her power and eventual supremacy on the creation of a standing professional navy which firstly would control her coasts and those of her rivals and then threaten their trade around the world This emergence of a sea power brought with it revolutionary ship designs and new weapon fits all with the object of making English warships feared on the seas in which they sailed Along with this came the absorption of new navigational skills and a breed of sailor who fought for his living Indeed the English were able to harness the avarice of the merchant and the ferocity of the pirate to the needs of the state to create seamen who feared God and little else Men schooled as corsairs rose to command the state s navy and their background and self belief defeated all who came against them This is their story the story of how seizing command of the sea with violent intent led to the birth of the greatest seaborne empire the world has ever seen

The Longbow Mike Loades,2013-09-20 An iconic medieval missile weapon the deadly longbow made possible the English victories at Crecy and Poitiers at the height of the Hundred Years War The longbow was the weapon at the heart of the English military ascendancy in the century after 1340 Capable of subjecting the enemy to a hail of deadly projectiles the longbow in the hands of massed archers made possible the extraordinary victories enjoyed by English forces over superior numbers at Cr cy and Poitiers and remained a key battlefield weapon throughout the Wars of the Roses and beyond It also played a leading role in raiding siege and naval warfare Its influence and use spread to the armies of Burgundy Scotland and other powers and its reputation as a cost effective and easily produced weapon led to calls for its widespread adoption among the nascent armies of the American Republic as late as the 1770s

Unconventional Warfare from Antiquity to the Present Day Brian Hughes,Fergus Robson,2017-07-03 This volume addresses the problem of small irregular and unconventional war across time and around the globe The use of non uniformed and often civilian combatants with tactics eschewing pitched battles is the most common form of warfare throughout history and comes in many forms The collection works back in time beginning with the Long War in present day Afghanistan and concluding with warfare in classical Greece Along the way it engages with conflicts as diverse as the American Civil War and

regional rebellion in Tudor England Each case study provides unique insights into the practices experiences and discourses that have shaped this ubiquitous type of conflict Readers interested in rebellion and repression cultural and tactical interpretations of conflict civilian strategies in wartime the supposed western way of war and the ways in which participants have framed and related their actions across a variety of spheres will find much of interest in these pages

Archaeology Hotspot Great Britain Donald Henson,2015-03-12 The Archaeology Hotspots series offers reader friendly and engaging narratives of the archaeology in particular countries Written by archaeological experts with a general reader in mind each book in the series focuses on what has been found and by whom what the controversies and scandals have been ongoing projects and how it all fits into a broader view of the history of the country In Archaeology Hotspot Great Britain expert Donald Henson first chronicles the deep archaeology of a long settled region including England Wales and Scotland then explores both the famously ancient finds cave art at Creswell Crags Stonehenge and more recent and iconic historic sites and monuments such as Westminster Abbey and Ironbridge Gorge He profiles the often larger than life personalities and the previously marginalized women who have contributed to British archaeology the controversies influencing how we see the past are also highlighted Henson considers London s position in the antiquities trade and the safeguarding of heritage sites As a whole the book tells a fascinating story of Great Britain s history culture national heritage and ongoing role as a hotspot of archaeology

Archery in Medieval England Richard Wadge,2012-02-29 Archery in Medieval England is an account of how archery developed amongst ordinary people in England and Wales after the Norman Conquest In the 300 years after that traumatic event Englishmen became such skilled archers that they could defeat the most heavily armoured noble knights in battle after battle feats of arms unequalled by the combatants of any other European country Here Richard Wadge describes how men used bows and arrows in their everyday lives in the centuries between the arrival of the Normans and the start of the 100 Years War in Edward III s reign Many contemporary records provide accounts of the illegal use of bows and arrows unlawful hunting is shown to have been particularly important as a school for the development of battle winning archery skills In the process of investigating these accounts light is shed on the background to the stories of Robin Hood and other outlaws Evidence from archaeology manuscript illustrations church wall paintings and carvings provides an insight into the actual bows and arrows and their use Richard Wadge shows how the archer came to symbolise the spirit of the ordinary Englishman how he became a forerunner of John Bull and how he remains part of the national identity even today

The Funeral Achievements of Henry V at Westminster Abbey Anne Curry,Susan Jenkins,2022 Ground breaking new studies of Henry V s chapel tomb and funeral service have new revelations and insights into the time Before Henry V set out in 1415 on the campaign which culminated in victory at Agincourt he made a will laying down precise instructions for a chantry chapel to be constructed in Westminster Abbey after his death so that he could be buried close to his saintly ancestor Edward the Confessor Seven years later the king died at Vincennes and his body was brought back for burial in the Abbey the elaborate

funeral took place on 7 November 1422 His chapel was probably finally completed in the 1440s and remains a distinctive feature of Westminster Abbey to this day This book stimulated by the 600th anniversary of the death of this iconic king sheds new light on his funeral service and the design of his ornate chantry chapel and tomb It also considers each of the funeral achievements saddle helm shield and sword traditionally associated with him Drawing on up to date research by experts in each field with exciting input from new technologies it investigates the construction and form of the arms and weapons as well as providing fascinating insights into the material culture and commemoration of royalty in the fifteenth century and beyond Anne Curry is Emeritus Professor of Medieval History at the University of Southampton Susan Jenkins is Curator of Westminster Abbey experts in each field with exciting input from new technologies it investigates the construction and form of the arms and weapons as well as providing fascinating insights into the material culture and commemoration of royalty in the fifteenth century and beyond Anne Curry is Emeritus Professor of Medieval History at the University of Southampton Susan Jenkins is Curator of Westminster Abbey experts in each field with exciting input from new technologies it investigates the construction and form of the arms and weapons as well as providing fascinating insights into the material culture and commemoration of royalty in the fifteenth century and beyond Anne Curry is Emeritus Professor of Medieval History at the University of Southampton Susan Jenkins is Curator of Westminster Abbey experts in each field with exciting input from new technologies it investigates the construction and form of the arms and weapons as well as providing fascinating insights into the material culture and commemoration of royalty in the fifteenth century and beyond Anne Curry is Emeritus Professor of Medieval History at the University of Southampton Susan Jenkins is Curator of Westminster Abbey
