Renowned historian Glenn Adamson turns that narrative on its head in this innovative account revealing makers central role in shaping America s identity Examine any phase of the nation s struggle to define itself and artisans are there from the silversmith Paul Revere and the revolutionary carpenters and blacksmiths who hurled tea into Boston Harbor to today s maker movement From Mother Jones to Rosie the Riveter From Betsy Ross to Rosa Parks From suffrage banners to the AIDS Quilt Adamson shows that craft has long been implicated in debates around equality education and class Artisanhip has often been a site of resistance for oppressed people such as enslaved African Americans whose skilled labor might confer hard won agency under bondage or the Native American makers who adapted traditional arts into statements of modernity Theirs are among the array of memorable portraits of Americans both celebrated and unfamiliar in this richly peopled book As Adamson argues these artisans stories speak to our collective striving toward a more perfect union From the beginning America had to be and still remains to be crafted

East Asia Hugh Dyson Walker, 2012-11 Histories of East Asia traditionally emphasize China and Japan and neglect Korea and Vietnam Essentially 20th century East Asia is re written into the past as though China and Japan was always the core of East Asian development This is not at all how East Asia developed Chinese prehistoric cultures became historic in the 18th century B C Japan was not part of East Asia for over 2300 more years By studying periods of Chinese unity and disunity and their effects on China s neighbors Korea and Vietnam a distinct culture zone East Asia gradually emerged and slowly included Japan The main elements of East Asia cultural social political philosophical religious and linguistic were derived from China but the others were not minor replicas of China Each was unique its people ethnically distinct from China and each other its native language and linguistic blend with Chinese also unique Korea and Vietnam resisted Chinese colonization but adopted and adapted advance Chinese elements to their own needs Emerging later Japan underwent wholesale adoption of Tang China s advances replicated in the 19th century when Japan was the first East Asian country to modernize Spanning some thirty eight centuries from the 18th century B C to 2012 A D this diversity with common elements derived from China is a major theme of this work It is often overlooked by those who prefer general views based on surface impressions to more complex realities The former often lead to mistakes the latter become the basis for more sound understanding After all these four countries and people share the eastern end of the Eurasian continent yet each country s geographic situation is also unique As the twenty first century continues to unfold this new approach to East Asia should help to produce clearer and more accurate understanding of this important world region

Planting Design Patrick Mooney, 2019-10-30 Landscape designers have long understood the use of plants to provide beauty aesthetic pleasure and visual stimulation while supporting a broad range of functional goals However the potential for plants in the landscape to elicit human involvement and provide mental stimulation and restoration is much less well understood This book meshes the art of planting design with an understanding of how humans respond to natural environments Beginning with an understanding of human needs preferences and responses to landscape the author

interprets the ways in which an understanding of the human environment interaction can inform planting design. Many of the principles and techniques that may be used in planting design are beautifully illustrated in full colour with examples by leading landscape architects and designers from the United Kingdom, Europe, North America and Asia, including Andrea Cochran, Andrea Cochran Landscape Architecture, San Francisco, CA; Design Workshop Inc, Richard Hartlage Land Morphology, Seattle, WA; Shunmyo Masuno, Japan; Landscape Consultants Ltd, Yokohama; Piet Oudolf, Hummelo, The Netherlands; Melody Redekop, Vancouver; Christine Ten Eyck, Ten Eyck Landscape Architects Inc, Austin, TX; Kongjian Yu, Turenscape Ltd, Beijing. The book stimulates thought, provides new direction and assists the reader to find their own unique design voice. Because there are many valid processes and intentions for landscape design, the book is not intended to be overly prescriptive. Rather than presenting a strict design method and accompanying set of rules, *Planting Design* provides information, insight and inspiration as a basis for developing the individual designer's own expression in this most challenging of art forms.
