Section 2 deals with the fundamental classes of hardware that the modern engineer will use such as loudspeaker systems and components, microphones, mixers, amplifiers and signal processors. Special attention is given to digital techniques for system control and to audio signal analysis. Section 3 deals with the basics of system design from concept to final realization. It covers topics such as basic system type and speech intelligibility, site survey, user needs analysis and project management. Section 4 discusses individual design areas such as sports facilities, large scale tour sound systems, high level music playback systems for the theater, religious facilities and other meeting spaces.
