Voices From The Forest Celebrating Nature And Culture In Xhosaland:

Voices from the Forest Tony Dold, Michelle Cocks, 2012 book which explores the journey of celebrating the link between people and nature the book reveals how plants animals and landscapes are profoundly reflected in Xhosa language stories poetry religious rituals healing practices and everyday customs that define Xhosa culture Over the years cultural and spiritual meaning of nature in South Africa has been poorly recorded and often misunderstood The current trade of medicinal plants is often destructive and unsustainable with an estimated 27 million South Africans making use of indigenous medicines This is a serious detriment as natural resources have been a reliant for underprivileged people who gain food fuel medicines and building materials from wild plants Therefore the addition of information on edible and medicinal plants is of extreme importance Voices from the Forest gives a fresh positive approach to biodiversity conservation in SA by showing that people 2019s values for natural resources can be considered positively as a way forward to continued sustainable use The book explores the role that nature plays in the cultural and spiritual landscapes of the Xhosa people in the Eastern Cape of South Africa and serves as a pointer to sustainable practices in the future The underlying aim is ultimately sustaining cultural heritage and conserving biodiversity because in our modernising world cultural diversity is threatened by the loss of natural diversity and finding ways of protecting the region s biodiversity and cultural diversity is of vital importance Publisher s website

Biotraffic Christopher Morris, 2024-10-15 Biotraffic explores the complex world of biological resource trade It takes readers inside the contemporary Ciskei region of South Africa a once notorious apartheid homeland turned extractive hub for wild medicinal plants Drawing from in depth ethnographic and archival research Christopher Morris examines the region s trade in *Pelargonium sidoides* a plant once contested as a tuberculosis treatment in early twentieth century Europe and now an internationally marketed remedy for the common cold The story of this trade links past and present encapsulating a larger tale about colonial legacies and their intersection with global environmental

governance ambitions It also teems with a diverse cast of actors from plant harvesters and pharmaceutical companies to activist NGOs and the chiefs who have become business partners with multinational drug firms The book's analysis extends beyond considering merely the extraction and commercialization of plant resources and offers a critical examination of how demand for therapeutics intertwines with broader struggles over land and political power in South Africa Biotraffic illuminates how a distance defying trade is reshaping the sociopolitical landscape of a region a region grappling with apartheid's afterlives and the challenges of environmental and economic justice

Urban Nature Michelle L. Cocks, Charlie M. Shackleton, 2020-11-15 This book showcases the diversity of ways in which urban residents from varying cultural contexts view, interact, engage with, and give meaning to urban nature aiming to counterbalance the dominance of Western depictions and values of urban nature and design Urban nature has up to now largely been defined, planned, and managed in a way that is heavily dominated by Western understandings, values, and appreciations which has spread through colonialism and globalisation As cities increasingly represent a diversity of cultures and urban nature is being increasingly recognised as contributing to residents' wellbeing, belonging, and overall quality of life, it is important to consider the numerous ways in which urban nature is understood and appreciated This collection of case studies includes examples from Africa, Asia, Europe, North, and South America and reflects on the multi-dimensional aspects of engagements with urban nature through a biocultural diversity lens The chapters cover several themes such as how engagements with nature contribute to a sense of wellbeing and belonging, the implications that diversity has on the provision, design, and management of urban environments, and the threats inhibiting residents' abilities to engage meaningfully with nature The book challenges the dominant discourse, Western ideological understandings, and meta-narratives of modernisation and unilineal urban transitions A timely addition to the literature Urban Nature: Enriching, Belonging, Wellbeing, and Bioculture offers an alternative to Western ideological understandings of nature and values and will be of great interest to those working in human and environmental urban ecology It will also be key reading for students in the relevant fields of anthropology, development studies, geography, social ecology, and urban studies

The Scientific Imagination in South Africa William Beinart, Saul Dubow, 2021-05-20 An innovative three hundred year exploration of the social and political contexts of science and the scientific imagination in South Africa

The African Book Publishing Record, 2012

Tribing and Untribing the Archive Carolyn Hamilton, Nessa Leibhammer, 2016 These volumes track how the domain of the tribal and traditional was marked out and came to be sharply distinguished from modernity how it was denied a changing history and an archive and was endowed instead with a timeless culture These volumes also offer strategies for engaging with the materials differently from the interventions effected in contemporary artworks to the inserting of nameless, timeless objects of material culture into histories of individualized and politicized experience Publisher's description
