State of the World's Cities 2012/2013 Un Habitat, 2013-10-23 The city is the home of prosperity It is the place where human beings find satisfaction of basic needs and access to essential public goods The city is also where ambitions aspirations and other material and immaterial aspects of life are realized providing contentment and happiness It is a locus at which the prospects of prosperity and individual and collective well being can be increased However when prosperity is restricted to some groups when it is used to pursue specific interests or when it is a justification for financial gains for the few to the detriment of the majority the city becomes the arena where the right to shared prosperity is claimed and fought for As people in the latter part of 2011 gathered in Cairo s Tahrir Square in Madrid s Puerta del Sol in front of London s St Paul s cathedral or in New York s Zuccotti Park they were not only demanding more equality and inclusion they were also expressing the need for prosperity to be shared across all segments of society What this new edition of State of the World s Cities shows is that prosperity for all has been compromised by a narrow focus on economic growth UN Habitat suggests a fresh approach to prosperity beyond the solely economic emphasis including other vital dimensions such as quality of life adequate infrastructures equity and environmental sustainability The Report proposes a new tool the City Prosperity Index together with a conceptual matrix the Wheel of Prosperity both of which are meant to assist decision makers to design clear policy interventions The Report advocates for the need of cities to enhance the public realm expand public goods and consolidate rights to the commons for all as a way to expand prosperity This comes in response to the observed trend of enclosing or restricting these goods and commons in enclaves of prosperity or depleting them through unsustainable use The Report maps out major policy steps to promote a new type of city the city of the twenty first century that is a good people centred city One that is capable of integrating the tangible and more intangible aspects of prosperity and in the process shedding off the

inefficient unsustainable forms and functionalities of the city of the previous century By doing this UN Habitat plays a pivotal role in ensuring that urban planning legal regulatory and institutional frameworks become instruments of prosperity and well being

Climate Change and Tradition in a Small Island State Peter Rudiak-Gould,2013-07-18 The citizens of the Marshall Islands have been told that climate change will doom their country and they have seen confirmatory omens in the land air and sea This book investigates how grassroots Marshallese society has interpreted and responded to this threat as intimated by local observation science communication and Biblical exegesis With grounds to dismiss or ignore the threat Marshall Islanders have instead embraced it with reasons to forswear guilt and responsibility they have instead adopted in group blame and having been instructed that resettlement is necessary they have vowed instead to retain the homeland These dominant local responses can be understood as arising from a pre existing vigorous constellation of Marshallese ideas termed modernity the trickster a historically inspired narrative of self inflicted cultural decline and seduction by Euro American modernity This study illuminates islander agency at the intersection of the local and the global and suggests a theory of risk perception based on ideological commitment to narratives of historical progress and decline

The Demographic Transformations of Citizenship Heli Askola,2016-09-15 The Demographic Transformations of Citizenship examines how attempts by contemporary states to govern demographic anxieties are shaping ideas about citizenship both as a boundary maintaining mechanism and as an ideal of equal membership These anxieties while most often centred upon immigration also stem from other demographic changes unfolding in contemporary states most notably the long standing trend towards lower birth rates and consequent population ageing With attention to such topics as control over borders national identity gender roles family life and changing stages of life Askola examines the impact of demographic changes including but not limited to immigration Drawing from a variety of disciplines including law demography and sociology this book discusses how efforts to manage demographic anxieties are profoundly altering ideas about citizenship and belonging

The Demographic Transition and Development in Africa Charles Teller, Assefa Hailemariam, 2011-03-04. The heated Malthusian/Boserupian debates still rage over consequences of high population growth, rapid urbanization, dense rural populations and young age structures in the face of drought, poverty, food insecurity, environmental degradation, climate change, instability and the global economic crisis. However, while facile generalizations about the lack of demographic change and lack of progress in meeting the MDGs in sub-Saharan Africa are commonplace, they are often misleading and belie the socio-cultural change that is occurring among a vanguard of more educated youth. Even within Ethiopia, the second largest country at the Crossroads of Africa and the Middle East, different narratives emerge from analysis of longitudinal/micro-level analysis as to how demographic change and responses are occurring, some more rapidly than others. The book compares Ethiopia with other African countries and demonstrates the uniqueness of an African-type demographic transition, a combination of poverty-related negative factors (unemployment, disease, food insecurity) along with positive education, health and higher age of marriage trends that are pushing this ruggedly rural and land-locked population to accelerate the demographic transition and stay on track to meet most of the MDGs. This book takes great care with the challenges of inadequate data and weak analytical capacity to research this incipient transition, trying to unravel some of the complexities in this vulnerable Horn of Africa country. A slowly declining

population growth rates with rapidly declining child mortality very high chronic under nutrition already low urban fertility but still very high rural fertility and high population resource pressure along with rapidly growing small urban places

Population Policy and Reproduction in Singapore Shirley Hsiao-Li Sun, 2012-07-26 This book examines the relationship between population policies and individual reproductive decisions in low fertility contexts Using the case study of Singapore it demonstrates that the effectiveness of population policy is a function of competing notions of citizenship and the gap between seemingly neutral policy incentives and the perceived and experienced disparate effects Drawing on a substantial number of personal interviews and focus groups the book analyzes the developmental welfare state s overarching emphasis of citizen responsibility and examines population policies that reinforce social inequalities and ignore cultural diversity These factors combine to undermine elaborate state policy efforts in encouraging citizens biological reproduction The book goes on to argue that in order to facilitate positive fertility decisions the state needs to modify the economic production at all cost approach and pay much more attention to the importance of social rights This suggests that the Singapore government might profitably approach the phenomenon of very low fertility with major initiatives similar to those of other advanced industrialized societies This book offers a significant contribution to the literature on social policy East Asian and Southeast Asian studies

China's Social Development and Policy Litao Zhao, 2013-07-18 In China social development has fallen far behind economic development This book looks at why this is the case and poses the question of whether the conditions structures and institutions that have locked China into unbalanced development are changing to pave the way for the next stage of development Based on an empirical examination of ideological structural and institutional transformations that have shaped China s development experiences the book analyses China s reform and development in the social domain including pension healthcare public housing ethnic policy and public expenditure on social programs The book moves beyond descriptive analyses to understand the role of broader changes in shaping and redefining the pattern of development in China

procreation as a tool of the state Over 170 countries or 85% of governments worldwide have active policies designed to manipulate the fertility of their citizenry with the aim of influencing the rate of growth of their populations While over 90% of least developed states are trying to combat population growth with policies designed to reduce fertility over two thirds of all developed countries are actively crafting legislation to increase their populations Despite over a hundred years of relative failure and innumerable studies questioning the viability and utility of government attempts to manipulate the fertility rate of the population as a whole the majority of governments worldwide continue to uphold and develop such policies What drives government to try to control how many children people will have Nationalizing Sex traces why population emerged as an object of governance and how natalist policy has changed over time and place using case studies from France Germany Russia India and China It analyzes the origins growth and development of fertility as a national and international political issue the rise and fall of the narratives used to ascribe meaning to natality and the global proliferation of oddly similar policies adopted by widely dissimilar states As importantly it explains why after hundreds of years countries continue to pursue natalist policy even though it has been such a widespread failure
