Foodscapes, Foodfields, and Identities in Yucatán Steffan Igor Ayora Díaz, 2012 The state of Yucatán has its own distinct culinary tradition and local people are constantly thinking and talking about food They use it as a vehicle for social relations but also to distinguish themselves from Mexicans This book examines the politics surrounding regional cuisine as the author argues that Yucatecan gastronomy has been created and promoted in an effort to affirm the identity of a regional people and to oppose the hegemonic force of central Mexican cultural icons and forms In particular Yucatecan gastronomy counters the homogenizing drive of a national cuisine based on dominant central Mexican appetencies and defies the image of Mexican national cuisine as rooted in indigenous traditions Drawing on post structural and postcolonial theory the author proposes that Yucatecan gastronomy having successfully gained a reputation as distinct and distant from Mexican cuisine is a bifurcation from regional culinary practices However the author warns this leads to a double paradoxical situation that divides the nation while a national cuisine attempts to silence regional cultural diversity the fissures in the project of a homogeneous regional identity are revealed

K'Oben Amber M. O'Connor, Eugene N. Anderson, 2016-12-14 K'Oben traces the Maya kitchen and its associated hardware ingredients and cooking styles from the earliest times for which we have archaeological evidence through today's culinary tourism in the area It focuses not only on what was eaten and how it was cooked but the people involved who grew or sourced the foods who cooked them who ate them Additionally the authors examine how Maya foodways and the people involved fit into the social system particularly in how food is incorporated into culture economy and society The authors provide a detailed literature review of hard to find sources including out of print centuries old cookbooks archaeological field notes ethnographies and ethnohistories out of circulation and not available in English thesis documents only available in Spanish and in university archives as well as

current field research on the Maya The more recent Maya foodways can be studied from cookbooks ethnographies and ethnohistorical documentation Between the two of us we have assembled a small but representative collection of cookbooks some self published and rare that were available in Merida and elsewhere in Mexico during the late 20th century Some are quite old and all reflect local traditional foodways Geographically the book concentrates on Yucatan Tabasco and Chiapas in Mexico but will include Pre Classic and Classic evidence from Guatemala and El Salvador whose foodways are influenced by Maya traditions

Chasing Chiles Gary Paul Nabhan, Kraig Kraft, Kurt Michael Friese, 2011-03-16 Chasing Chiles looks at both the future of place based foods and the effects of climate change on agriculture through the lens of the chile pepper from the farmers who cultivate this iconic crop to the cuisines and cultural traditions in which peppers play a huge role Why chile peppers Both a spice and a vegetable chile peppers have captivated imaginations and taste buds for thousands of years Native to Mesoamerica and the New World chiles are currently grown on every continent since their relatively recent introduction to Europe in the early 1500s via Christopher Columbus Chiles are delicious dynamic and very diverse they have been rapidly adopted adapted and assimilated into numerous world cuisines and while malleable to a degree certain heirloom varieties are deeply tied to place and culture but now accelerating climate change may be scrambling their terroir Over a year long journey three pepper loving gastronomists an agroecologist a chef and an ethnobotanist set out to find the real stories of America's rarest heirloom chile varieties and learn about the changing climate from farmers and other people who live by the pepper and who lately have been adapting to shifting growing conditions and weather patterns They put a face on an issue that has been made far too abstract for our own good Chasing Chiles is not your archetypal book about climate change with facts and computer models delivered by a distant narrator On the contrary these three dedicated chileheads look and listen sit down to eat and get stories and recipes from on the ground in farmers fields local cafes and the desert scrub hillsides across North America From the Sonoran Desert to Santa Fe and St Augustine the two oldest cities in the U S from the marshes of Avery Island in Cajun Louisiana to the thin limestone soils of the Yucatan this book looks at how and why climate change will continue to affect our palates and our producers and how it already has
