New Convair Jet Tested At Near Speed of Sound With Wind Tunnel Model

Convair's Model 880 jet transport continued to make news on several fronts this month.

H. F. Cogges, manager at Convair SD, announced last week that construction work on a new building to house detailed mockups was under way.

Meanwhile, Convair engineers and technicians continued to chafe up hours of wind tunnel tests at two locations. This week will begin preparations for tests at still another wind tunnel late this month or early in November.

The new \$225,000 mockup building will be located at southwest corner of Bldg. 4, Plant 1. Measuring 200 feet long, 100 feet wide and 22 feet high, the structure will be of steel construction with reinforced concrete floors. Access will be through a large door, 30 feet by 30 feet.

Completion is slated for Feb. 1, 1957.

Preliminary mockups have been under construction for some time in Bldg. 1. When completed, they will include interior arrangements ordered by Trans World Air Lines and Delta Air Lines, final customers for the new plane. Duplicated inside will be instruments, seats, galleys, baggage compartments and lavages.

The new building will have space for one full-sized mockup of the Model 880, including the left wing, engine and tail assembly. There will be room for a second completed fuselage, plus reinforced concrete and steel structure necessary for mockup construction.

Wind tunnel testing on the Model 880 started last June in Convair's wind tunnel at San Diego and also at the Southern California Co-Operative Wind Tunnel operated by the California Institute of Technology at Pasadena.

Over 100 hours of testing have been completed at San Diego alone while several test periods ranging from 20 to 30 hours each have been completed at Pasadena, according to John Strathorn, Convair wind tunnel manager.

Tests have ranged from low speeds up to about the speed of sound on various configurations, testing equipment, stability and other features. Most of these have been conducted by Convair test crews made up of wind tunnel personnel, aerodynamicists, flight crew and technicians from the experimental model shop.

Late this month or early in November a test crew will set up operations at the Ames Dryden Wind Tunnel operated by the National Committee for Aeronautics at Moffett Field, California.

Accidents Involve 129 at SD in Sept.

Thirty-four persons were injured in San Diego traffic accidents during September in which Convair drivers were involved.

San Diego Police Department records for the month reveal 129 Convair employees involved in 128 accidents. Ninety-six of these resulted in property damage and 24 in injury.

REBIBON CUTTING—F-102A, participated (with an F-100) in dedication of new runway recently at Palmdale.

F-102As Take Part as Palmdale Opens New 12,000-foot Runway

Convair Palmdale planes and officials participated in the dedication of a new runway at Palmdale Airport Monday (Oct. 1).

The 12,000-foot strip was officially opened to air traffic by a ribbon-cutting ceremony in which a North American F-500 piloted by Jim Strocker cut the long pink ribbon on behalf, followed by a Convair F-102A with Chief Pilot, Dick Warden as the cockpit.

Major Robert T. Green, Air Force project officer, gave a message of welcome at Palmdale Airport after introducing distinguished guests. These included

Ray Lange Speaker On Materials Panel

R. H. Lange, Dept. 420, Convair San Diego appeared as a panelist at the National Aircraft Industries Association Conference Oct. 11 and 12 at Phoenix, Ariz.

His address on "Challenges by Reclamation" on the panel discussing "Materials Utilization"

Congressman Edgar Blumenthal, Warren, Dem., mayor of Pasadena and two local business leaders of Antelope Valley, and aircraft officials.

Representing Convair Palmdale were W. J. Martin, Palmdale facility manager, and R. E. King, chief of industrial relations.

Visitors were taken on a bus tour of the airport during which their attention was drawn to Convair's new facility at the north end of the field and to the Flight Line where F-102As and TF-102s were painted out.

A brief air show featuring Convair's F-102A, interceptor, Lockheed's T-28, Navy trainer and T-33 Air Force trainer, and North American's F-49 Scorpion rounded the ceremony.

The new 12,000-foot runway at the field will feature maximum development, plus adding 17, a total of 29, is paralleled by a taxi strip of equal length.

Stromberg-Carlson Building Electronic Control For F-102

Convair San Diego last month selected the Stromberg-Carlson Division of General Dynamics Corporation to its F-102A production team.

Dedication was the delivery of Stromberg-Carlson's first damper amplifier assembly for the F-102A.

This is the first electronic assembly placed by another Division within Stromberg-Carlson since it established its San Diego operation some nine months ago. The amplifier assemblies were engineered and produced in the San Diego area by Harold F. Field, manager of Stromberg-Carlson—San Diego.

Convair will use the damper amplifier assemblies in the system which helps stabilize the F-102A in flight. There are four pairs to each assembly. Three plug-in amplifiers and a mounting rack. Although the three amplifiers are similar in appearance, each is specially designed. One mounts on the left elevator, one the right elevator and the other the rudder on the F-102A.

"We are happy that Convair was the first to take advantage of Stromberg-Carlson's know-how in the field of electronics," Field said. "We are proud to have a part in contributing to the Air Force's tremendous program on the F-102A."

Giant Lift Truck, One of Nation's Largest, Joins FW Rolling Stock

Newest addition to Convair Fort Worth's rolling stock is a 40,000-pound capacity lift truck now in operation in traffic department.

The truck, though rated at 40,000 pounds, has already lifted more than its weight (42,000 pounds), in tests at Convair.

The truck will be used to load and unload the largest drop busbar in the drop busbar area at the south end of the plant. It is one of the largest ever built. Only three of similar size are known to be in operation in the United States.

The "monster" has power steering and dual control so that the operator may drive the truck from either side. Its engine is a gasoline motor that generates electricity.

Only authorized traffic department employees will operate the truck.

Several safety features are incorporated in the truck, among them a device that locks the brakes whenever the driver is not in the operator's station.

The truck was manufactured by Clark Forker Co.

MONSTER—Newest addition to Convair Fort Worth's rolling stock is this 40,000-pound capacity lift truck. Here S. E. Allen of traffic men truck loaded with metal die on truck enters south end of plant. One of only three such in U. S., truck may be driven from either side with dual control. Largest lift truck at Convair SD has 20,000-pound capacity.
