Web Based Educational Systems And Learning Styles:

Web-based Educational Systems and Learning Styles Abdulrahman Alghamdi, 2012-01-25 Most universities are now moving to online and distance learning systems to meet the needs of different types of learners 1 Indeed e learning is already being used by a number of universities 2 which offer online courses and degree programs The online and distance learning systems can be used either to replace face to face learning or to assist students with face to face learning Numerous different learning styles have been identified which take into account individual differences in the way people learn The learning styles theory implies that how much individuals learn has more to do with whether the educational experience is geared toward their particular style of learning than whether or not they are intelligent Individuals perceive and process information in very different ways therefore there is a necessity for a learning system to take into account as many details as possible in terms of the learning styles of the users 3

Cognitive and Emotional Processes in Web-Based Education: Integrating Human Factors and Personalization Murlas, Constantin, Tsianos, Nikos, Germanakos, Panagiotis, 2009-05-31 This book presents theories and practical frameworks to assist educators and trainers in developing e learning applications Provided by publisher

Revolutionizing Education through Web-Based Instruction Raisinghani, Mahesh, 2016-02-29 The proliferation of technology has affected all aspects of human life yet the continuing possibilities of their effects on education have yet to be fully explored When viewed separately one may believe that only paltry solutions can be wrought from online and web based education however when applied and studied in a dynamic interactive sense these advancements may alter the very notion of learning and education Revolutionizing Education through Web Based Instruction is a comprehensive multi disciplinary exploration of the emerging digital opportunities available to educators This book presents contemporary theoretical frameworks as well as practical research findings that support the use of these new computer assisted teaching techniques The myriad of research based topics featured in this book allow for a thorough diverse discussion about education technology and the intersection therein This title is an invaluable resource for instructors students of education and researchers and professionals in the fields of knowledge management

Intelligent Computing Kohei Arai, 2021-07-06 This book is a comprehensive collection of chapters focusing on the core areas of computing and their further applications in the real world Each chapter is a paper presented at the Computing Conference 2021 held on 15 16 July 2021 Computing 2021 attracted a total of 638 submissions which underwent a double blind peer review process Of those 638 submissions 235 submissions have been selected to be included in this book The goal of this conference is to give a platform to researchers with fundamental contributions and to be a premier venue for academic and industry practitioners to share new ideas and development experiences We hope that readers find this volume interesting and valuable as it provides the state of the art intelligent methods and techniques for solving real world problems We also expect that the conference and its publications is a trigger for further related research and technology improvements in this important subject

The SAGE Encyclopedia of

Educational Technology J. Michael Spector, 2015-01-29 The SAGE Encyclopedia of Educational Technology examines information on leveraging the power of technology to support teaching and learning While using innovative technology to educate individuals is certainly not a new topic how it is approached adapted and used toward the services of achieving real gains in student performance is extremely pertinent This two volume encyclopedia explores such issues focusing on core topics and issues that will retain relevance in the face of perpetually evolving devices services and specific techniques As technology evolves and becomes even more low cost easy to use and more accessible the education sector will evolve alongside it For instance issues surrounding reasoning behind how one study has shown students retain information better in traditional print formats are a topic explored within the pages of this new encyclopedia Features A collection of 300 350 entries are organized in A to Z fashion in 2 volumes available in a choice of print or electronic formats Entries authored by key figures in the field conclude with cross references and further readings A detailed index the Reader's Guide themes and cross references combine for search and browse in the electronic version This reference encyclopedia is a reliable and precise source on educational technology and a must have reference for all academic libraries

Advances in Web Based Learning - ICWL

2009 Marc Spaniol, Qing Li, Ralf Klamka, Rynson W. H. Lau, 2009-08-06 This book constitutes the refereed proceedings of the 8th International Conference on Web Based Learning ICWL 2009 held in Aachen Germany in August 2009 The 38 revised full papers and 14 short papers are presented together with three invited papers and were carefully reviewed and selected from 106 submissions They deal with topics such as technology enhanced learning web based learning for oriental languages mobile learning social software and Web 2 0 for technology enhanced learning learning resource deployment organization and management design model and framework of E learning systems e learning metadata and standards educational gaming and multimedia storytelling for learning as well as practice and experience sharing and pedagogical Issues Data-Driven Applications for Emerging Technologies Nazmul Siddique, Mohammad Shamsul Arefin, Ahmed Wasif Reza, Aminul Haque, 2025-10-24 Data Driven Applications for Emerging Technologies explores the practical use of data science in AI healthcare sustainability and security It covers key topics like predictive modelling deep learning and natural language processing offering a mix of theory and hands on applications The book highlights how data driven techniques can improve decision making optimize processes and solve real world problems Each chapter includes research contributions from academics and industry professionals making the content both relevant and accessible Readers will find practical insights into applying machine learning frameworks data preprocessing techniques and emerging technologies across different domains Designed for researchers professionals and students this book provides a solid foundation in data driven methods without being overly technical Whether you re looking to enhance your understanding of AI and machine learning or apply data science in real world scenarios this book serves as a useful and practical resource Communication, Management and Information Technology Marcelo Sampaio de Alencar, 2016-11-03 Communication Management and Information Technology contains the contributions presented at the International Conference on Communication Management and Information Technology ICCMIT 2016 Cosenza Italy 26 29 April 2016 organized by the Universal Society of Applied Research USAR The book aims at researchers scientists engineers and scholar students interested or involved in Computer Science and Systems Communication and Management Computational Intelligence for Technology Enhanced Learning Fatos Xhafa, Santi Caballé, Ajith Abraham, Thanasis Daradoumis, Angel A. Juan, 2010-03-10 E Learning has become one of the most wide spread ways of distance teaching and learning Technologies such as Web Grid and Mobile and Wireless networks are pushing teaching and learning communities to find new and intelligent ways of using these technologies to enhance teaching and learning activities Indeed these new technologies can play an important role in increasing the support to teachers and learners to shorten the time to learning and teaching yet it is necessary to use intelligent techniques to take advantage of these new technologies to achieve the desired support to teachers and learners and enhance learners performance in distributed learning environments The chapters of this volume bring advances in using intelligent techniques for technology enhanced learning as well as development of e Learning applications based on such techniques and supported by technology

Such intelligent techniques include clustering and classification for personalization of learning intelligent context aware techniques adaptive learning data mining techniques and ontologies in e Learning systems among others Academics scientists software developers teachers and tutors and students interested in e Learning will find this book useful for their academic research and practice activity **E-Learning Systems** Aleksandra Klačnja-Milićević, Boban Vesin, Mirjana Ivanović, Zoran Budimac, Lakhmi C. Jain, 2016-07-19 This monograph provides a comprehensive research review of intelligent techniques for personalisation of e learning systems Special emphasis is given to intelligent tutoring systems as a particular class of e learning systems which support and improve the learning and teaching of domain specific knowledge A new approach to perform effective personalization based on Semantic web technologies achieved in a tutoring system is presented This approach incorporates a recommender system based on collaborative tagging techniques that adapts to the interests and level of students knowledge These innovations are important contributions of this monograph Theoretical models and techniques are illustrated on a real personalised tutoring system for teaching Java programming language The monograph is directed to students and researchers interested in the e learning and personalization techniques

Handbook of Educational Data Mining Cristobal Romero, Sebastian Ventura, Mykola Pechenizkiy, Ryan S.J.d. Baker, 2010-10-25 This handbook provides a thorough overview of the current state of knowledge in this area The first part of the book includes nine surveys and tutorials on the principal data mining techniques that have been applied in education The second part presents a set of 25 case studies that give a rich overview of the problems that EDM has addressed With contributions by well known researchers from a variety of fields the book reflects the multidisciplinary nature of the EDM community It helps education experts understand what types of questions EDM can address and helps data miners understand what types of questions are important to educational design and educational decision making **SIMSARC 2018** Arti Chandani, Rajiv Divekar, Mita Mehta, 2019-02-09 4C s Communication Commerce Connectivity and Culture are the building blocks of an economy How well an economy will grow or perform will depend on how strong these four pillars are Communication leads to sharing of information among individuals It is important for any business to have the right kind of communication channel Commerce provides goods and services for the society and its people Connectivity provides the right infrastructure and system for those goods and services to reach the market Lastly culture helps to retain the indigenous value in those SIMSARC 2018 organised by Symbiosis Institute of Management Studies focussed on the aforementioned idea and invited eminent speakers from academia and industry all over the world to share their views on the importance of the 4Cs Communication Commerce Connectivity and Culture for businesses and society The conference had 4 sub themes viz Communication Commerce Connectivity and Culture which were the plenary sessions for the conference The highlight of the communication Role of AI Big Data and IoT in Business track was the papers which were from broad range of Internet of things IoT big data role of technology Artificial Intelligence among other aspects of communication The panel speakers gave

insight as to how communication is important for business not only for across boundaries but within a country as well. Another session was on Culture An indigenous way where speakers deliberated on the cultures prevailing in different organisations countries and societies. From a we together attitude in some country to a me first attitude in the other cultural similarities and dissimilarities across nations were discussed in this track. The session witnessed some relevant questions from the audience on issues of language barriers and its effect on businesses. Language and cultural barriers are something which are inevitable but one needs to be adoptive and should learn languages to mitigate these barriers. Connectivity Backbone for development was another plenary discussion where increase in connectivity through various social media platforms such as Facebook Twitter WhatsApp was discussed and deliberated where the focus was whether human beings are still emotionally connected or not. The critical role of technology was emphasized along with importance of human to human interaction. No matter how much technology comes in play human connections will never die as this was concluded by speakers as Technology may not be able to take away the emotional connect. Another track Commerce Fuel for economy where the panellist spoke about growth price discrimination financial markets inequality etc. Investor s education is one of the most important aspect to take the investors to level where they understand financial market and this will help in investment activity in the market. Sustainability was another concern highlighted by the speakers and they pointed that policies should work towards attaining sustainability in the market and try to bridge the gap between skills and jobs available in the country. Researchers from all over the country belonging to academic institutes and industry presented their research ideas on the 4C s. These research works ranged from digital transformation IOT team dynamics and organisation culture to infrastructural issues e commerce banking and corporate governance the research works presented covered a plethora of policy issues where each one of them is the need of the hour. The deliberations from renowned academicians who came from different parts of the world along with top industrialist bureaucrats entrepreneurs NGOs immensely contributed to the existing bodies of work. They emphasized on the importance of right policies to promote communication connectivity facilitating commerce and preserving culture among societies. Overall the conference witnessed a brainstorming session with scholars and experts and it surely did pave the way for future research.
