Zaaizaad En Plantgoedwet:

The functional field of food law Altinay Urazbaeva, Anna Szajkowska, Bart Wernaart, Nikolaas Tilkin Franssens, Rozita Spirovska Vaskoska, 2023-12-04 Two worlds that in academia remain largely separated are brought together in this book in a unique way the world of food safety law and the world of the right to food Key features include 1 an up to date reflection of the status quo on food law related research written by those who are at the forefront of research in the functional field of food law 2 a collection of contributions from all continents of the world and 3 covering human rights international law European law and non European law dimensions This book is written as a Liber Amicorum in honour of Professor Bernd van der Meulen who was the Chair of Law and Governance at Wageningen University 2001 2018 and established food law as an academic discipline in the Netherlands In 29 contributions the functional field of food law is discussed The contributors are researchers and academics from around the globe and are above all friends who have worked with Bernd during his time at Wageningen University In this book they share their latest insights research and thoughts on this fascinating and highly relevant field

Netherlands Reports to the XIth International Congress of Comparative Law Caracas 1982 H. D'Oliveira, 2013-11-11 Last year I addressed the Netherlands Comparative Law Association with the following question Does Comparative Law Exist At All My intention then was to flog the dead horse of the merger of comparative law and the sociology of law In presenting this voluminous collection of Netherlands national reports to the eleventh congress of the International Academy of Comparative Law I feel my misgivings giving way to the suspicion that comparative law indeed exists Of course national reports do not as such prove the existence of comparative law It is the general reports together with the national reports which embody the comparative effort That is why the Netherlands Comparative Law Association took the initiative to propose the publishing of the materials on a subject to subject basis instead of publishing collections of national reports From a comparative legal point of view it is the topic that should form the basis of the publication and not the origin of the materials The general reporter for each topic should be prepared to take up the responsibilities of editing the volume and would have to be given the right to select those national reports which he considers to be useful both in regard to their quality and the relevance of the material to the basic problems in the questionnaire This proposal met with very favourable comments from the national committees and general reporters of some fifteen countries

Implementing and Enforcing European Fisheries Law Astrid Berg, 2023-09-20 Within the European Union overfishing overcapacity and non compliance with the system of catch quotas are threatening the very existence of some fisheries resources In dealing with these problems the Common Fisheries Policy CFP has developed into one of the most regulated areas of the European Union Yet in order to provide for the necessary implementation and enforcement frameworks the European Union strongly relies on the Member States a reliance on fifteen different legal systems with different regulatory capacities different legal traditions and different enforcement systems of criminal law administrative law private law or disciplinary law Implementing and

Enforcing European Fisheries Laws focuses on the legal and practical problems of the implementation and enforcement of the EU's catch quotas in a shared legal order. It examines in detail how effective enforcement can be achieved in a process of European integration. A distinctive feature of this book is the attention given to the trend towards sectoralization whereby management and enforcement responsibilities are shared between the central government and organisations representing fishermen. To what extent does sectoralization affect traditional systems of public law enforcement? What does resort to the fishing sector itself mean for the degree of legal control Member States exercise over these systems? The book is divided into three sections. Part One examines the Community law context. Part Two investigates implementation and enforcement in the Netherlands and the United Kingdom and analyzes the effectiveness of the existing regulatory frameworks and the systems of criminal administrative and disciplinary law used to enforce the fisheries laws and regulations. Part Three compares the national systems in the light of European law requirements and the protection of individual rights. The book concludes with the future of fisheries enforcement and considers the potential changes in enforcement. The study is of importance for the future role of the CFP and its possible effects on national implementation and enforcement. More generally, the book reveals the shifting distribution of responsibilities between the Community and the national institutions and actors involved and shows many of the possibilities for and the limits of regulatory enforcement in a setting of European integration.

Introduction to Dutch Law Jeroen Chorus, 2016-04-18. A standard legal resource since its first edition in 1978, this matchless book has proven itself the ideal overview of Dutch law for foreign lawyers. This Fifth Edition fully updates its systematic description of the legal sources, institutions and concepts in all major fields of law. Recent developments covered include the progressive implementation of standards set by international conventions, the reorganization of the judiciary, the statute on environmental law and the recodification of private international law. The continuing influence of European law is evident in many fields, perhaps most notably in family law. The various chapters are written by experts, scholars and lawyers in particular fields and provide an authoritative overview of each field. The historical sources of Dutch law are discussed as well as Dutch legal culture, judicial organization, legal education and the legal profession. These chapters are followed by introductions to essential issues of private and public law and labour law. The last chapter examines questions of legal philosophy. The only resource of its kind available, this book is unmatched as a thorough guide to further research. It offers practitioners, particularly foreign lawyers, a quick and reliable way into any area of Dutch law that they may be required to research. It will also be of great value to comparatists, especially those studying the influence of European law on national legal systems, scholars and students. Like previous editions, the Fifth Edition has been prepared under the auspices of the Netherlands Comparative Law Association.

Implementing the Nagoya Protocol Brendan Coolsaet, Fulya Batur, Arianna Broggiato, John Pitseys, Tom Dedeurwaerdere, 2015-04-21. The adoption of the Nagoya Protocol on Access and Benefit sharing to the Convention on Biological Diversity in 2010 is a major landmark for the global governance of genetic resources and

traditional knowledge The way in which it will be translated into practice will however depend on the concrete implementation in national country legislation across the world Implementing the Nagoya Protocol compares existing ABS regimes in ten European countries including one non EU member and one EU candidate country and critically explores several cross cutting issues related to the implementation of the Nagoya Protocol in the EU Gathering some of the most professional and widely acclaimed experts in ABS issues this book takes a major step towards filling a gap in the vast body of literature on national and regional implementation of global commitments regarding ABS and traditional knowledge *The Netherlands, Switzerland, Czech Republic, Slovakia, Malta, Latvia* Wolfgang Faber, Brigitta Lurger, 2010-12-23 This excellent series presents comparative study analysis and evaluation of 28 European legal systems in the field of transfer of movables Major topics are the notion of ownership the derivative acquisition of ownership e g by a sales contract the good faith acquisition of ownership and other property rights the multiple sale of the same movable the protection of possession positive acquisitive prescription and processing and consolidation The work is based on comprehensive country reports which are to be published on the relevant legal rules in Europe and has the drafting and publication of text proposals of uniform European rules with commentary and comparative notes as its primary goal It intends to influence the future development of European private law on the EU level This sixth volume of the series presents up to date national reports of The Netherlands Switzerland Czech Republic Slovakia Malta Latvia A Critical Mind Christine Godt, Matthias Lamping, 2023-06-22 This book traces the academic footprint of Hanns Ullrich Thirty contributions revolve around five central topics of his oeuvre the European legal order competition law intellectual property the regulation of new technologies and the global market order Acknowledging him as a trailblazer the book aims to capture how deeply Hanns Ullrich has influenced contemporaries and subsequent generations of scholars The contributors re iterate the path breaking patterns of his teachings such as his contemplation of intellectual property as embedded in competition the necessity of balancing private and public interests in intellectual property law the policies of market integration and the peculiar relationship of technological advancement and protectionism *European Trademark Law* Tobias Cohen Jehoram, Constant Van Nispen, 2010-09-30 European Trademark Law describes all relevant developments in both legislation and case law in particular of the Court of Justice offering not only a succinct introduction to the theory structure and nature of trademark law but also insightful suggestions for resolving and answering a host of practical problems As the authors note their book provides an overview of trademark law rather than an overview of trademark legislation The authors view the law from different perspectives they take both the European perspective and the perspective from harmonised national trademark law in particular as it is in the Benelux countries Paying particular attention to the implications of the considerable stream of case law that has followed from partially new doctrines set in place by the harmonization process the book greatly clarifies the workings and interrelations of such factors as the following situations that did not constitute infringement under former trademark law but do constitute infringement

today and vice versa different types of marks and their particularities registration and opposition procedures relevant international treaties requirements for the mark grounds for refusal and invalidity scope of and limitations to trademark protection use of trademarks in comparative advertising referential use of trademarks use of trademarks on the internet exhaustion of rights parallel trade concepts of well known trademarks and trademarks with a reputation procedural aspects of enforcing trademark rights how trademark rights are lost The analysis also covers specific aspects of the trademark right that are related to other legal areas such as property law trade name law the law regarding geographical indications of origin copyright law competition law and product liability An especially valuable part of the book s presentation follows the life of a trademark from filing the application up to and including its cancellation revocation or invalidity Introduction to Dutch Law Larissa van den Herik, Ewoud Hondius, Wim Voermans, 2022-01-27 A standard legal resource since its first edition in 1978 this matchless book has proven itself the ideal overview of Dutch law for foreign lawyers This Sixth Edition fully updates its systematic description of the legal sources institutions and concepts in all major fields of law Recent developments covered include the progressive implementation of standards set by international conventions the reorganization of the judiciary the statute on environmental law and the re codification of private international law The continuing influence of European law is evident in many fields perhaps most notably in family law The various chapters are written by experts scholars and lawyers in particular fields and provide an authoritative overview of each field The historical sources of Dutch law are discussed as well as Dutch legal culture legal philosophy judicial organization legal education and the legal profession These chapters are followed by introductions to essential issues of private and public law and labour law The last chapter examines financial law The only resource of its kind available this book is unmatched as a thorough guide to further research It offers practitioners particularly foreign lawyers a quick and reliable way into any area of Dutch law that they may be required to research It will also be of great value to comparatists especially those studying the influence of European law on national legal systems scholars and students Like previous editions the Sixth Edition has been prepared under the auspices of the Netherlands Comparative Law Association The Scope and Structure of Civil Codes Julio César Rivera, 2014-02-04 This detailed analysis of the content and configuration of civil codes in diverse jurisdictions also examines their relationship with some branches of private law as family law commercial law consumer law and private international law It analyzes the codification decodification and recodification processes illuminating the dialogue between current codes and private law legislation in general with Constitutions and International Conventions The commentary elucidates the changing requirements of civil law as it shifted from an early protection of patrimony to a support for commercial and contractual law It also explains the varying trajectories of civil law which in some jurisdictions was merged with religious legal tenets in its codification of familial relations while in others it was fused with commercial law or indeed codified from scratch as a discrete legal corpus Elsewhere the volume provides material on differing approaches to consumer law where

relevant legislation may be scattered across numerous statutes and also on private international law a topic of increasing relevance in a world where business corporations have interests in multiple jurisdictions and often play one off against another The volume features invited contributions from leading scholars in the field of private law brought together for an in depth analysis of the current regulatory attitude in this field of the law in jurisdictions with diverse legal systems and traditions In current times we are witnessing the adoption of diverging regulatory solutions Through the analysis of the past and present of private law regulation the volume unveils the underlying trends and relevance of the codification method across the world Industrial Property and Copyright in European Community Law Hartmut Johannes,1976-12-23

Security Rights in Intellectual Property Eva-Maria Kieninger,2020-06-11 This book discusses the main legal and economic challenges to the creation and enforcement of security rights in intellectual property and explores possible avenues of reform such as more specific rules for security in IP rights and better coordination between intellectual property law and secured transactions law In the context of business financing intellectual property rights are still only reluctantly used as collateral and on a small scale If they are used at all it is mostly done in the form of a floating charge or some other all asset security right The only sector in which security rights in intellectual property play a major role at least in some jurisdictions is the financing of movies On the other hand it is virtually undisputed that security rights in intellectual property could be economically valuable or even crucial for small and medium sized enterprises especially for start ups which are often very innovative and creative but have limited access to corporate financing and must rely on capital markets securitization capital market Therefore they need to secure bank loans yet lack their own traditional collateral such as land **Zaaizaad- en plantgoedwet** Netherlands (Kingdom, 1815-),K.
