Warships Of The Great War Era A History Of Ship Models:

Warships of the Great War Era David Hobbs, 2014-10-14 The National Maritime Museum in Greenwich houses the largest collection of scale ship models in the world many of which are official contemporary artefacts made by the craftsmen of the navy or the shipbuilders themselves and ranging from the mid seventeenth century to the present day As such they represent a three dimensional archive of unique importance and authority Treated as historical evidence they offer more detail than even the best plans and demonstrate exactly what the ships looked like in a way that even the finest marine painter could not achieve This book is one of a series that takes a selection of the best models to tell the story of specific ship types in this case the various classes of warship that fought in the First World War from dreadnoughts to coastal motor boats It reproduces a large number of model photos all in full colour and including many close up and detail views These are captioned in depth but many are also annotated to focus attention on interesting or unusual features Although pictorial in emphasis the book weaves the pictures into an authoritative text producing an unusual and attractive form of technical history

Warship 2017 Stephen Dent, 2017-06-15 Warship 2017 is devoted to the design development and service history of the world's combat ships Featuring a broad range of articles from a select panel of distinguished international contributors this latest volume combines original research new book reviews warship notes an image gallery and much more to maintain the impressive standards of scholarship and research from the field of warship history This 39th edition features the usual range of diverse articles spanning the subject by an international array of expert authors

The Life and Ship Models of Norman Ough Alistar Roach, 2016-10-30 Brings Ough's life and work beautifully to light in a volume rich in photographs drawings technical detail and personality Schopenhauer's Workshop Norman Ough is considered by many as simply the greatest ship modeler of the twentieth century and his exquisite drawings and meticulous models have come to be regarded as masterpieces of draughtsmanship workmanship and realism more than technically accomplished ship models they are truly works of art This new book is both a tribute to his lonely genius and a practical treatise for model shipwrights Ough lived most of his adult life far from the sea in a flat high above the Charing Cross Road in London where his frugal existence and total absorption in his work led to hospitalization on at least two occasions he was an eccentric in the truest sense but he also became one of the most sought after masters of his craft Earl Mountbatten had him model the ships he had served on his model of HMS Queen Elizabeth was presented to Earl Beatty film production companies commissioned models for effects in several films Incorporating many of his original articles from Model Maker Magazine his detailed line drawings now kept in the Brunel Institute and photographs of his models held in museums and at Mountbatten's house this book presents an inspiring panorama of perhaps the most perfect warship models ever made An amazing almost intimidating view of the method modelling drawings and a life of a builder so obsessed with his work that some may say he was a man who went down with his ships FineScale Modeler

Taranto David Hobbs, 2020-11-30 If you only read one book on the development

of the Fleet Air Arm and Naval air warfare in the Mediterranean during World War 2 then this should be it Military Historical Society After the Italian declaration of war in June 1940 the Royal Navy found itself facing a larger and better equipped Italian surface fleet large Italian and German air forces equipped with modern aircraft and both Italian and German submarines Its own aircraft were a critical element of an unprecedented fight on over and under the sea surface The best known action was the crippling of the Italian fleet at Taranto which demonstrated how aircraft carriers and their aircraft had replaced the dominance of battleships but every subsequent operation is covered from the perspective of naval aviation Some of these like Matapan or the defense of the Pedestal convoy to Malta are famous but others in support of land campaigns and in the Aegean after the Italian surrender are less well recorded In all these the ingenuity and innovation of the Fleet Air Arm shines through Taranto pointed the way to what the Japanese would achieve at Pearl Harbor while air cover for the Salerno landings demonstrated the effectiveness of carrier borne fighters in amphibious operations a tactic adopted by the US Navy The author s years of archival research together with his experience as a carrier pilot allow him to describe and analyze the operations of naval aircraft in the Mediterranean with unprecedented authority This provides the book with novel insights into many familiar facets of the Mediterranean war while for the first time doing full justice to the Fleet Air Arm s lesser known achievements A full and fascinating story Clash of Steel
